**Working with Women Offenders in the Community** Rosemary Sheehan, Gill McIvor, Chris Trotter, 2010-12-21 Contributions to this book challenge policy makers and corrections systems to concentrate on community provision for women offenders and resist popular calls for more punitive responses to all offenders. Women included. Contributors come from a wide range of countries including Australia, Canada, UK and USA. They argue that the criminogenic lens applied to women's offending must be gender responsive if systems are to be successful at addressing the disadvantage and risk associated with offending behaviour.

**Internet Censorship and Regulation Systems in Democracies: Emerging Research and Opportunities** Koumartzis, Nikolaos, Veglis, Andreas, 2020-05-08 As the internet has been regulated from its conception many widespread beliefs regarding internet freedom are actually misconceptions. Additionally there are already two main categories of internet regulation systems in use: the open and the silent IRSs. Unexpectedly the former are quite popular among authoritarian regimes while the latter are implemented mainly in Western democracies. Many IT experts and media analysts criticize Western governments' choice to use a silent IRS expressing their fear that this could set a dangerous precedent for the rest of the democratic countries around the world. New regulation systems must be developed and implemented that are more acceptable to the general public.

**Internet Censorship and Regulation Systems in Democracies: Emerging Research and Opportunities** is an essential reference source that discusses the phenomenon of internet regulation in general and the use of internet regulation systems (IRSs) by authoritarian regimes and Western democracies and proposes a blueprint for the development and implementation of a fair internet regulation system (FIRS) using original research conducted in seven countries from 2008 to 2017. The book also considers the function of a fair internet regulation system in terms of maximizing its effectiveness keeping the implementation cost low and increasing the probability of acceptance by each country's general public. Featuring research on topics such as governmental control, online filtering and public opinion, this book is ideally designed for researchers, policymakers, government officials, practitioners, academicians and students seeking coverage on modern internet censorship policies within various international democracies.
