Sports and Physical Exercise in Early Modern Culture

Rebekka von Mallinckrodt, Angela Schattner, 2017-05-15 It is often assumed that a recognisably modern sporting culture did not emerge until the eighteenth century The plethora of physical training and games that existed before 1700 tend to fall victim to rigid historical boundaries drawn between modern and pre modern sports which are concerned primarily with levels of regulation organization and competitiveness Adopting a much broader and culturally based approach the essays in this collection offer an alternative view of sport in the early modern period Taking into account a variety of competitive as well as non competitive forms of sport physical training and games the collection situates these types of activities as institutions in their own right within the socio cultural context of early modern Europe Treating the period not only as a precursor of modern developments but as an independent and formative era the essays engage with overlooked topics and sources such as court records self narratives and visual materials and with contemporary discussions about space gender and postcolonial studies By allowing for this increased contextualization of sport the collection is able to integrate it into more general historical questions and approaches The volume underlines how developments in early modern sport influenced later developments whilst at the same time being thoroughly shaped by contemporary notions of the body status and honour These notions influenced not only the contemporary sporting fashion but the adoption of sports in elite education the use of sports facilities training methods and modes of competition thus offering a more integrated idea of the place of sport in early modern society

Affect Theory and Comparative Education Discourse Irving Epstein,2019-07-11 What does educational policy making and institutional practice entail in an era of globalization Global interactions challenge conventional assumptions governing the certainty of geographical boundedness simplistic notions of citizenship and identity fixed notions of time space and movement and clear distinctions between economic modes of production and consumption Irving Epstein argues that conventional educational institutions and the policies that support them tend to ignore such anxiety by affirming a belief in educational modernism to the exclusion of other possibilities What is missing in most of these analyses is an appreciation for the role of affect in determining how our encounters with these

practices become significant and how our efforts to find meaning in those policies and practices lead to their acceptance or rejection This book is the first application of affect theory to comparative education themes and shows how it can help to form a more robust discussion of the policy making process and the popular reactions to it After discussing the key concepts associated with affect theory he presents a total of six case studies Three of the cases depict relationships between educational cultural and social organizations whose purposes conflict with one another but whose presence is indicative of a loss of faith in the efficacy of public schooling Three of the cases are illustrative of an even greater systematic rejection of educational institutional aim and purpose

Routledge Handbook of Sport, Leisure, and Social Justice Stefan Lawrence, Joanne Hill, Rasul Mowatt, 2024-05-23

This is the first book to explore in breadth and in depth the complex intersections between sport leisure and social justice. This book examines the relations of power that produce social inequalities and considers how sport and leisure spaces can perpetuate those relations or act as sites of resistance and makes a powerful call for an activist scholarship in sport and leisure studies. Presenting original theoretical and empirical work by leading international researchers and practitioners in sport and leisure, this book addresses the central social issues that lie at the heart of critical social science including racism, sexism, homophobia, transphobia, ableism, religious persecution, socio-economic deprivation and the climate crisis and asks how these issues are expressed or mediated in the context of sport and leisure practices. Covering an incredibly diverse range of topics and cases including sex testing in sport, sport for refugees, pedagogical practices in physical education, community sport development, events and human rights and athlete activism, this book also surveys the history of sport and social justice research as well as outlining theoretical and methodological foundations for this field of enquiry. The Routledge Handbook of Sport, Leisure and Social Justice is an indispensable resource for any advanced student, researcher, policymaker, practitioner or activist with an interest in the sociology, culture, politics, history, development, governance, media and marketing and business and management of sport and leisure.

Pitter, David L. Andrews, Joshua I. Newman, 2022-02-21. Sociocultural Issues in Sport and Physical Activity explores the intersections between modern physical activity and society. Sociocultural Issues in Sport and Physical Activity explores contemporary topics such as reducing disparities in education and income, increasing socioeconomic diversity in communities, the medicalization of fitness, the rise of cosmetic fitness, the promotion of physical activity as a requirement for health and the globalization of the fitness industry. The text includes the following features to enhance student engagement: Chapter objectives help students achieve their learning goals; Key points and terms to highlight important information throughout the text; Active Bodies sidebars that offer context for concepts presented in the chapter and provide examples and applications; Discussion questions that provide opportunities to reflect on chapter topics. Part I of Sociocultural Issues in Sport and Physical Activity examines political, educational, media and economic institutions that influence the relationship between society and physical activity. Part II explores how an individual's race, gender, social class and ability are interpreted through a social lens. Part III of the text discusses the process of developing healthy populations as well as promoting public health and body positivity. During more than forty years Bruce Kidd has combined careers as an internationally ranked athlete coach sports administrator professor and dean with critical scholarly and popular writing about sport often on the issues in which he has been directly involved Frequently called the conscience of Canadian sport he defines his perspective as that of critical support while he can be savage about the inequalities and abuses of power in contemporary sport he seeks to reform sports so that many more people can enjoy their potential benefits This book provides a sampling of Professor Kidds scholarly writing The issue begins with Kidds reflection on the ways in which sport is constituted by society and a lifetime of simultaneous scholarship and intervention The rest of the issue is organized around three themes the Canadian sport system the Olympic Movement and his recovery projects historical writing that brought long forgotten earlier initiatives and episodes back into public understanding In each case Kidd provides a brief introduction of 1000 1500 words that sets the context for the original article and provides an update on the subject matter This book was previously published as a special issue of Sport in Society
