Subcommittee on Foreign Operations and Related Agencies Appropriations,1969 **Transition in Power** Peter J. Huggill,2018-08-15 Hegemonic transitions are never clear and they usually emerge from a period of multi polarity in the world system Two types of state tend to contend for power trading states and territorial states although most states are never pure and tend to contain within them multiple polities with different agendas This book describes the hegemonic transition between two major trading states Britain and America British decline began in the late Victorian era but the transition to American power was slow and other states also sought hegemony Transitions between trading states focus on economic struggle though struggles between trading and territorial states and between territorial states are marked by armed conflict In 1919 President Woodrow Wilson saw three arenas of competition developing between Britain and America in international transportation international communication and petroleum But Britain was challenged economically by America as early as 1861 via the Morrill Tariff her economic hegemony was gone by the 1880s and she was defeated by 1947 From the 1880s on both America and Germany sought to replace Britain as hegemonic power not only through their implementation of protectionist economic policies but also through the adoption of revised versions of the world economy through new technologies and in the case of Germany military power Britain struggled to stay in place Britain s world economy was that of a pure trading state Maritime trade in organic materials was organized through global capitalism and

control over submarine cable telecommunications rather than territorial possession America's rise was greatly helped by being a capitalist power in possession of a secure territorial base in the mid section of the North American continent but America suffered from multiple polities competing for power with the South particularly problematic Germany developed a radically new world economy that synthesized resources using organic chemistry German science and technology began to diffuse to American corporate laboratories before World War One After that war diffusion to American laboratories and universities was massive and helped secure American hegemony
