calls the quicksand that is philosophy to approach slippage and breaking points through an interdisciplinary lens Pointing to an understanding of our largely social ills and extending William F Pinar's early work on currere in new and innovative directions this book will appeal to curriculum theorists education philosophers psychoanalysts and those with interests in the philosophy and theory of education **The British and Anglo-Irish Thing-Essay from 1701 to 2021** Daniel

Schneider,2023-09-29 While the it narrative the thing poem and thing theatre have been around for some time the essay which is often considered literature's fourth genre is still lacking its thing subgenre Yet particularly British and Anglo Irish literature display a long albeit so far implicit tradition of texts that can be categorised as thing essays Starting with Jonathan Swift's Meditation upon a Broomstick 1701 and continuing until today these texts draw broader insights from the contemplation of a material item of daily life This book provides the first theoretical conceptualisation of this genre Bringing elements from essay studies and the New Materialisms together it shows why the essay lends itself particularly well to literarisations of the personal relationships that people foster to everyday objects While the idiosyncrasies of each essay show the versatility of thing essays the study also seeks to unearth changing attitudes towards things and thus towards people's material surroundings in general throughout time In order to account for such synchronic and diachronic differences in thing essays this study develops a typology of three modes via which things can be approached essayistically In the book's second part this framework will be employed in close readings and historicisations of 14 thing essays from 1701 until 2021 Ranging from satire to sentimental writing from religion to consumerism from class to gender differences from feelings of nationality to exoticism from the French Revolution to Freud and from art to everyday life the stylistic and thematic broadness of these thing essays ultimately shows the multifarious connections between human life and materiality **Heinz Werner and**

Developmental Science Jaan Valsiner,2006-11-22 Heinz Werner 1890 1964 was one of the three key developmental psychologists of the 20th century along with Jean Piaget and Lev Vygotsky This book is a new exploration of Werner's ideas and their social contexts in Vienna in his student years in Hamburg up to 1933 followed by the years of transit as an immigrant to America at times of economic depression finally culminating in his establishment of the prominent Clark tradition in American psychology in the 1950s The book offers an in depth analysis of Werner's ideas as they were originally formulated in Vienna and Hamburg and how they were changed by North American influences Werner's pivotal role between European and American intellectual traditions is illuminated through the use of rich memories of his former students unique documents from Werner's personal library at Clark and analyses of links with other European traditions in philosophy and biological sciences The European period prior to 1933 in Werner's academic life is found to be definitive for Werner's contributions to science The ideas developed in his early career continued in the form of a productive empirical research program in the 1950s at Clark An analysis of the social intellectual climate of the development of psychology in America in the 1950s is a special feature of this book that will further enhance an understanding of Werner's unique contribution This

book will be of interest to developmental psychologists sociologists and historians of science philosophers practitioners working in special education and neuropsychology and for general readers interested in the history of ideas and life courses of scientists Musical Listening in the Age of Technological Reproduction Gianmario Borio,2016-04-29 It is undeniable that technology has made a tangible impact on the nature of musical listening The new media have changed our relationship with music in a myriad of ways not least because the experience of listening can now be prolonged at will and repeated at any time and in any space Moreover among the more striking social phenomena ushered in by the technological revolution one cannot fail to mention music s current status as a commodity and popular music s unprecedented global reach In response to these new social and perceptual conditions the act of listening has diversified into a wide range of patterns of behaviour which seem to resist any attempt at unification Concentrated listening the form of musical reception fostered by Western art music now appears to be but one of the many ways in which audiences respond to organized sound Cinema for example has developed specific ways of combining images and sounds and more recently digital technology has redefined the standard forms of mass communication Information is aestheticized and music in turn is incorporated into pre existing symbolic fields This volume the first in the series Musical Cultures of the Twentieth Century offers a wide ranging exploration of the relations between sound technology and listening practices considered from the complementary perspectives of art music and popular music music theatre and multimedia composition and performance ethnographic and anthropological research

Radical Assimilation in the Face of the Holocaust Tom Navon,2024-01-01 This book explores the confrontation of radically assimilated Jews with the violent collapse of their envisioned integration into a cosmopolitan European society which culminated during the Holocaust This confrontation is examined through the biography of the German speaking intellectual and prominent communist theoretician of the Jewish question Otto Heller 1897 1945 focusing on the tension between his Jewish origins and his universalistic political convictions Radical Assimilation in the Face of the Holocaust traces the development of Heller s position on the Jewish question in three phases how he grew up to become a typical Central European non Jewish Jew 1897 1931 how he became exceptional in that category by focusing his intellectual work on the Jewish question 1931 1939 and how he reacted to the persecution and murder of European Jewry as a member of the Resistance in occupied France and in Auschwitz 1939 1945 Breaking with the common portrayal of Heller as a self hating Jew Tom Navon argues instead that Heller came to lay the foundations for the groundbreaking recognition by communists of worldwide Jewish national solidarity **The Ideal World of Dictatorship** Stefan Wolle,2019
