The Lying Stones Of Marrakech:

The Lying Stones of Marrakech Stephen Jay Gould, 2000 Essays cover a wide range of topics including the nature of fossils evolution and biodiversity *The Lying Stones of Marrakech* Stephen Jay Gould, 2000 I have struggled harder and more explicitly than for anything else in my life as a writer to develop a distinctive and personal form of essay to treat great scientific issues in the context of biography and to do so not by the factual chronology of a life s sorrows and accomplishments a noble task requiring the amplitude of a full book but rather by the intellectual synergy between a person and the controlling idea of his life From the Preface Stephen Jay Gould s writing remains the modern standard by which popular science writing is judged Ever since the late 1970 s his monthly essay in NATURAL HISTORY and his full length books have bridged the yawning gap between science and wider culture In this fascinating new collection of essays Gould has once again applied biographical perspectives to the illumination of key scientific concepts and their history ranging from the origins of palaeontology to modern eugenics and generic engineering As always these essays brilliantly display his gift for colloquial and vivid explanation and include fascinating oddities from the natural world and the printed world **Stephen Jay Gould** Warren D. Allmon, Patricia Kelley, Robert Ross, 2009 Considered by many during his lifetime as the most well known scientist in the world Stephen Jay Gould left an enormous and influential body of work A Harvard professor of paleontology evolutionary biology and the history of science Gould provided major insights into our understanding of the history of life He helped to reinvigorate paleontology launch macroevolution on a new course and provide a context in which the biological developmental stages of an organism s embryonic growth could be integrated into an understanding of evolution This book is a set of reflections on the many areas of Gould s intellectual life by the people who knew and understood him best former students and prominent close collaborators Mostly a critical assessment of his legacy the chapters are not technical contributions but rather offer a combination of intellectual bibliography personal memoir and reflection on Gould s diverse scientific achievements The work includes the most complete bibliography of his writings to date and offers a multi dimensional view of Gould s life work not to be found in any other volume **The Richness of Life** Stephen Jay Gould, 2007 This spotlight on an extraordinary mind collects the most entertaining and enlightening writings by the beloved paleontologist evolutionary biologist and celebrant of the wonder of life 20 illustrations *LabOratory* Sandra Kaji-O'Grady, Chris L. Smith, 2024-02-06 An illustrated examination of laboratory architecture and the work that it does to engage the public recruit scientists and attract funding The laboratory building is as significant to the twenty first century as the cathedral was to the thirteenth and fourteenth centuries The contemporary science laboratory is built at the grand scales of cathedrals and constitutes as significant an architectural statement The laboratory is a serious investment in architectural expression in an attempt to persuade us of the value of the science that goes on inside In this lavishly illustrated book Sandra Kaji O Grady and Chris L Smith explore the architecture of modern life science laboratories and the work that it does to

engage the public recruit scientists and attract funding Looking at the varied designs of eleven important laboratories in North America Europe and Australia all built between 2005 and 2019 Kaji O Grady and Smith examine the relationship between the design of contemporary laboratory buildings and the ideas and ideologies of science Observing that every laboratory architect and client declares the same three aspirations to eliminate boundaries to communicate the benefits of its research programs and to foster collaboration Kaji O Grady and Smith organize their account according to the themes of boundaries expression and socialization For instance they point to the South Australian Health and Medical Institute s translucent envelope as the material equivalent of institutional accountability the insistent animal imagery of the NavarraBioMed laboratory in Spain and the Hillside Research Campus s mimicry of the picturesque fishing village that once occupied its site Through these and their other examples Kaji O Grady and Smith show how the architecture of the laboratory shapes the science that takes place within it

A History of Ambition in 50 Hoaxes Gale Eaton,2016-09-06 What do the Trojan Horse Piltdown Man Keely Motor Company and Ponzi Scheme have in common They were all famous hoaxes carefully designed and bolstered with false evidence The con artists in this book pursued a variety of ambitions making money winning wars mocking authority finding fame trading an ordinary life for a glamorous one but they all chose the lowest fastest road to get there Every hoax is a curtain and behind it is a deceiver operating levers and smoke machines to make us see what is not there and miss what is As P T Barnum knew you can short circuit critical thinking in any century by telling people what they want to hear Most scams operate on a personal scale but some have shaped the balance of world power inspired explorers to sail uncharted seas derailed scientific progress or caused terrible massacres A HISTORY OF AMBITION IN 50 HOAXES guides us through a rogue s gallery of hustlers liars swindlers imposters scammers pretenders and cheats In Gale Eaton s wide ranging synthesis the history of deception is a colorful tour with surprising insights behind every curtain Fountas Pinnell Level Z

Genuine Fakes Lydia Pyne,2019-08-08 Does an authentic Andy Warhol painting need to be painted by Andy Warhol Why do audiences feel outraged when they find out that scenes from their beloved blockbuster documentaries are staged Can people move past assuming that a diamond grown in a lab is a fake What happens when a forged painting or manuscript becomes more valuable than its original This is a book about genuine fakes the curious and complex objects that provoke these very sorts of questions Genuine fakes fall into the space between things that are real and things that are not whether or not we think that those things are authentic is a matter of perspective Unsurprisingly the world is full of genuine fakes full of things that defy simple categorisation From stories of audacious forgeries to feats of technological innovation historian Lydia Pyne explores how the authenticity of eight genuine fakes depends on their unique combinations of history science and culture The stories of art forgeries fake fossils nature documentaries synthetic flavours museum exhibits Maya codices and Palaeolithic replicas show that genuine fakes are both complicated and change over time Drawing from historical archives interviews museum exhibits and science fiction as well as her own research Pyne brings each genuine fake to life

through unexpected and often outrageous stories Genuine Fakes will make readers think about all the unreal things they encounter in their daily lives and why they invoke the reactions surprise wonder understanding or annoyance that they do
