**Contemporary Chinese Discourse and Social Practice in China** Linda Tsung, Wei Wang, 2015-10-09. Significant socio-political changes in China have had great impact on Chinese discourse. Changes to the discourse have become an increasing focus of scholarship. This book examines contemporary Chinese discourse and social practice in China with a focus on the role that language plays in the ongoing transformation of Chinese society. With a view to producing new insights into the interdependence between discourse and social practice, this volume explores how discourse has been changing in a context-dependent way, how social practice can lead to shifts in the use of discourse, and how identities and attitudes are constructed through language use. Largely based on empirical studies, this book indicates that Chinese discourse has not only been an integral part of social change but also Chinese discourse itself is changing, reflecting ideologies, values, attitudes, identities, and social practice. The book is a great resource for scholars in diverse disciplinary studies, including linguistics, communication, education, media, and political studies concerning contemporary China.
