Graphing Culture Change in North American Archaeology R. Lee Lyman,2021-06-10 Documentation analysis and explanation of culture change have long been goals of archaeology Scientific graphs facilitate the visual thinking that allow archaeologists to determine the relationship between variables and if well designed comprehend the processes implied by the relationship Different graph types suggest different ontologies and theories of change and particular techniques of parsing temporally continuous morphological variation of artefacts into types influence graph form North American archaeologists have grappled with finding a graph that effectively and efficiently displays culture change over time Line graphs bar graphs and numerous one off graph types were used between 1910 and 1950 after which spindle graphs displaying temporal frequency distributions of specimens within each of multiple artefact types emerged as the most readily deciphered diagram The variety of graph types used over the twentieth century indicate archaeologists often mixed elements of both Darwinian variational evolutionary change and Midas touch like transformational change Today there is minimal discussion of graph theory or graph grammar in introductory archaeology textbooks or advanced texts and elements of the two theories of evolution are still mixed Culture has changed and archaeology provides unique access to the totality of humankind s cultural past It is therefore crucial that graph theory construction and decipherment are revived in archaeological discussion

*Edwin Hubble* Gale E. Chrisitanson,2019-03-04 Edwin Hubble Mariner of the Nebulae is both the biography of an extraordinary human being and the story of the greatest quest in the history of astronomy since the Copernican revolution The book is a revealing portrait of scientific genius an incisive engaging history of ideas and a shimmering evocation of what we see when gazing at the stars Born in 1889 and reared in the village of Marshfield Missouri Edwin Powell Hubble star athlete Rhodes Scholar military officer and astronomer became one of the towering figures in twentieth century science Hubble worked with the great 100 inch Hooker telescope at California s Mount Wilson Observatory and made a series of discoveries that revolutionized humanity s vision of the cosmos In 1923 he was able to confirm the existence of other nebulae now known to be galaxies beyond our own Milky Way By the end of the decade Hubble had proven that the universe is expanding thus laying the very cornerstone of the big bang theory of creation It was Hubble who developed the elegant scheme by which the galaxies are classified as ellipticals and spirals and it was Hubble who first provided reliable evidence that the universe is homogeneous the same in all directions as far as the telescope can see An incurable Anglophile with a penchant for tweed jackets and English briars Hubble together with his brilliant and witty wife Grace Burke became a fixture in Hollywood society in the 1930s and 40s They counted among their friends Charlie Chaplin the Marx brothers Anita Loos Aldous and Maria Huxley Walt Disney Helen Hayes and William Randolph Hearst Albert Einstein a frequent visitor to Southern California called Hubble s work beautiful and modified his equations on relativity to account for the discovery that

the cosmos is expanding      Life in the Universe Joseph Seckbach, Julian Chela-Flores, Tobias Owen, François Raulin, 2012-12-06 The year 2003 was the 50th anniversary of the seminal experiment of Stanley Miller This was a unique opportunity for highlighting the current interest in this most interdisciplinary subject The leading space agencies the European Space Agency ESA as well as NASA the American Space Agency have planned missions that will elucidate some of the still unknown questions underlying research in the origin of life New results are surpassing our ability to keep well informed the reviews that we were presented at the Trieste meeting will bring the readers of this well documented and timely book up to date in this fast moving area An important component of the conference was the review of the Cassini Huygens mission due to arrive in the Saturn system just one year after the conference convened in Trieste There was particular interest in the status of the experiments that will take place inside the atmosphere of Titan the large satellite which is a testing ground for the theories and experiments in the field of chemical evolution The Jovian system is currently under study with the view of investigating the possibility of life underneath the frozen surface of the Galilean moon Europa the ESA mission Mars Express and Mars Odyssey received special attention Some of the world leaders in the field gathered in Trieste in September 2003 that was a most timely date for reviewing recent data and discussing the prospects of future research

**Scientific Literacy and the Myth of the Scientific Method** Henry H. Bauer, 1992 What is science Is social science a science Why are more and more so called scientific discoveries being exposed as outright frauds Henry Bauer tackles these and many more intriguing questions that are emerging from within the academic and scientific communities and attracting attention from the popular media and the general public Whether one is a specialist or generalist scientist or humanist thinker or activist it is important to understand the place of science and technology in modern life Popular views about the nature of science and scientific activity contain serious misconceptions that were discarded decades ago by most historians and philosophers of science The perpetuation of these misconceptions usually surface in the form of frustrating and unproductive discussions about everything from setting policy and defining technical matters to whether one individual s point of view is right because it is supported by scientific facts According to Bauer the most serious and widespread misconceptions are that science can be discussed as though all sciences share a great deal in common and as though the scientific method characterizes all sciences Science argues Bauer can be understood only if one recognizes it as a quest by fallible human beings who have evolved ways of interacting that help them gain relatively objective knowledge In other words science is a social activity not simply the result of impersonal methods Concern has recently arisen over the quality of American education and our declining scientific and research orientation Debates are emerging about what direction public universities should be taking as we head into the twenty first century Why and to what extent should society support basic scientific research What should everyone in a democratic society know about science This book will help readers come to an informed understanding about the place of science and technology in today s world      *Catalog of Copyright Entries. Marxist dialectic      **The Mathematical Experience, Study Edition** Philip Davis, Reuben Hersh, Elena Anne Marchisotto, 2011-10-27 Winner of the 1983 National Book Award a perfectly marvelous book about the Queen of Sciences from which one will get a real feeling for what mathematicians do and who they are The exposition is clear and full of wit and humor The New Yorker 1983 National Book Award edition Mathematics has been a human activity for thousands of years Yet only a few people from the vast population of users are professional mathematicians who create teach foster and apply it in a variety of situations The authors of this book believe that it should be possible for these professional mathematicians to explain to non professionals what they do what they say they are doing and why the world should support them at it They also believe that mathematics should be taught to non mathematics majors in such a way as to instill an appreciation of the power and beauty of mathematics Many people from around the world have told the authors that they have done precisely that with the first edition and they have encouraged publication of this revised edition complete with exercises for helping students to demonstrate their understanding This edition of the book should find a new generation of general readers and students who would like to know what mathematics is all about It will prove invaluable as a course text for a general mathematics appreciation course one in which the student can combine an appreciation for the esthetics with some satisfying and revealing applications The text is ideal for 1 a GE course for Liberal Arts students 2 a Capstone course for perspective teachers 3 a writing course for mathematics teachers A wealth of customizable online course materials for the book can be obtained from Elena Anne Marchisotto elena marchisotto csun edu upon request      **Conceptual Issues in Ecology** Esa. Saarinen, 2012-12-06 In this collection of essays some of the leading ecologists and philosophers discuss the foundations of ecology and evolutionary biology While large scale philosophical convictions and attitudes often direct the theorist's line of concrete action in data collection and in theory information the foundational convictions typically remain tacit and are seldom argued for The present collection aims to remedy this situation It brings together scholars representing different approaches in a joint effort to explicate and analyse some of the key issues underlying ecological theorizing be they conceptual epistemological or ontological The bulk of the present collection is reprinted from Synthese 43 1980 William C Wimsatt's paper Reductionistic Research Strategies and Their Biases in the Units of Selection Controversy is in turn reprinted from T Nickles ed Scientific Discovery Case Studies D Reidel 1980 It appears here with the kind permission of Prof Nickles The publisher's consent for the reprints has been in each case automatic The essays of Yrjö Haila and Olli Jarvinen and of Leigh M Van Valen appear here for the first time In bringing the present collection together as well as in editing the Synthese symposium on which it is based I have greatly benefited from the suggestions of Professors Marjorie Grene Olli Järvinen and Daniel Simberloff In addition to them I wish to thank all the contributors for their interest in this project

**Imagining Outer Space** Alexander C.T. Geppert, 2018-04-25 Imagining Outer Space makes a captivating advance into the cultural history of outer space and extraterrestrial life in the European imagination How was outer space conceived and

communicated What promises of interplanetary expansion and cosmic colonization propelled the project of human spaceflight to the forefront of twentieth century modernity In what way has West European astroculture been affected by the continuous exploration of outer space Tracing the thriving interest in spatiality to early attempts at exploring imaginary worlds beyond our own the book analyzes contact points between science and fiction from a transdisciplinary perspective and examines sites and situations where utopian images and futuristic technologies contributed to the omnipresence of fantasmatic thought Bringing together state of the art work in this emerging field of historical research the volume breaks new ground in the historicization of the Space Age

**Space, Time, and Aliens** Steven J. Dick, 2020-05-11 In this comprehensive and interdisciplinary volume former NASA Chief Historian Steven Dick reflects on the exploration of space astrobiology and its implications cosmic evolution astronomical institutions discovering and classifying the cosmos and the philosophy of astronomy The unifying theme of the book is the connection between cosmos and culture or what Carl Sagan many years ago called the cosmic connection As both an astronomer and historian of science Dr Dick has been both a witness to and a participant in many of the astronomical events of the last half century This collection of papers presents his reflections over the last forty years in a way accessible to historians philosophers and scientists alike From the search for alien life to ongoing space exploration efforts readers will find this volume full of engaging topics relevant to science society and our collective future on planet Earth and beyond

*Thinking about Evolution* Rama S. Singh, 2001 Originally published in 2001 this is the second of two volumes published by Cambridge University Press in honour of Richard Lewontin This second volume of essays honours the philosophical historical and political dimensions of his work It is fitting that the volume covers such a wide range of perspectives on modern biology given the range of Lewontin's own contributions He is not just a very successful practitioner of evolutionary genetics but a rigorous critic of the practices of genetics and evolutionary biology and an articulate analyst of the social political and economic contexts and consequences of genetic and evolutionary research The volume begins with an essay by Lewontin on Natural History and Formalism in Evolutionary Genetics and includes contributions by former students post docs colleagues and collaborators which cover issues ranging from the history and conceptual foundations of evolutionary biology and genetics to the implications of human genetic diversity

*The Evolution of Population Biology* Rama S. Singh, Marcy K. Uyenoyama, 2004-01-15 This 2004 collection of essays deals with the foundation and historical development of population biology and its relationship to population genetics and population ecology on the one hand and to the rapidly growing fields of molecular quantitative genetics genomics and bioinformatics on the other Such an interdisciplinary treatment of population biology has never been attempted before The volume is set in a historical context but it has an up to date coverage of material in various related fields The areas covered are the foundation of population biology life history evolution and demography density and frequency dependent selection recent advances in quantitative genetics and bioinformatics evolutionary case history of model organisms focusing on polymorphisms and

selection mating system evolution and evolution in the hybrid zones and applied population biology including conservation infectious diseases and human diversity This is the third of three volumes published in honour of Richard Lewontin     **The Victorian Novel** Harold Bloom,2004 Victorian England produces some the the greatest novelists in Western history including Charles Dickens Thomas Hardy and George Eliot Critical analysis focuses on the development of the Victorian novel through the second half of the 19th century
