Rashed Al Mahmud Titumir, 2023-06-15 *Why Agriculture Productivity Falls: The Political Economy of Agrarian Transition in Developing Countries* offers a new explanation for the decline in agricultural productivity in developing countries. Transcending the conventional approaches to understanding productivity using agricultural inputs and factors of production, this work brings in the role of formal and informal institutions that govern transactions, property rights, and accumulation. This more robust methodology leads to a comprehensive, well-balanced lens to perceive agrarian transition in developing countries. It argues that the existing process of accumulation has resulted in unsustainable agriculture because of market failures, the result of asymmetries of power, diseconomies of scale, and unstable property rights. The book covers the historical shifts in land relations, productivity, and class relations that have led to present-day challenges in sustainability. The result is arrested productivity growth. Agrarian transition should be understood in the context of the wider economic development in society, including how political settlement and primitive accumulation inhibited the kind of property rights that encourage growth. *Why Agriculture Productivity Falls* is a much-needed corrective to the traditional understanding because before we can increase productivity, we must understand the root causes of those challenges.
