The Making Of A Hinterland State Society And Economy In Inland North China 1853 1937:

The Making of a Hinterland Kenneth Pomeranz, 2023-12-22 This wholly original reassessment of critical issues in modern Chinese history traces social economic and ecological change in inland North China during the late Qing dynasty and the Republic Using many new sources Kenneth Pomeranz argues that the development of certain regions entailed the systematic underdevelopment of other regions He maps changes in local finance farming transportation taxation and popular protest and analyzes the consequences for different classes sub regions and genders Pomeranz attributes these diverse developments to several causes the growing but incomplete integration of North China into the world economy the state s abandonment of many hinterland areas and traditional functions and the effect of local social structures on these processes He shows that hinterlands were made not merely found and were powerfully shaped by the strategies of local groups as well as outside forces This wholly original reassessment of critical issues in modern Chinese history traces social economic and ecological change in inland North China during the late Qing dynasty and the Republic Using many new sources Kenneth Pomeranz argues that the dev

Economic Change in China, C.1800-1950 Philip Richardson, *Economic History Society*, 1999-11-13 This concise 1999 introduction focuses on China s transition to economic modernisation East Asia's Reemergence Philip S. Golub, 2016-05-27 East Asia has re emerged after a long eclipse as a centre of world wealth creation and growth Over the past four decades the region s share of world GDP has risen from less than 10 to 30 percent a ratio that is set to rise to 40 percent by 2030 What has made East Asia s remarkable ascent possible and what does this economic rebalancing between East and West mean for world politics In this insightful and provocative book Philip Golub addresses these questions tracing the region s rise from the early modern European Asian encounter to the imperial confrontations of the nineteenth century and China s state capitalist turn in the latter half of the twentieth century Together he argues the dynamics of imperialism war and revolution led to the constitution of developmental states that made possible East Asia s return to a central position in the global economy Combining rich historical narrative and social theory this book is an invaluable guide to one of the core issues in world politics today The Chinese Worker After Socialism William

White Lotus Rebels and South China Pirates Wensheng Wang, 2014-01-06 The reign of Emperor Jiaqing 1796 1820 CE has occupied an awkward position in studies of China s last dynasty the Qing Conveniently marking a watershed between the prosperous eighteenth century and the tragic post Opium War era this quarter century has nevertheless been glossed over as an unremarkable interlude separating two well studied epochs of transformation *White Lotus Rebels and South China Pirates* presents a major reassessment of this period by examining how the emperors bureaucrats and foreigners responded to the two crises that shaped the transition from the Qianlong to the Jiaqing reign Wensheng Wang argues that the dramatic combination of internal uprising and transnational piracy rather than being a hallmark of inexorable dynastic decline

propelled the Manchu court to reorganize itself through modifications in policymaking and bureaucratic structure. The resulting Jiaqing reforms initiated a process of state retreat that pulled the Qing Empire out of a cycle of aggressive overextension and resistance and back onto a more sustainable track of development. Although this pragmatic striving for political sustainability was unable to save the dynasty from ultimate collapse, it represented a durable and constructive approach to the compounding problems facing the late Qing regime and helped sustain it for another century.

The Routledge Handbook of Chinese Citizenship Zhonghua Guo, 2021-11-29. Two assumptions prevail in the study of Chinese citizenship: one holds that citizenship is unique to the Western political culture and China has historically lacked the necessary conditions for its development; the other implies that China is an authoritarian regime that has always been subject to autocratic power in which citizens and citizenship play a limited role. This volume negates both assumptions. On the one hand, it shows that China has its own unique and rich experiences of the emergence, development, rights, obligations, acts, culture, education, and sites of citizenship, indicating the need to widen the scope of citizenship studies to include non-Western societies. On the other hand, it aims to show that citizenship has been a core issue running through China's political development since the modern period, urging scholars to bring citizenship into consideration in the study of Chinese politics. This Handbook sets a new agenda for citizenship studies and Chinese politics. Its clear, accessible style makes it essential reading for students and scholars interested in citizenship and China studies.

In *Hinterlands and Commodities: Place, Space, Time, and the Political-Economic Development of Asia over the Long Eighteenth Century*, well-known economic and social historians examine important questions concerning temporal and spatial relationships among central places, hinterlands, commodities, and political-economic developments in Asia and the Global Economy over the long eighteenth century. These timely essays engage hinterlands and commodities, providing novel foci on historical impacts, maritime trade, on political-economic developments involving place, space, and time in Asia, thereby furnishing historical background for current conditions. Gender in Motion Bryna Goodman, Wendy Larson, 2005-05-12. Bringing together the work of distinguished China historians, anthropologists, and literary and film scholars, *Gender in Motion* raises provocative questions about the diversity of gender practices during the late imperial society and the persistence and transformation of older gender ideologies under the conditions of modernity in China. While several studies have investigated gender or labor in late imperial and twentieth-century China, this book brings these two concepts together, asking how these two categories interacted and produced new social practices and theories. Individual chapters examine agricultural and urban work, travel within China, overseas study, polyandry, the acting profession, courtesan culture, female politicians, Maoist work culture, and the

boundaries of virtue and respectability Governing notions of the social order and interrelated constructions of gender changed radically in the modern era initially with the questioning of the imperial dynastic order and the creation of a Chinese republic in the early twentieth century later with the creation of a Communist government and most recently with China's political and cultural transformations in the post Mao era As ideas and practices of gender have changed the persistence of older rhetorical signs in the interstices of new political visions has complicated the social projects and understandings of modernity especially in terms of the creation of new public spaces new concepts of work and virtue and new configurations of gender Contributions by Madeleine Yue Dong Bryna Goodman Gail Hershatter Ellen R Judd Joan Judge Wendy Larson Susan Mann Kenneth L Pomeranz Tze Ian Deborah Sang Matthew H Sommer Luo Suwen Catherine Vance Yeh and Wang Zheng
