The Making Of Intelligence

Anna Fiodorova

The Making Of Intelligence :

The Making of Intelligence Ken Richardson, 2000 Concepts of intelligence wield a powerful influence on research into the brain and on how individuals progress in society Yet remarkably there is still no agreed scientific consensus about what this concept means In this book the author looks at how intelligence has been characterized and measured in the past explores current trends in our understanding and uses the concept and predicts what form they will take in the future *The Theosophical Path* Katherine Augusta Westcott Tingley, 1921 [The Hierarchy of Intelligences](#) Valentin Matcas, 2015-09-03 You are a conscious intelligent living being yet you are more than an individual being since you are an entire living compound made of distinct living beings all forming you all contributing to your unique life and existence Because you are your trillions of living cells composing your body one after another And with each cell you are a zillion subcellular components forming you one molecule at a time and one cell near another designing or creating your life one fulfilment at a time and one moment of existence after another animating you from within in this manner from the smallest subcellular level Since this is who you are only at the physical objective level while all living beings generate sustain and coordinate continuously a multitude of intelligent modulations throughout the physical brain and entire body forming your entire cognition living intelligent impulses associated to your mind consciousness awareness and intelligence From the physical perspective of your body these are simple encoded impulses within your neurons and therefore within your entire mind and everybody has them capable to sustain entire inner cognitive instances forming together your cognitive system your entire mind in all its thoughts awareness feelings and reactions But then from an inner cognitive perspective all these physical impulses become alive making everything possible throughout your mind organism life and entire world in a living intelligent manner since these are your intelligences All your intelligences are aware conscious and certainly intelligent and through their own consciousness and intelligence they give you your entire mind in all its cognitive abilities becoming everything that you truly are More precisely your intelligences form your mind altogether since the human mind is their living world while your intelligences perform the entire cognitive activity within just for you and for the entire organism And now their continuous existence is your life while their purpose becomes your meaning achievement learning and subsistence Since among all your intelligences you are the conscious intelligence yourself specialized in the coordination of the entire organism in the outside world while fulfilling its needs or while fulfilling your needs since it is the same Because your intelligences have their own specialized tasks and needs together forming not only your mind but your entire life in its entire existence Yet these are only your own intelligences the human intelligences while throughout this book we focus on all intelligences of the wider world including these This book studies all intelligences from living cognitive interconnective and existential perspectives throughout a comprehensive classification of everything alive and intelligent helping you understand yourself life intelligence consciousness the world and your conscious place meaning and fulfillment in life and in the world **Buddhism and**

Intelligent Technology Peter D. Hershock, 2021-01-28 Machine learning big data and AI are reshaping the human experience and forcing us to develop a new ethical intelligence Peter Hershock offers a new way to think about attention personal presence and ethics as intelligent technology shatters previously foundational certainties and opens entirely new spaces of opportunity Rather than turning exclusively to cognitive science and contemporary ethical theories Hershock shows how classical Confucian and Socratic philosophies help to make visible what a history of choices about remaking ourselves through control biased technology has rendered invisible But it is in Buddhist thought and practice that Hershock finds the tools for valuing and training our attention resisting the colonization of consciousness and engendering a more equitable and diversity enhancing human technology world relationship Focusing on who we need to be present as to avoid a future in which machines prevent us from either making or learning from our own mistakes Hershock offers a constructive response to the unprecedented perils of intelligent technology and seamlessly blends ancient and contemporary philosophies to envision how to realize its equally unprecedented promises
