The country-of-origin affect on perception of services Nils Peters, 2011-10-04 Master's Thesis from the year 2011 in the subject Business economics Business Management Corporate Governance grade Sehr gut The University of Surrey School of Management course Business Administration language English abstract Today the service sector contributes to a major part of the GDP of the most developed countries while the share of services of the total export of these countries is comparable low This constitutes certain challenges for the internationalisation of services With regard to the use of country of origin effects COO the special service characteristics create challenges for service companies e.g. by the inseparability of service provision and consumption When decisions on the market entry options are made and local staff

is favoured to expatriate staff incongruence in the COO facets occurs which is difficult to hide Based on the research on products this might reduce COO s positive effects on service consumers quality expectations ESQ In this context the question arises whether information on training in the company s home country CTI can reduce the aforementioned negative effect In order to examine the existence of these relationships an online provided self administered experiment was created Using a non probability sample of 100 Germans respondents were asked to rate two different service examples with regard to the ESQ In each example the country of the person providing the service CPI was manipulated to be congruent as well as incongruent to the company s origin In addition the CTI was added to incongruent service examples
