Spot Gardens:

Spot Gardens Robert Atkinson, 1973-07 *The Urban Garden City* Sandrine Glatron, Laurence Granchamp, 2018-03-24

This book provides an interdisciplinary overview of the role of gardens in cities throughout different historical periods. It shows that thanks to various forms of spatial and social organisation, gardens are part of the material urban landscape, biodiversity, symbolic and social shape, and assets of our cities and are increasingly becoming valued as an order to follow. Gardens have long been part of the development of cities serving different purposes through the ages: shaping neighborhoods to promote health or hygiene, introducing aesthetic or biological elements, gathering the citizens around a social purpose, and providing food and diversity in times of crisis. Highlighting examples that can serve as the basis for comparisons, the chapters offer a brief panorama of experiences and models of gardens in the city in the European context and in various periods of history while also discussing issues related to garden cities, urban agriculture, and community gardens. The contributors are university staff from various disciplines in the human and life sciences in discourse with other academics but also with practitioners who are interested in experiences with urban gardens and in promoting an awareness of their spatial, social, and philosophical goals throughout history. The book will appeal to urban geographers, sociologists, and historians but also to urban ecologists dealing with ecosystem services, biodiversity, and sustainable development in cities. From a more operational standpoint, landscape planners and architects are sure to find many of the projects enlightening and inspirational.

Magical Miniature Gardens & Homes Donni Webber, 2016-11. Celebrate the cute, tiny, magical and whimsical world of fairy gardens using this resourceful and inspiring book as the guide. Donni Webber, crafter, fairy gardening guru, and creator of FairyGardens.com, takes readers on a journey to build unique gardens, houses, and accessories for fairies. The garden designs are low cost and low care, highlighting common, long-lasting plants. The accessories and furniture projects are easy to make, come together quickly, and use natural materials or commonly found craft supplies. The playful and imaginative trend of miniature fairy gardening caught fire in the craft world several years ago and it has only grown in popularity. It's the quick and easy and super cute way to become a gardener. These gardens are a big hit with kids who love to imagine the magical creatures that enjoy the garden when the kids are asleep or away from home. Plus, the gardens make adorable home decorations and gifts for adults that can fit on an end table, desk, or bookshelf. Our book is a new offering on the market with easy beginner gardens and accessories as well as more unique themes like using a gourd to create a Gaudy Gnome Home, complete with mossy windows, wood round steps, a burlap broom, a flowerpot chimney, and more. The theme of magic and enchantment will run throughout the book in Donni's engaging tone of writing and photography. [Spot Gardens](#) Robert E. Atkinson, 1973 **Sweet Spots** Teresa A. Toulouse, Barbara C. Ewell, 2018-05-17. Contributions by Carrie Bernhard, Scott Bernhard, Marilyn R. Brown, Richard Campanella, John P. Clark, Joel Dinerstein, Pableaux Johnson, John P. Klingman, Angel Adams Parham, Bruce Boyd Raeburn, Ruth Salvaggio, Christopher Schaberg, Teresa A. Toulouse, and Beth Willinger. Much has been

written about New Orleans's distinctive architecture and urban fabric as well as the city's art literature and music. There is however little discussion connecting these features. Sweet Spots, a title drawn from jazz musicians' name for the space in between performers and dancers where music best resonates, provides multiple connections between the city's spaces, its complex culture, and its future. Drawing on the late Tulane architect Malcolm Heard's ideas about interstitial spaces, this collection examines how a variety of literal and represented in between spaces in New Orleans have addressed race, class, gender, community, and environment. As scholars of architecture, art, African American studies, English history, jazz philosophy, and sociology, the authors incorporate materials from architectural history and practice, literary texts, paintings, drawings, music, dance, and even statistical analyses. Interstitial space refers not only to functional elements inside and outside of many New Orleans houses, high ceilings, hidden staircases, galleries, and courtyards, but also to compelling spatial relations between the city's houses, streets, and neighborhoods. Rich with visual materials, Sweet Spots reveals the ways that diverse New Orleans spaces take on meanings and accrete stories that promote certain consequences both for those who live in them and for those who read such stories. The volume evokes, preserves, criticizes, and amends understanding of a powerful and often missed feature of New Orleans's elusive reality.

How to Spot Butterflies, Patricia Sutton, Clay Sutton, 1999. In a recent article, the New York Times Magazine described butterfly watching as the fastest growing segment of nature recreation. Little wonder: butterflies are beautiful, exotic, interesting, and observable by anyone, virtually anywhere, young or old, urban or rural. Consummate teachers, the Suttons use the same easy-to-understand style that has made both of their previous books in the How to Spot series bestsellers. Taking up where field guides leave off, they reveal which habitats are sure to hold large butterfly populations and which specific host plants attract butterflies. They address how to use binoculars and share the secrets of how to approach a
