Science of Swimming Faster Scott A. Riewald, Scott A. Rodeo, 2015-06-25. In a sport where victory is often determined by a fraction of a second, it's obvious why one of the most sought-after secrets is how to swim faster. However, as the world's most renowned coaches, athletes, trainers, and researchers know, there is no secret—just science. *Science of Swimming Faster* is a remarkable achievement: one that embraces, explains, and applies the latest science and research that has and continues to set new performance benchmarks in the sport. It is a one-of-a-kind resource: an easily understood repository of swimming research; insights distilled from great sport and exercise scientists, coaches, and swimmers; a do-it-right reference for a host of techniques and tactics; the most credible and widely used training principles and programs; an analysis identifying key factors contributing to elite and world record swimming performance; an insider's access to the strategies for training, tapering, fueling, recovery, and mental preparation being used with some of the world's most successful swimmers. With editors Scott Riewald and Scott Rodeo and a who's-who list of international experts on the sport, *Science of Swimming Faster* offers you an unprecedented wealth of advanced yet accessible information on excelling in the sport.

Science of Triathlon Training and Competition Glenn P. Town, 1985.

Coaching Science Terry McMorris, Tudor Hale, 2006-08-30. Coaching Science and Coaching Studies courses are appearing in increasing numbers in many universities. The textbooks used in most of these courses are either theoretically based sports science texts or practically based coaching books. The former are generally lacking in application, while the latter rarely have any scientific input. The reader is therefore left to make the links themselves. *Coaching Science* will bridge that gap, covering both theory and practice and most important, showing how theory informs practice. The book will be multi- and to some extent interdisciplinary, as it is not possible to examine the interaction between coach, performer, and task from a single discipline perspective. Each chapter will include overviews of the main theories, but the bulk of the material will be concerned with how such theories can be applied in practice. Good and frequent use of examples will be provided. Throughout, the student will be given problems to solve. At the end of each chapter, there will be revision notes, recommended readings, and questions on chapter content.
