Show Me, God! I AM John S. Carpenter MSW LCSW, 2022-11-29 Think how often you have heard these questions and negative comments I really have doubts that there is any God at all Is going to church every week really necessary Maybe just going on Easter and Christmas are good enough Prayers seem unanswered useless and a waste of time Are there really miracles or can they usually be explained when thoroughly investigated Why do we still talk about the Shroud of Turin when carbon 14 testing proved it was a fake Angels and heaven are just feel good fantasies to keep us from dreading death right Confession just seems like a way that Catholics can wipe the slate clean so they can go out and sin again Adoration is a waste of time just sitting there in church doing nothing for an hour What's the point John Carpenter returns with his fourth book to address these doubts and misinformed ideas in a dynamic and educational manner Utilizing defiant dialogues between an informed teacher and doubting students creates a lively debate that teaches truth and brings forth facts rather than opinions Responses to the misinformed students come from medical scientific professionally investigated and well documented events So if you have had any of these doubts or beliefs you need to join the classroom and follow along in these enlightening debates The actual truth may surprise you What you learn might brighten your own spiritual path

Why cant U teach me 2 read? Beth Fertig, 2025-10-16 Why cant U teach me 2 read is a vivid stirring passionately told story of three students who fought for the right to learn to read and won only to discover that their efforts to learn to read had hardly begun A person who cannot read cannot confidently ride a city bus shop take medicine or hold a job much less receive e mail follow headlines send text messages or write a letter to a relative And yet the best minds of American education cannot agree on the right way for reading to be taught In fact they can hardly settle on a common vocabulary to use in talking about reading As a result for a quarter of a century American schools have been riven by what educators call the reading wars and our young people have been caught in the crossfire Why cant U teach me 2 read focuses

on three such students Yamilka Alejandro and Antonio all have learning disabilities and all legally challenged the New York City schools for failing to teach them to read by the time they got to high school When the school system's own hearing officers ruled in the students' favor the city was compelled to pay for the three students now young adults to receive intensive private tutoring Fertig tells the inspiring heartbreaking stories of these three young people as they struggle to learn to read before it is too late At the same time she tells a story of great change in schools nationwide where the crush of standardized tests and the presence of technocrats like New York's mayor Michael Bloomberg and his schools chancellor Joel Klein have energized teachers and parents to question the meaning of education as never before And she dramatizes the process of learning to read showing how the act of reading is nothing short of miraculous Along the way Fertig makes clear that the simple question facing students and teachers alike How should young people learn to read opens onto the broader questions of what schools are really for and why so many of America's schools are faltering Why can't U teach me 2 read is a poignant vital book for the reader in all of us

Teaching to Learn Kenneth George Tobin, 2006 A recurrent trope in education is the gap that exists between theory taught at the university and praxis what teachers do in classrooms How might one bridge this inevitable gap if new teachers are asked to learn to talk about teaching rather than to teach In response to this challenging question the two authors of this book have developed coteaching and cogenerative dialoguing two forms of praxis that allow very different stakeholders to teach and subsequently to reflect together about their teaching The authors have developed these forms of praxis not by theorizing and then implementing them but by working at the elbow of new and experienced teachers students supervisors and department heads Coteaching which occurs when two or more teachers teach together supports learning to teach while improving student achievement Cogenerative dialogues are conversations among all those who have been present in a lesson they ensure that what was learned while coteaching is beneficial for all coteachers and learners Tobin and Roth describe the many ways coteaching and cogenerative dialogues are used to improve learning environments dramatically improving teaching and learning across cultural borders defined by race ethnicity gender

and language Teaching to Learn is written for science educators and teacher educators along the professional continuum new and practicing teachers graduate students professors researchers curriculum developers evaluation consultants science supervisors school administrators and policy makers Thick ethnographic descriptions and specific suggestions provide readers access to resources to get started and continue their journeys along a variety of professional trajectories
