Spillovers And Innovations Space Environment And The Economy:

Spillovers and Innovations Gunther Maier, Sabine Sedlacek, 2009-09-02 Innovation processes and related spillovers are of eminent importance in a modern economy How do they relate to spatial structures and environmental factors The papers analyse innovation processes and spillovers in the economy from various angles focussing mainly on regional and environmental aspects Among others they touch issues on university spillovers urban tourism highway investments industry clusters and econometrics An introductory chapter sets the stage for the following discussion and a concluding chapter evaluates the achievements Contributors from Austria other European countries and from the U S A discuss this question from various angles among others universities urban tourism highway investments and industry clusters The volume demonstrates the relevance of the concept of spillovers particularly in the context of innovations and stimulates future work in this area

Regional Economics Roberta Capello, 2015-11-10 The second edition of Regional Economics provides a comprehensive and up to date treatment of regional economics This fully revised edition includes key theoretical developments of the last ten years Topics included span from the earliest location theories to the most recent regional growth theories It is also enriched by the recent debate on smart specialization strategies recently developed by the EU for the design of new cohesion policies Key elements covered in the new edition include proximity and innovation theories the concept of territorial capital the debate on the role of agglomeration economies in urban growth This textbook is for undergraduate students in regional and urban economics as well as spatial planning courses

The Economics of Regional Clusters Uwe Blien, Gunther Maier, 2008-01-01 This important new book takes a critical view on regional industry clusters in particular their identification and formation and the policies which help create and support them

Entrepreneurship and Cluster Dynamics Cristina Boari, Tom Elfring, Xavier Molina-Morales, 2016-06-10 Entrepreneurship and Cluster Dynamics focuses on the origin and development of clusters and specifically on the role played by the strategic entrepreneurship in these contexts Although separately entrepreneurship and cluster studies have already attracted the attention of academics and practitioners this book aims to go further and offer an integrated and interactive view of topics The cross cutting approach is one of the main attributes of this book In fact the book involves a great range of organizational and economic perspectives from social psychology to conventional applied economics disciplines Moreover these topics allow the use of different levels of analysis from the individual entrepreneur behind a start up to the structure of cluster networks including the organizational levels An analysis of the change and development of clusters going further than traditional functional approaches by examining how entrepreneurs and their actions are not only influenced by the cluster but also shape the cluster development will offer an explanation of how entrepreneurship and networking entrepreneurs can foster perhaps also inhibit cluster development and change Finally Entrepreneurship and Cluster Dynamics theorizes about the role of the strategic entrepreneurship in developing start ups inside already established companies which can play the role of

broker in the cluster Entrepreneurship and Cluster Dynamics offers a unique opportunity to academics researchers and students to learn about relations and interactions between entrepreneurship and cluster perspectives providing both newly and original theoretical propositions and also rigorous conclusive empirical exercises

Handbook of Regional Growth and Development Theories Roberta Capello, Peter Nijkamp, 2019 Regional economics an established discipline for several decades has undergone a period of rapid change in the last ten years resulting in the emergence of several new perspectives At the same time the methodology of regional economics has also experienced some surprising developments This fully revised and updated Handbook brings together contributions looking at new pathways in regional economics written by many well known international scholars The aim is to present the most cutting edge theories explaining regional growth and local development The authors highlight the recent advances in theories the normative potentialities of these theories and the cross fertilization of ideas between regional and mainstream economists It will be an essential source of reference and information for both scholars and students in the field

Unfolding Cluster Evolution Fiorenza Belussi, Jose Luis Hervás-Oliver, 2016-08-05 Various theories have been put forward as to why business and industry develops in clusters and despite good work being carried out on path dependence and dynamics this is still very much an emerging topic in the social sciences To date no overarching theoretical framework has been developed to show how clusters evolve Unfolding Cluster Evolution aims to address this gap by presenting theoretical and empirical research on the geography of innovation This contributed volume seeks to shed light on the understanding of clusters and its dynamic evolution The book provides evidence to suggest that traditional perspectives from evolutionary economic geography need to be wedded to management thinking in order to reach this point Bringing together thinking from a range of disciplines and countries across Europe this book explores a wide range of topics from the capability approach to network dynamics to multinational corporations to firm entry and exit and social capital This book will be of interest to policy makers and students of urban studies economic geography and planning and development

Growth and Innovation of Competitive Regions Ugo Fratesi, Lanfranco Senn, 2008-12-29 Time Time b a Space Space Time Time c d Space Space Fig 1 Different possible scales for growth and innovation analyses spatial dimension the sectoral dimension and the time dimension are represented In Fig 1a regional development analyses are revealed where the economy is sliced vertically into regions and their dynamics are investigated The study of the evolution of industries typical of evolutionary industrial economics is represented in Fig 1b where the economy is divided horizontally into sectoral slices This approach has progressed considerably in recent years see Malerba 2006 for a recent survey Modifications of industries have important spatial implications which however are not normally at the core of these analyses even though spatial patterns of innovation differ greatly from sector to sector Breschi 2000 Our approach operates in the manner of Fig 1a and we will focus on regions extending the analysis to industries only where this is regionally and structurally relevant Hence the approach in the book belongs to the tradition of regional development theories

but in contrast to the more traditional analyses we will not consider the region as an economic unit per se. Rather interactions between and within regions are very relevant to the performance of individual regions in an integrated world and will be at the core of the analyses of the following chapters

Territorial Patterns of Innovation Roberta Capello, Camilla

Lenzi, 2013-07-18 This edited volume describes the spatial diffusion of knowledge and innovation using a large dataset at the regional level and presents scientific evidence on the role of knowledge and innovation on regional development. The empirical results support a new design for innovation policies at the regional level which could help the European Union to achieve the targets set up in its 2020 Agenda. Today financial capital, general information, consolidated technologies and codified knowledge are readily available virtually everywhere. However, the ability to organize these pervasive factors into continuously innovative production processes and products is by no means pervasive and generalized; rather it exists selectively only in some places where tacit knowledge is continuously created, exchanged and utilized, and business ideas find their way to real markets. Territorial Patterns of Innovation provides evidence that, contrary to popular belief, local knowledge intensity does not necessarily guarantee higher innovation performance. Moreover, the book shows that the growth benefits deriving from innovation do not necessarily match the strength of the formal local knowledge base and that regions innovating in the absence of a strong local knowledge base can be as successful as more knowledge intensive regions in turning innovation into a higher growth rate. Together, the contributions in this book offer a new understanding of the relationship between knowledge, innovation and regional performance by delving beyond generally held beliefs. It will be of value to regional scientists, industrial economists and policymakers.

Handbook on the Geographies of Innovation

Richard Shearmur, Christophe Carrincazeaux, David Doloreux, 2016-11-25 The geography of innovation is changing. Firstly, it is increasingly understood that innovative firms and organizations exhibit a wide variety of strategies, each differently attuned to diverse geographic contexts. Secondly, and concomitantly, the idea that cities, clusters and physical proximity are essential for innovation is evolving under the weight of new theorizing and empirical evidence. The aim of this handbook is to break with the many ideas and concepts that emerged during the course of the 1980s and 1990s and to fully take into account the new reality of the internet, mobile communication technologies, personal mobility and globalization. The handbook gathers a new generation of ideas and authors to contribute to the debate, providing an empirically grounded critical appraisal of the prevailing knowledge on the geography of innovation. The 28 original chapters, written by a diverse range of scholars with widely differing views, present fresh empirical evidence and new perspectives relating to how innovation plays out across space in an age where mobility has increased, information is ubiquitous and globalisation has been realised. Overall, the dialogue between existing theory and new possibilities provides a unique and challenging appraisal of the connection between innovation, agglomeration and space. Offering cutting edge ideas in an accessible format, this will be an ideal resource for students and scholars of economic geography and innovation studies. The empirical evidence and analysis will

also be of great value for policymakers and government officials Contributors include B T Asheim H W Aslesen A Bain P A Balland N Bradford A Bramwell C Brennan Horley S Breschi C Carraincazeaux C Chaminade R Comunian C De Fuentes D Doloreux D Eckert A Faggian M Ferru R D Fitjar K Flanagan C Gibson M Grillitsch M Grossetti G Harirchi F Huber A Isaksen S Jewel J Karlsen N Komninos J L Klein N Lee F Lissoni M Maisonnobe J Mattes P McCann C T Noumedem R Ortega Argil s M Plechero A Rallet A Rodriguez Pose R Shearmur H L Smith B Spigel J Tallec E Tranos D G Tremblay F T dtling M Trippl E Uyarra C Yang C Wilkie D A Wolfe
