

Era	Period	How Long Since It Began in Millions of Years	Major Physical Events in Canada	How Living Things Were Changing
Cenozoic	Quaternary Pleistocene	1	Scenery became what it is today after a period of heavy glaciation which covered much of Canada and the northern United States.	Life became essentially modern. Most of man's history is in this short period of time.
	Tertiary Pliocene Miocene Oligocene Eocene Palaeocene	70	Erosion with various uplifts of the land in the east. Western mountains were deeply eroded with filling in of basins between them, with several periods of uplift.	Modern plants spread widely. Mammals which were rare and primitive at beginning diversified and became numerous with rise of modern forms. Seas teemed with modern-looking invertebrate animals.
Mesozoic	Rocky Mountains folded and uplifted			
	Cretaceous	125	Long and profound erosion in all of the east. Vast inland seas laid down rocks which now cover much of great plains area. Some making of mountains near the Pacific Coast.	Reptiles began modestly in Triassic, then had great climax in dinosaurs. Flying reptiles, marine forms in abundance in Jurassic and Cretaceous, then sudden extinction. Forests started as mostly conifers and ferns but saw spread of flowering plants and grasses in late Mesozoic. Marine invertebrates included many which are now extinct.
	Jurassic	165		
	Triassic	200	In east, lava flows and erosion with infilling of local basins like the Bay of Fundy region. In west some mountain building and some flooding of the interior by seas.	
Palaeozoic	Mountains formed all along eastern seaboard of North America extending up into Maritimes and Newfoundland.			Permian saw end of many forms with long and successful histories in invertebrate world.
	Permian	230	Widespread deserts surrounding shallow inland seas.	Late Palaeozoic forests mostly of spore-bearing and fern-type trees. First reptiles and insects in Pennsylvanian.
	Pennsylvanian	260	Coal deposits laid down in great swamps in some parts of the Maritimes.	First forests in late Silurian or early Devonian.
	Mississippian	290	Red beds and gypsum in parts of Maritimes. Marine deposits in West.	Devonian seas dominated by primitive fishes; corals and crustaceans common.
	Severe folding and faulting of older rocks in eastern area			
	Devonian	330	Great inland seas like the modern Hudson Bay covered much of what is now North America and in them thick accumulations of sedimentary rocks took place.	Early Palaeozoic saw fishes replace invertebrates as dominant marine forms. Lands were probably naked of vegetation in beginning but plants gradually spread over favorable areas.
	Silurian	360		
	Ordovician	420		
	Cambrian	500		
Pre-cambrian	Long erosion in most parts of North America			
		4,000 ±	Ancient rocks which have since undergone great changes during mountain building and igneous intrusion were laid down, folded and deeply eroded many times. The bottoms of a few of the western mountains show these old rocks in little disturbed condition.	Many of the invertebrates were living in Precambrian times but the fossil record is very sparse because of the lack of preservable parts and destruction of most fossils by metamorphism.

The Guide To Geology For Visitors To Canadas National Parks

The Guide To Geology For Visitors To Canadas National Parks:

A Guide to Geology for Visitors in Canada's National Parks David McCurdy Baird,1960 *A guide to geology for visitors to Canada's national parks. [By] David M. Baird. (Revised edition.).* CANADA. Department of Indian and Northern Affairs. Parks Canada,David McCurdy BAIRD,1974 **A Guide to Geology** Canada. National Parks Branch,1963 *The nature park guide for Yoho National Park (Canada)* ,2025-09-26 **A Guide to Geology for Visitors in Canada's National Parks** Adèle Park,David McCurdy Baird,James Alexander Green,Kathleen Yardley Lonsdale,Kelso B. Morris,L. L. Leveson,1958

Cape Breton Highlands National Park--where the mountains meet the sea David M. Baird,2022-08-16 David M Baird s Cape Breton Highlands National Park where the mountains meet the sea is an evocative exploration of one of Canada s national treasures seamlessly melding the grandeur of landscape with the minute details of natural beauty Baird s prose captures the park s majestic topography where elevated peaks descend to the Atlantic Ocean The literary style of the work consists of vivid narrative descriptive passages and historical context that not only brings the setting to life but also situates the natural expanse within the broader scope of Canadian heritage and environmental conservation As a special edition from DigiCat Publishing the text s careful restoration for modern readers asserts its value as a meaningful contribution to world literature nDavid M Baird the author brings a keen and observant eye to the subject matter His background and experiences undoubtedly inform the rich descriptions and compelling narrative found within the pages Baird s passion for both the natural world and its preservation is apparent suggesting a deep connection to Cape Breton s landscape This connection likely emanates from a combination of personal experience and scholarly interest contributing to the authenticity and depth of the work nThis book is a treasure for readers who are enthusiasts of natural history geography or those seeking to immerse themselves in the serene beauty of one of Canada s most magnificent national parks Baird s work serves as both an informative guide and a moving tribute making Cape Breton Highlands National Park where the mountains meet the sea a commendable addition to any nature lover s library The painstaking efforts of DigiCat Publishing to present the book in a contemporary format ensures that Baird s legacy continues to inspire and educate future generations of readers and conservationists alike *The nature park guide for Gros Morne National Park (Canada)* ,2025-09-26 **A Guide to**

Geology for Visitors in Canada's National Park David M. Baird,1963 **How to Find Out About Canada** G. Chandler,H. C. Campbell,2014-05-16 How to Find Out About Canada presents the various aspects of the social and political structure in Canada This book examines the literature arts and science economy and educational system in the country Comprised of 15 chapters this book starts with an overview of the Canadian government publishing and several periodical publications This text then describes the religious development of the nation encompassing all primary denominations and their intimate relationship to economic and political life Other chapters consider the various studies in the political and social fields that are carried on by governments labor unions industry cooperatives and the various Canadian political parties This

book discusses as well the degree of standardization and equality of educational opportunity for children in all parts of Canada The final chapter deals with the various documents relating to the history of Canada This book is a valuable resource for students teachers and readers whose interests span a variety of fields *Geological Survey Bulletin* ,1972 *The nature park guide for Banff National Park (Canada)* ,2025-09-26 [Canadian Books for Young People/Livres canadiens pour la jeunesse](#), 3e Irma McDonough,1980-12-15 This third completely revised edition contains hundreds of new entries for a total of almost 2 000 children s books and magazines carefully selected and described by a team of children s librarians Entries are arranged by subject with reading levels indicated where necessary and are also listed in a separate author title index A list of prize winning Canadian children s books and a basic book list for librarians teachers and parents are included in this charmingly illustrated volume **Union List of Geologic Field Trip Guidebooks of North America** Richard A.
