**Eranos** Hans Thomas Hakl, 2014-09-11 Every year since 1933 many of the world s leading intellectuals have met on Lake  
Maggiore to discuss the latest developments in philosophy history art and science and in particular to explore the mystical  
and symbolic in religion The Eranos Meetings named after the Greek word for a banquet where the guests bring the food  
constitute one of the most important gatherings of scholars in the twentieth century The book presents a set of portraits of  
some of the century s most influential thinkers all participants at Eranos Carl Jung Erich Neumann Mircea Eliade Martin  
Buber Walter Otto Paul Tillich Gershom Scholem Herbert Read Joseph Campbell Erwin Schrodinger Karl Kereyni D T Suzuki  
and Adolph Portmann The volume presents a critical appraisal of the views of these men how the exchange of ideas  
encouraged by Eranos influenced each and examines the attraction of these esotericists towards authoritarian politics

*Philosophy East & West* , 1970      **Allegory** Angus Fletcher, 2021-06-08 Anyone who has ever said one thing and meant  
another has spoken in the mode of allegory The allegorical expression of ideas pervades literature art music religion politics  
business and advertising But how does allegory really work and how should we understand it For more than forty years  
Angus Fletcher s classic book has provided an answer that is still unsurpassed for its comprehensiveness brilliance and  
eloquence With a preface by Harold Bloom and a substantial new afterword by the author this edition reintroduces this  
essential text to a new generation of students and scholars of literature and art Allegory puts forward a basic theory of  
allegory as a symbolic mode shows how it expresses fundamental emotional and cognitive drives and relates it to a wide  
variety of aesthetic devices Revealing the immense richness of the allegorical tradition the book demonstrates how allegory  
works in literature and art as well as everyday speech sales pitches and religious and political appeals In his new afterword  
Fletcher documents the rise of a disturbing new type of allegory allegory without ideas      **The Seed and the Soil** Carol  
Delaney, 1991-11-14 How do the metaphors we use to describe procreation affect our view of the relative worth of each  
gender Carol Delaney discloses the powerful meanings condensed in the seemingly innocent images of seed and soil Drawing  
on her work in a small Turkish village of Sunni Muslims she shows us that the images are categorically different  
hierarchically ordered and unequally valued The ways in which the creation of a child is understood in Turkey furnish a key  
to understanding a whole range of Turkish attitudes toward sexuality and gender honor and shame authority and submission  
time and space inside and outside open and closed Moreover the symbols and meanings by which they represent procreation  
provide the means for understanding relationships between such seemingly disparate elements as the body family house  
village nation this world and other world Delaney points out that these symbols do not embellish reality they provide the key

to a particular conception of it a conception that gives coherence to social life The patterns revealed are not distinctly Turkish they also comment on some of our own deeply held assumptions and values about procreation

**Religion and the Order of Nature** Seyyed Hossein Nasr,1996-09-26 The current ecological crisis is a matter of urgent global concern with solutions being sought on many fronts In this book Seyyed Hossein Nasr argues that the devastation of our world has been exacerbated if not actually caused by the reductionist view of nature that has been advanced by modern secular science What is needed he believes is the recovery of the truth to which the great enduring religions all attest namely that nature is sacred Nasr traces the historical process through which Western civilization moved away from the idea of nature as sacred and embraced a world view which sees humans as alienated from nature and nature itself as a machine to be dominated and manipulated by humans His goal is to negate the totalitarian claims of modern science and to re open the way to the religious view of the order of nature developed over centuries in the cosmologies and sacred sciences of the great traditions Each tradition Nasr shows has a wealth of knowledge and experience concerning the order of nature The resuscitation of this knowledge he argues would allow religions all over the globe to enrich each other and cooperate to heal the wounds inflicted upon the Earth

**Theological Analyses of the Clinical Encounter** G.P. McKenny,J.R. Sande,2013-04-17 Efforts to evaluate the clinical encounter in terms of autonomous agents governed by rationally justified moral principles continue to be criticised These essays written by physicians ethicists theologians and philosophers examine various models of the clinical encounter emerging out of these criticisms and explore the prospects they offer for theological and religious discourse Individual essays focus on the reformulation of covenant models revisions of principles approaches and topics such as power authority narrative rhetoric dialogue and alterity The essays display a range of conclusions about whether theology articulates generally accessible religious insights or is a tradition specific discipline Hence the volume reflects current debates in theology while analysing current models of the clinical encounter Students professionals and scholars who find themselves at the intersection of theology and medicine will welcome these voices in an ongoing conversation

**A Dream in the World** Robin van L ben Sels,2004-03-01 How can science and religion co exist in the modern discipline of psychotherapy A Dream in the World explores the interfaces between religious experience and dream analysis At the heart of this book is a selection of dreams presented by the author s patient during analysis which are compared with the dreams of Hadewijch a thirteenth century woman mystic The patient s dreams led the modern woman to an unanticipated breakthrough encounter with the

divine her experience of soul The experience reoriented and energized her life and became her dream in the world Following Jung s idea that the psyche has a religious instinct Robin van Loben Sels demonstrates that the healing process possible through psychotherapy can come from beyond the psyche and can not be explained by our usual theories of scientific psychology Written in flowing easily read language *A Dream in the World* details a classical Jungian analysis of a woman s dreams and searches the relationship between religious encounter psyche and soul *Logic and Rhetoric* James William Johnson,1962

**Evil, Spirits, and Possession** David L Bradnick,2017-08-28 In *Evil Spirits and Possession* An Emergentist Theology of the Demonic David Bradnick develops a multidisciplinary view of the demonic using biblical theological social scientific and philosophical scientific perspectives Building upon the work of Pentecostal theologian Amos Yong this book argues for a theology informed by emergence theory whereby the demonic arises from evolutionary processes and exerts downward causal influence upon its constituent substrates Consequently evil does not result from conscious diabolic beings rather it manifests as non personal emergent forces that influence humans to initiate and execute nefarious activities Emergentism provides an alternative to contemporary views which tend to minimize or reject the reality of the demonic and it retains the demonic as a viable theological category in the twenty first century [The Collected Works of C. Scheurer, G. Debrock, 2012-12-06 This volume contains the Proceedings of the International Colloquium Newton's Scientific and Philosophical Legacy that was held at the Catholic University of Nijmegen The Netherlands from June 9th to 12th 1987 to celebrate the Tercentenary of the publication of Newton's Philosophiae Naturalis Principia Mathematica 1667 Although 1987 was a busy year for Newton scholars we were happy that five of most prominent among them were able to come to Nijmegen and speak on the various aspects of Newton's thought They are the Professors I Bernard Cohen Harvard Gale Christianson Indiana State B J Dobbs Northwestern Richard H Popkin UCLA and Mordechai Feingold Boston University No doubt recent scholarship has put Newton's genius in a quite different perspective from the one that had come to make up what may be called Newtonian mythology Although his achievements in the areas of mechanics mathematics and optics remain indisputed Newton's scientific efforts were apparently entirely subordinate to his religious beliefs This volume has been divided into four parts preceded by a Preamble in which Prof Christianson offers a vivid portrait of Newton as a person The first part deals with the science of Newton as he himself understood that term The second part considers the influence of Newton's work on later scientific developments The third part deals primarily with the question of the methodological influence of Newton and the last part with his more philosophical legacy Two editorial remarks are due *Technology and the Spirit* Ignacio L. Götz, 2001-08-30 Most contemporary accounts of the role of technology in world culture are alarmist and at times condemn many uses of technology without much effort to get beyond

the surface of this worldwide phenomenon Technological innovations that might rightly be critiqued are taken as representative of the entire field of technology On the other hand there are those including some scientists for whom technology and its uses pose no questions at all and who seem to delight in predictions of a future totally dominated by technology They prey on the human delight in newness and innovation and on our readiness to be surprised by what may someday come to be G tz takes the position that so called technology problems are really our problems not the fault of technology Technology is an integral part of what we are as human beings a significant aspect of our evolution G tz also advances the thesis that technology may be viewed from the perspective of the human capacity to grow and that when we do so we are in effect spiritualizing technology and rendering it more meaningful to ourselves G tz suggests several models that may be employed to achieve this spiritualization This provocative analysis will be of interest to general readers as well as scholars students and researchers concerned with contemporary social and religious issues
