

TATHAM MOUND SITE

Discovered in 1984, the excavation of this mound just north of Tampa Bay uncovered the remains of more than 70 people who may have died as a result of European disease introduced by the de Soto expedition. At least two of the human bones display wound wounds. One native woman was discovered clutching a metal plate and small rolled tube made from Spanish armor. Colorful glass beads given as gifts to Florida's native peoples by the Spaniards allow archaeologists to identify the site as a place on or near the route of the de Soto expedition.

Lambert, 2000-02-09 Investigations of skeletal remains from key archaeological sites reveal new data and offer insights on prehistoric life and health in the Southeast The shift from foraging to farming had important health consequences for prehistoric peoples but variations in health existed within communities that had made this transition This new collection draws on the rich bioarchaeological record of the Southeastern United States to explore variability in health and behavior within the age of agriculture It offers new perspectives on human adaptation to various geographic and cultural landscapes across the entire Southeast from Texas to Virginia and presents new data from both classic and little known sites The contributors question the reliance on simple cause and effect relationships in human health and behavior by addressing such key bioarchaeological issues as disease history and epidemiology dietary composition and sufficiency workload stress patterns of violence mortuary practices and biological consequences of European contact They also advance our understanding of agriculture by showing that uses of maize were more varied than has been previously supposed Representing some of the best work being done today by physical anthropologists this volume provides new insights into human adaptation for both archaeologists and osteologists It attests to the heterogeneous character of Southeastern societies during the late prehistoric and early historic periods while effectively detailing the many factors that have shaped biocultural evolution **Tatham Mound** Piers Anthony, 1994 Das abenteuerreiche Leben eines indianischen Geschichtenerz

Tatham Mound and the Bioarchaeology of European Contact Dale L. Hutchinson, 2006 This is the first systematic analysis of Tatham Mound one of the most important archaeological sites in Central Gulf Coast Florida Because it documents the earliest years of contact between the resident Native Americans of the area and European colonists Tatham Mound has provided archaeologists and bioarchaeologists with a wealth of direct and indirect evidence from the early contact period a rare occurrence in American archaeology Hutchinson examines the skeletal remains of more than 350 burials a few skeletons bearing evidence of trauma from European weapons as well as the European artifacts found within those burials Comparing the bioarchaeological evidence and scientific data with the historic accounts of the early Spanish explorers Hutchinson challenges the long held theory that novel pathogens caused the immediate demographic collapse of native societies at the inception of the European colonial era He argues that long term political social economic and biological changes in addition

to introduced epidemic disease all contributed to the decline of Florida's native populations Incorporating numerous maps of the burials from Tatham Mound a large number of photographs of the artifacts interred with them and thorough documentation of the burials with regard to both biology and mortuary practice Hutchinson interweaves archaeological and ethnohistoric evidence to present a complete picture of native and newcomer interaction in the region Hutchinson also places this evidence within a broader historical and scientific context so that it represents a local case study applicable to a very wide geographical area Relevant well beyond Central Gulf Coast Florida this volume will be useful to scholars in the fields of bioarchaeology physical anthropology archaeology history ethnohistory and Native American studies

Archaeology in America Linda S. Cordell, Kent Lightfoot, Francis McManamon, George Milner, 2008-12-30 The greatness of America is right under our feet The American past the people battles industry and homes can be found not only in libraries and museums but also in hundreds of archaeological sites that scientists investigate with great care These sites are not in distant lands accessible only by research scientists but nearby almost every locale possesses a parcel of land worthy of archaeological exploration Archaeology in America is the first resource that provides students researchers and anyone interested in their local history with a survey of the most important archaeological discoveries in North America Leading scholars most with an intimate knowledge of the area have written in depth essays on over 300 of the most important archaeological sites that explain the importance of the site the history of the people who left the artifacts and the nature of the ongoing research Archaeology in America divides its coverage into 8 regions the Arctic and Subarctic the Great Basin and Plateau the Great Plains and Rocky Mountains the Midwest the Northeast the Southeast the Southwest and the West Coast Each entry provides readers with an accessible overview of the archaeological site as well as books and articles for further research

Bioarchaeology of the Florida Gulf Coast Dale L. Hutchinson, 2019-12-09 In Bioarchaeology of the Florida Gulf Coast Dale Hutchinson explores the role of human adaptation along the Gulf Coast of Florida and the influence of coastal foraging on several indigenous Florida populations The Sarasota landmark known as Historic Spanish Point has captured the attention of historians and archaeologists for over 150 years This picturesque location includes remnants of a prehistoric Indian village and a massive ancient burial mound known to archaeologists as the Palmer Site that is one of the largest mortuary sites uncovered in the southeastern United States Interpreting the Palmer population numbering over 400 burials circa 800 A D by analyzing such topics as health and diet trauma and demography Hutchinson provides a unique view of a post Archaic group of Indians who lived by hunting collecting and fishing rather than by agriculture This book provides new data that support a general absence of agriculture among Florida Gulf Coast populations within the context of great similarities but also substantial differences in nutrition and health Along the central and southern Florida Gulf Coast multiple lines of evidence such as site architecture settlement density and size changes in ceramic technology and the diversity of shell and stone tools suggest that this period was one of emerging social and political complexity accompanied by population

growth The comparisons between the Florida Gulf Coast and other coastal regions illuminate our understanding of coastal adaptation while comparisons with interior populations further stimulate thoughts regarding the process of culture change during the agricultural era A volume in the Florida Museum of Natural History Ripley P Bullen Series Methods, Mounds, and Missions Ann S.
