### **Spouse Abuse A Treatment Program For Couples:**

Treating Couples Gerald R. Weeks, 2013-05-24 In some ways the development of the theory and practice of marital therapy seems like a relative newcomer to those clinicians who practice systems therapy. Most of the books in the field stress the total family as the unit of treatment in terms of understanding the dynamics of family interactions and intervention techniques. For the past 15 or 20 years clinicians interested in systems work sought training in family therapy programs and at family therapy workshops. This training led to a dramatic shift in the practice of psychotherapy away from the individual as the unit of treatment to the family. Much less emphasis has been given to the marital dyad or couple as the unit of treatment.

Handbook of Domestic Violence Intervention Strategies Albert R. Roberts, 2002-03-28 Public awareness regarding the life threatening nature and intense traumatic impact of domestic violence has substantially increased in the past decade. At the same time dramatic changes have taken place regarding criminal justice and social work policies and practices applied to domestic violence intervention. And while the prevalence of domestic violence has declined slightly, national estimates still indicate that every year approximately eight million women are abused, battered, stalked or killed by their husbands, boyfriends and other intimate partners. Featuring cutting edge research and expert intervention strategies, the Handbook of Domestic Violence Intervention Strategies: Policies, Programs and Legal Remedies is designed to prepare professionals to swiftly and compassionately meet the multiple needs of women and children who have suffered from domestic violence. This original and indispensable volume focuses on the numerous advances in legal remedies, program developments, treatment protocols and multidisciplinary perspectives. It is a comprehensive guide to the latest research, public policies and legal and criminal justice responses covering federal and state legislation as well as trends in police and court responses to domestic violence. This is the first book to include court based technology developments and new research related to the duration and intensity of woman battering. Highlighting actual cases and promising programs, the handbook also addresses important social work issues including risk assessment protocols, a new five level continuum of woman battering, intervention methods and treatment models. The book also examines the myriad legal issues and health problems facing the most neglected and vulnerable battered women. Written by expert practitioners and leading scholars in the field, the book's 23 chapters provide rich insights into the complexities and challenges of addressing domestic violence. This timely and definitive handbook is recommended for students, clinicians, policy makers and researchers in the fields of social work, victim services, criminal justice, hospital administration, mental health, counseling, public health, pastoral counseling, law enforcement. In fact, this volume is a critical resource for all helping professionals who are assisting abused women in escaping and remaining free from violent relationships.

Handbook of Prescriptive Treatments for Adults Robert T. Ammerman, Michel Hersen, 2013-11-11 This book could not have been conceptualized or published 20 years ago. Indeed, it is

doubtful that we could have organized the material for this handbook 10 years ago Over the last 20 years however the painstaking efforts of many clinical researchers working with a variety of resistive psychopathologies have resulted in specific psychotherapies and pharmacotherapies that are effective with a significant proportion of patients at least for some of the disorders Much clinical research remains to be carried out in the forthcoming decades But now that we are nearing the 21st century at least some statement about efficacy can be made In 1967 Gordon Paul succinctly stated that the ultimate goal of treatment outcome research is to determine What treatment by whom is most effective for this individual with that specific problem and under which set of circumstances p 111 At that time empirical evaluations of psychosocial and pharmacologic treatments were few and far between Methodological strategies for determining treatment effectiveness were also in the formative stage as exemplified by introduction of control groups that received inactive interventions i e placebo and the relatively recent practice of comparing two or more treatments in addition to placebo In the almost three decades since Paul's oft quoted dictum both the quantity and the quality of treatment outcome research with adults have increased dramatically
