The Ecological Transition Cultural Anthropology And Human Adaptation:

The ecological transition John William Bennett, **The Ecological Transition** John W. Bennett, 2017 Written during the height of the ecology movement *The Ecological Transition* is a stunning interdisciplinary work It combines anthropology ecology and sociology to formulate an understanding of cultural environmental relationships While anthropologists have been studying relationships between humans and the physical environment for a very long time only in the last thirty years have questions inherent in these relationships broadened beyond description and classification For example the concept of environment has been extended beyond the physical into the social Although anthropologists have adopted many of the concepts that Bennett develops in the book he also feels that the central issues have never been addressed either by anthropologists or by people in related disciplines The most important of these in Bennett's opinion is the failure to incorporate a respect for the environmental in contemporary culture which would allow making exceptions in certain human practices in order to protect the environment His point in *The Ecological Transition* is that a basic cultural change in modern civilization is necessary to achieve this end Both a theoretical and a practical work *The Ecological Transition* emphasizes the relationships between human culture the physical environment technology and social policy *The Ecological Transition* is a challenging volume that makes us face the consequences of human behavior in the modern world its effect on pollution natural resources agriculture the economy and population to name just a few areas The book remains a significant contribution to the discourse on social economic and environmental problems While the book was first published in 1976 it still reads as a contemporary tract Provided by publisher *The Ecological Transition* John William Bennett, 1976-01-01

Environment and Culture Irwin Altman, Joachim F. Wohlwill, 1980-04-30 Following upon the first two volumes in this series which dealt with a broad spectrum of topics in the environment and behavior field ranging from theoretical to applied and including disciplinary interdisciplinary and professionally oriented approaches we have chosen to devote subsequent volumes to more specifically defined topics Thus Volume Three dealt with Children and the Environment seen from the combined perspective of researchers in environmental and developmental psychology The present volume has a similarly topical coverage dealing with the complex set of relationships between culture and the physical environment It is broad and necessarily eclectic with respect to content theory methodology and epistemological stance and the contributors to it represent a wide variety of fields and disciplines including psychology geography anthropology economics and environmental design We were fortunate to enlist the collaboration of Amos Rapoport in the organization and editing of this volume as he brings to this task a particularly pertinent perspective that combines anthropology and architecture Volume Five of the series presently in preparation will cover the subject of behavioral science aspects of transportation Irwin Altman Joachim F Wohlwill ix Contents Introduction 1 CHAPTER 1 CROSS CULTURAL ASPECTS OF ENVIRONMENTAL DESIGN AMOS RAPOPORT Introduction 7 Culture 9 Environmental Design 10 The Relationship of Culture and Environmental Design

Human Ecology As Human Behavior John William Bennett, Human interaction with the natural environment has a dual character By turning increasing quantities of natural substances into physical resources human beings might be said to have freed themselves from the constraints of low technology survival pressures However the process has generated a new dependence on nature in the form of complex socionatural systems as Bennett calls them in which human society and behavior are so interlocked with the management of the environment that small changes in the systems can lead to disaster Bennett s essays cover a wide range from the philosophy of environmentalism to the ecology of economic development from the human impact on semi arid lands to the ecology of Japanese forest management This expanded paperback edition includes a new chapter on the role of anthropology in economic development Bennett s essays exhibit an underlying pessimism if human behavior toward the physical environment is the distinctive cause of environmental abuse then reform of current management practices offers only temporary relief that is conservationism like democracy must be continually reaffirmed Clearly presented and free of jargon Human Ecology as Human Behavior will be of interest to anthropologists economists and environmentalists

The Earth as Transformed by Human Action B. L. Turner, William C. Clark, Robert W. Kates, John F. Richards, Jessica T. Mathews, William B. Meyer, 1993-01-29 The Earth as Transformed by Human Action is the culmination of a mammoth undertaking involving the examination of the toll our continual strides forward technical and social take on our world The purpose of such a study is to document the changes in the biosphere that have taken place over the last 300 years to contrast global patterns of change to those appearing on a regional level and to explain the major human forces that have driven these changes The first section deals strictly with the major human forces of the past 300 years and the second is a detailed account of the transformations of the global environment wrought by human action The final section examines a range of perspectives and theories that purport to explain human actions with regard to the biosphere
