Unrefined David Singerman, 2025-09-04 A surprising look at how modern capitalism changed sugar from a natural food to a scientific commodity Sugar is everywhere in the western diet blamed for epidemics of obesity diabetes and other modern maladies Our addiction to sweetness has a long and unsavory history Over the past five hundred years sugar has shaped empires made fortunes for a few and brought misery for millions of workers both enslaved and free How did sugar become a defining modern food and an essential global commodity In *Unrefined* David Singerman recasts our thinking about this crucial substance in the history of capitalism Before the nineteenth century sugar's value depended on natural qualities its color its taste where it was grown and who had made it But beginning around 1850 a combination of plantation owners industrialists and scientists set out to redefine sugar itself Deploying the tools and rhetoric of science they transformed not just how sugar was produced or traded but even how people thought about it By changing sugar into a pure chemical object these forces stripped power from workers and enabled and obscured new kinds of fraud corruption and monopoly Taking us to unexplored spaces in the world of sugar from laboratories and docks to refineries and the halls of Congress Singerman illuminates dark intersections of the histories of corruption science and capitalism

The View from Vermont Blake A. Harrison, 2006 With its small native population proximity to major metropolitan areas and bucolic rural beauty Vermont was fated to be a tourist mecca forever associated in the popular imagination with maple syrup fall colors and ski bunnies Tourism for good and ill has always been the decisive factor in the conception of rural Vermont What is surprising however is the degree to which we have accepted this notion of rural Vermont as a somehow timeless entity Blake Harrison's rich and rewarding study instead presents the construction of Vermont's landscape as a complex and ever changing dynamic informed by progressive modernist and reformist thought competing views of economic expansion rural and urban prejudice and social exclusion and more recently by land use planning and environmentalism This broad based study includes the early history of Vermont tourism the concomitant abandonment of farms with the rise of the summer home the creation of an unspoiled Vermont from billboards at least the impact of Vermont's ski industry on tradition bound tourism and later efforts to legislate growth and protect an increasingly static ideal of a rural Vermont While grounded within a specific Vermont view Harrison has much to contribute to broader studies of rural places tourism and landscapes in American culture His analysis of how physical landscapes affect and are affected by our imagined landscape and the insight afforded by his juxtaposition of leisure and labor will deeply inform our understanding of rural tourist landscapes for years to come This is a truly interdisciplinary work that will satisfy and

Gregg, Brian Donahue, 2011-01-01 From Thomas Jefferson's Monticello to Michelle Obama's White House organic garden the image of America as a nation of farmers has persisted from the beginnings of the American experiment In this rich and evocative collection of agrarian writing from the past two centuries writers from Hector St Jean de Crevecoeur to Wendell Berry reveal not only the great reach and durability of the American agrarian ideal but also the ways in which society has contested and confronted its relationship to agriculture over the course of generations Drawing inspiration from Virgil's agrarian epic poem *Georgics* this collection presents a complex historical portrait of the American character through its relationship to the land From the first European settlers eager to cultivate new soil to the Transcendentalist utopian and religious thinkers of the nineteenth century American society has drawn upon the vision of a pure rural life for inspiration Back to the land movements have surged and retreated in the past centuries yet provided the agrarian roots for the environmental movement of the past forty years Interpretative essays and a sprinkling of illustrations accompany excerpts from each of these periods of American agrarian thought providing a framework for understanding the sweeping changes that have confronted the nation's landscape Catalog of Copyright Entries. Albert Folch, 2025 How the World Flows acts like a microscope that pulls the reader into the barely noticeable Lilliputian world of fluids at small scales the microfluidic world and answers the question What is microfluidics in non technical language Microfluidics is the field of science that studies fluids constrained to spaces that are smaller than one millimeter wide and by extension the engineering field which builds devices that exploit the unique properties of fluids at these scales Author Albert Folch explores this micro science which has inspired engineers to build devices such as engines spray cans ballpoint pens inkjet and 3D printers pregnancy and Covid tests glucometers asthma nebulizers kidney dialysis machines and DNA analyzers This book also shows that many processes essential to life on Earth such as the formation of raindrops the rise of sap in plants and the percolation of water through soil are all microfluidic marvels It examines how our cells breathe feed and fight diseases through small capillaries Many ancient human inventions ranging from soaps and sauces to the candle wick the gauze and the ink brush rely on microfluidics but the size of the fluid interactions in these systems natural and human made has prevented most people from appreciating their inner workings Through engaging and digestible stories Folch takes a lens to this tiny science and demonstrates how big a role microfluidics play in life as we know it **Tapping**

Products in the United States Eric T. Jones, Rebecca Jean McLain, James F. Weigand, 2002 A quiet revolution is taking place in America's forests. Once seen primarily as stands of timber, our woodlands are now prized as a rich source of a wide range of commodities from wild mushrooms and maple sugar to hundreds of medicinal plants whose uses have only begun to be fully realized. Now as timber harvesting becomes more mechanized and requires less labor, the image of the lumberjack is being replaced by that of the forager. This book provides the first comprehensive examination of nontimber forest products (NTFPs) in the United States, illustrating their diverse importance, describing the people who harvest them, and outlining the steps that are being taken to ensure access to them. As the first extensive national overview of NTFP policy and management specific to the United States, it brings together research from numerous disciplines and analytical perspectives such as economics, mycology, history, ecology, law, entomology, forestry, geography, and anthropology in order to provide a cohesive picture of the current and potential role of NTFPs. The contributors review the state of scientific knowledge of NTFPs by offering a survey of commercial and noncommercial products, an overview of uses and users, and discussions of sustainable management issues associated with ecology, cultural traditions, forest policy, and commerce. They examine some of the major social, economic, and biological benefits of NTFPs while also addressing the potential negative consequences of NTFP harvesting on forest ecosystems and on NTFP species populations. Within this wealth of information are rich accounts of NTFP use drawn from all parts of the American landscape, from the Pacific Northwest to the Caribbean. From honey production to a review of nontimber forest economies still active in the United States, such as the Ojibway harvest of plants recounted here, the book takes in the whole breadth of recent NTFP issues, including ecological concerns associated with the expansion of NTFP markets and NTFP tenure issues on federally managed lands. No other volume offers such a comprehensive overview of NTFPs in North America. By examining all aspects of these products, it contributes to the development of more sophisticated policy and management frameworks for not only ensuring their ongoing use but also protecting the future of our forests.

What Is Agriculture For? Paul B. Thompson, Professor Emeritus, Department of Philosophy, Paul B. Thompson, 2025-08-15 The leading idea for this book were developed through lectures including The Harold Stoner Lectures at California Lutheran University and the Tarım ve Gıda Etigi Kongresi Uluslararası Katılımlı at the University of Ankara both in 2017 as well as the 2018 Parliament of World Religions. I would like to thank my audiences at these events most especially for the encouragement I received. I also presented papers summarizing aspects of the research at the European Society for Agriculture and Food Ethics, the Society for Philosophy and Technology, and Asia Pacific Society for Agriculture and Food Ethics. A book chapter presenting the basic themes of Chapter 4 appeared in *Contested Sustainability Discourses in the Agrifood System*, D. Constance J. Konefal and M. Hatanaki, Eds., London 2018, Earthscan, pp. 42-58. The section "How Philosophers Approach Ethics" from the Introduction is a lightly edited reprint of a similar section in Paul B. Thompson, *From Field to Fork: Food Ethics for Everyone*, New York 2015, Oxford University Press. Provided by publisher.
