Spilt Milk Joan Raphael-Leff,2000 A collection of lectures by eminent members of the British Psycho analytical Society Includes papers on the experience of having a baby pregnancy and the internal world pregnancy after stillbirth or neonatal death and therapeutic intervention for post partum disturbance **Spilt Milk** Joan Raphael-Leff,2018-04-24 A collection of lectures by eminent members of the British Psycho analytical Society Includes papers on the experience of having a baby pregnancy and the internal world pregnancy after stillbirth or neonatal death and therapeutic intervention for post partum disturbance *Contradicting Maternity* Carol Long,2009-06-01 Drawing on rich and poignant interviews with mothers who have been diagnosed HIV positive *Contradicting Maternity* provides a rare perspective of motherhood from the mother s point of view Whereas motherhood is often assumed to be a secondary identity compared to the central figure of the child this book reverses the focus arguing that maternal experience is important in its own right The book explores the situation in which two very powerful identities those of motherhood and of being HIVpositive collide in the same moment This collision takes place at the interface of complex and often split social and personal meanings concerning the sanctity of motherhood and the anxieties of HIV The book offers an interpretation of how these personal and social meanings resonate with and also fail to encompass the experiences surrounding HIV positive mothers Photographs academic literature and the accounts of real women are read with both a psychodynamic and discursive eye highlighting the contradictions within maternal experience but also between maternal experience and the social imagination *Contradicting Maternity* will appeal to scholars students and practitioners in psychology the social sciences and the health professions The sensitive and readable analysis will also be of interest to mothers whether HIV positive or not *Make Room for Baby* Alicia F. Lieberman,Manuela A. Diaz,Gloria Castro,Griselda Oliver Bucio,2023-01-13 This state of the art clinician s guide describes Perinatal Child Parent Psychotherapy P CPP a treatment for pregnant women and their partners whose readiness to nurture a baby is compromised by traumatic stress and adverse life experiences P CPP an application to pregnancy of the widely disseminated evidence based Child Parent Psychotherapy spans the prenatal period through the first 6 months of life Extended cases illustrate ways to help mothers and fathers understand how trauma has affected them navigate the physical and emotional challenges of becoming parents build essential caregiving competencies and ensure the safety of their babies and themselves Cultural considerations in working with diverse families are addressed through specific intervention examples Handbook of Parenting Marc H. Bornstein,2019-02-01 This highly anticipated third edition of the *Handbook of Parenting* brings together an array of field leading experts who have worked in different ways toward understanding the many diverse aspects of parenting Contributors to the *Handbook* look to the most recent research and thinking to shed light on topics every parent professional and policymaker wonders about Parenting is a perennially hot topic After all everyone who has ever lived has been parented and the vast majority of people become parents themselves No wonder bookstores house shelves of how to

parenting books and magazine racks in pharmacies and airports overflow with periodicals that feature parenting advice. However, almost none of these is evidence based. The Handbook of Parenting is Period. Each chapter has been written to be read and absorbed in a single sitting and includes historical considerations of the topic, a discussion of central issues and theory, a review of classical and modern research, and forecasts of future directions of theory and research. Together, the five volumes in the Handbook cover Children and Parenting, the Biology and Ecology of Parenting, Being and Becoming a Parent, Social Conditions and Applied Parenting, and the Practice of Parenting. Volume 3, Being and Becoming a Parent, considers a large cast of characters responsible for parenting, each with her or his own customs and agenda, and examines what the psychological characteristics and social interests of those individuals reveal about what parenting is. Chapters in Part I on The Parent show just how rich and multifaceted is the constellation of children's caregivers. Considered first are family systems, and then successively mothers and fathers, coparenting and gatekeeping between parents, adolescent parenting, grandparenting, and single parenthood, divorced and remarried parenting, lesbian and gay parents, and finally sibling caregivers and nonparental caregiving. Parenting also draws on transient and enduring physical, personality, and intellectual characteristics of the individual. The chapters in Part II on Becoming and Being a Parent consider the intergenerational transmission of parenting, parenting and contemporary reproductive technologies, the transition to parenthood, and stages of parental development, and then chapters turn to parents' well-being, emotions, self-efficacy, cognitions, and attributions, as well as socialization, personality in parenting, and psychoanalytic theory. These features of parents serve many functions; they generate and shape parental practices, mediate the effectiveness of parenting, and help to organize parenting.

The Handbook of Child and Adolescent Psychotherapy Monica Lanyado, Ann Horne, 2009-06-09 This second edition provides a uniquely comprehensive guide to the practice and principles of child and adolescent psychotherapy around the world and has been thoroughly updated to take into account the many changes that have taken place.

Parenthood and Mental Health Sam Tyano, Miri Keren, Helen Herrman, John Cox, 2010-04-06 Across all cultures, parenting is the foundation of family life. It is the domain where adult mental health meets infant development. Beginning in pregnancy, parenting involves many conscious and unconscious processes which have recently been shown to affect a child's development significantly. This book focuses on pregnancy and the first year of life, providing a thorough account of the points of encounter between adult and infant psychiatry. In a fresh and comprehensive way, it summarises knowledge about early parenting, including a critical analysis of parenting, what it means to be a good enough parent, and its relationship to infant, parent, and family outcomes. In addition to the psychiatric dimension, the book emphasises the biological aspects of parenting, parental psychopathology, and normal and abnormal infant development. Praise for Parenting and Mental Health Tyano, Keren, Herrman, and Cox have edited a thoughtfully prepared guide on normal and abnormal parenting. They have, with enormous skill and wisdom, helped to unite the important aspects of pregnancy, infant, and childhood development, and parenting for adult and child, and adolescent

psychiatrists World class internationally recognized clinicians and researchers help make this book useful throughout the world This is a masterful culturally sensitive and important book which provides a long overdue and much needed guide on relationships among children parents and families Michelle Riba M D M S Professor and Associate Chair for Integrated Medical and Psychiatric Services Department of Psychiatry University of Michigan USA During recent decades progress in the field of infant mental health has been revolutionary at the same time there has been rapid development in women s mental health By bringing these two together this pioneering book leads its readers to the vital new focal point around perinatal mental health The book integrates the origins of developmental psychiatry in attachment and systemic contexts and shows concretely how relationship experiences and biology interact when new life begins After describing the fascinating world of early parenting the book focuses on problems difficulties and disorders during this phase of life and above all on how to support intervene and treat disorders in parenting When infants mothers and fathers are understood in a holistic way professionals in many fields will be able to promote the transmission of meaningful life through parenthood and parenting Tuula Tamminen Professor of Child Psychiatry University of Tampere Finland Past President of World Association for Infant Mental Health President of European Society for Child and Adolescent Psychiatry Cover design by Reouth Keren What Do Mothers Want? Sheila F. Brown, 2013-05-13 What do mothers want and need from their parenting partners their extended families their friends colleagues and communities And what can mental health professionals do to help them meet their daunting responsibilities in the contemporary world The talented contributors to What Do Mothers Want address these questions from perspectives that encompass differences in marital status parental status gender and sexual orientation Traversing the biological psychological cultural and economic dimensions of mothering they provide a compelling brief on the perplexing choices confronting mothers in the contemporary world Of course mothers most basically want their children to be safe and healthy But to this end they want and need many things caring partners intergenerational and community support a responsive workplace public services and opportunities to share their experiences with other mothers And they want their feelings and actions as mothers to be understood and accepted by those around them and by society at large The role of psychotherapy in reaching these latter goals is taken up by many of the contributors They reflect on the special psychological challenges of pregnancy birth and the arrival of a newborn into a couple s whether hetero or homosexual life and they address new venues of therapeutic assistance such as brief low cost therapy for at risk mothers and infants and group interventions to help couples grow into the new role of parental couples *Becoming Parents and Overcoming Obstacles* Emanuela Quagliata, 2018-05-01 There are many books that deal with pregnancy and maternity and a large number of magazines and articles on paediatric nursing that examine these subjects from different points of view This volume is not a manual and is not intended to explain to future parents what to do and what to avoid The objective is rather to look at the most significant and problematic aspects of this delicate phase of a woman s life and that of a couple It seeks to offer a key to

understand the deep significance and complexity of the path to follow to become parents and to face fears linked to the difficulty of procreation using the tools of observation and psychoanalytic listening Reviewing several experiences of clinical work the authors offer reflections on the personal experiences of women and couples and the difficulties which can be met when the desire for a child is disappointed A maternity and parenting project can be frustrated by miscarriages and encounter the fear of infertility How are the problems of sterility or spontaneous abortion experienced *Relational Trauma in Infancy* Tessa Baradon, 2009-12-24 This book presents an interdisciplinary discussion between researchers and clinicians about trauma in the relationship between infants and their parents bringing together paradigms from psychoanalysis attachment and the neurosciences *The Practice of Psychoanalytic Parent-Infant Psychotherapy* Tessa Baradon, Michela Biseo, Carol Broughton, Jessica James, Angela Joyce, 2016-01-13 The Practice of Psychoanalytic Parent Infant Psychotherapy is a comprehensive handbook addressing the provision of therapeutic help for babies and their parents when their attachment relationship is troubled and a risk is posed to the baby's development Drawing on clinical and research data from neuroscience attachment and psychoanalysis the book presents a clinical treatment approach that is up to date flexible and sophisticated whilst also being clear and easy to understand The first section The theory of psychoanalytic parent infant psychotherapy offers the reader a theoretical framework for understanding the emotional interactional environment within which infant development takes place The second section The therapeutic process invites the reader into the consulting room to participate in a detailed examination of the relational process in the clinical encounter The third section Clinical papers provides case material to illustrate the unfolding of the therapeutic process This new edition draws on evidence from contemporary research with new material on Embodied communication between parent and infant and clinician patient's Fathers and fathering Engagement of at risk populations Written by a team of experienced clinicians writers teachers and researchers in the field of infant development and psychopathology The Practice of Psychoanalytic Parent Infant Psychotherapy will be an essential resource for all professionals working with children and their families including child psychiatrists psychoanalysts psychotherapists and clinical and developmental psychologists **The Maternal Lineage** Paola Mariotti, 2012 The Maternal Lineage highlights various psychological aspects of the mothering experience Clinical examples and theoretical research show that the transgenerational repetition of distressing mothering patterns can be successfully broken with professional help *Constructing and Deconstructing Woman's Power* Beth J. Seelig, 2018-05-08 Constructing and Deconstructing Woman's Power explores power and gender issues from a variety of psychoanalytic as well as social cultural and philosophical perspectives The first three papers examine the complex notion of external and internal glass ceiling brought to life by clear and illustrative clinical vignettes The creation of life a uniquely female power is subsequently considered in two fascinating papers exploring motherhood and the conflicts it brings The development and expression of feminine creativity more generally is further examined in two unique studies The final three essays address

men's relation to women and their power *Independent Psychoanalysis Today* Paul Williams, John Keane, Sira Dermen, 2018-03-26 *Independent Psychoanalysis Today* is a book that shows how contemporary Independent psychoanalysts think and work. There are three themes to the book: Independent thinking including the theory of technique; exploration of clinical concepts and demonstrations of ways of working by some of the most prominent Independent clinicians practicing today; finally, the evolution and enduring impact of Independent ideas and the influence of past Independents on present ways of working.

Forensic Psychotherapy and Psychopathology Brett Kahr, 2018-03-26 This exceptional book adds to the fast growing area of forensic psychotherapy and shows the relevance of Winnicott's work to therapy with some of the most deprived in our society. Contributors: Brett Kahr, Jennifer Johns, Estela Welldon, Joan Raphael-Leff, Valerie Sinason, Jeannie Milligan, Donald Campbell, Em Farrell, Peter Giovacchini, Charles Socarides, Murray Cox.

The Anna Freud Tradition Norka T. Malberg, Joan Raphael-Leff, 2018-04-17 This book introduces the birth and development of the Anna Freudian Tradition from a perspective of developmental lines by addressing the early development of this tradition and the conflicts and innovations arising from the interaction between the internal and external world of the organization.

Pregnancy Joan Raphael-Leff, 2018-05-08 Utilising her wealth of material and experience, the author explores various aspects of the inside story of pregnancy. She answers such questions as: What meanings does childbearing have in the internal world? How does a pregnant woman live with two people under her skin? What is the expectant partner's experience? Which dreams, fears, and fantasies proliferate around pregnancy and birth?

Motherhood in the Twenty-First Century Mariam Alizade, 2020-06-16 Mothers in the twenty-first century confront us both in clinical practice and in theory with fascinating challenges that to some extent subvert the traditional maternal ideal: the motherhood of single women; motherhood in which the mother-child relationship seems minimal in the case of very busy working mothers; teenage motherhood in which there is no true awareness of the maternal function; motherhood in couples of homosexual women; men who take upon themselves the maternal function; men-mothers; complex motherhood by virtue of the multiple variants that have nowadays become possible thanks to new reproductive techniques; shared motherhood; surrogate motherhood; sublimated motherhood; and perverse motherhood.

The Female Body Ingrid Moeslein-Teising, Frances Thomson-Salo, 2018-04-19 This book gathers together a number of cutting-edge contributions about the female body, inside and out, from a large group of psychoanalysts who are at the forefront of new thinking about issues of femininity, the female body, sex, and gender. It explores the female body in art, in pregnancy, and motherhood, in sexuality, and in the lifecycle, and finally the female body as scene of crime. As a result, this book covers aspects of female creativity in its many aspects, both productive and generative, and where there are difficulties or impediments. The psychoanalysts writing for this book have made an enormous contribution in the past, and this book therefore aims to stimulate challenge and provoke further discussion and new advances in this field.

Mourning the Person One Could Have Become Witold Simon, 2011-12-16 This book introduces the concept of the Person One Could Have

Become and shows the importance of mourning for individuals with traumatic experiences The Person One Could Have Become is conceptualized as personality and physical characteristics that could have emerged if an individual at the right time had received or opted for an appropriate quantity and quality of stimuli and experiences which in turn would have enabled the person to make more mature and independent choices Consequences of potentially traumatic events bear non linear meta folding and multicontextual meaning unique to each being in the world Many people with a history of trauma tend to mystify their existence in order to survive This book contains an overview of the ramifications of abuse and neglect on personality as well as the consequences of pregnancy loss and the specific loss of possibility and its co occurrence with abuse and neglect It looks at examples from daily life and two cases of traumatized individuals who differ in their background and experience of trauma as well as in their struggles during psychotherapy This book is not intended as a treatment manual nor does it advocate for any particular therapeutic approach It is rather an encouragement of a way of living Indeed a reasonable mourning of the Person One Could Have Become may set the individual free also such with the history of trauma for the road beyond the traditional psychotherapy outcome the road toward authenticity
