Mike Sharples, Thea van der Geest

The Electronic Word Democracy Technology And The Arts Macintosh Disks:

Binding Media Élika Ortega, 2025-03-04 Far from causing the death of the book the publishing industry's adoption of digital technologies has generated a multitude of new works that push the boundaries of literature and its presentation In this fascinating new work like Ortega proposes the notion of binding media a practice where authors and publishers fasten together a codex and electronic or digital media to create literary works in the form of hybrid print digital objects Examining more than a hundred literary works from across the Americas Ortega argues that binding media are not simply experimentations but a unique contemporary form of the book that effectively challenges conventional regional and linguistic boundaries Furthermore the book demonstrates that binding media have remained marginal in the publishing industry due to technological imperatives like planned obsolescence and commercial ones like replicability and standardization that run counter to these bespoke literary projects Although many binding media and other hybrid publishing initiatives have perished they've left behind a wealth of material collecting and tracing the residues of these foreshortened projects Ortega builds a fascinating history of hybrid publishing Ultimately this essential account of contemporary book history highlights the way binding media help illuminate processes of cultural hybridization that have been instigated by the expediency of globalized digital technologies and transnational dynamics

Hypertext 3.0 George P. Landow, 2006-02-10 From Intermedia to Microcosm Storyspace and the Web Landow offers information about the kinds of hypertext different modes of linking attitudes toward technology and the proliferation of pornography and gambling on the Internet He also includes new material on developing Internet related technologies

The New Writing Environment Mike Sharples, Thea van der Geest, 2012-12-06 Information technology is changing the way we write Special features such as outliners spelling checkers and graphic facilities have transformed word processors into document processors document processors have in turn integrated with other electronic resources such as e mail and the Internet to provide a complete writing environment The New Writing Environment examines the knowledge that is needed in order to develop use and evaluate computer based writing environments The emphasis is firmly on practical issues tasks performed by writers at work problems they encounter and documents they actually produce Writing is defined within a wide social and organisational context in order to give an accurate assessment of how the new technology affects the social and cooperative aspects of authorship The result is a wide ranging and comprehensive assessment of the relationship between writing and computers

American Educational Research Association Annual Meeting Program American Educational Research Association, 1994

The Software Encyclopedia, 1986

ICT, Pedagogy and the Curriculum Viv Ellis, Avril Loveless, 2013-01-11 This book explores the impact new information and communication technologies are having on teaching and the way children learn The book addresses key issues across all phases of primary and secondary education both in the UK and internationally ICT Pedagogy and the Curriculum looks at the relationship between ICT paradigms of teaching and learning and the way in which curriculum

subjects are represented Three principal areas are addressed the wider perception of ICT in society culture and schooling the challenges to pedagogy the way in which ICT not only supports learning and teaching but changes the nature of curriculum subjects The tensions between the use of technology to replicate traditional practices and the possibilities for transforming the curriculum and pedagogy are explored offering an original and distinctively critical perspective on the way in which we understand ICT in education It will be of interest to all primary and secondary teachers and those in initial teacher training who are concerned about current technology initiatives in education and how to respond to them
