Measurement Issues and Assessment for Teaching Quality Drew H. Gitomer, 2009 A comprehensive text that allows headteachers and school managers to monitor teacher quality

Teacher Quality 2.0 Frederick M. Hess, Michael Q. McShane, 2014 Debates over teacher quality are among the most heated exchanges in the education reform arena But while scholars and policy makers grapple with questions about teacher preparation compensation and evaluation the role of

teachers is changing In schools across the country educators are experimenting with new models for recruiting training and supporting teachers and are innovating strategies for deploying their talents through differentiated roles and the use of technology Most of the policy measures currently under consideration however are designed with a one size fits all approach Teacher Quality 2 0 argues that much cutting edge work in teacher quality is happening in nontraditional environments such as online or hybrid learning where teacher roles can be very specialized or in charter schools that are experimenting with new approaches to staffing The editors examine fruitful innovations taking place on the margins of the traditional education sector that promise to improve teacher quality in a more strategic way More flexible approaches to teacher quality the editors caution require vigilance against backward looking policies that bake in traditional assumptions about teachers roles The editors of this provocative volume have convened a diverse array of contributors to look ahead to explore these emerging practices and investigate how current research and policy initiatives may affect the next generation of innovation in teaching
