Muddy Mentors and Scaly Scholars Troy D. Ehlke, 2008-05-12 Muddy Mentors and Scaly Scholars is a primer for the exploration of animal ethics through the lenses of the Hebrew Bible New Testament Secular writings and Native American mythology The purpose of the text is to challenge the pervading belief that humans by nature have a greater degree of intrinsic worth Animals have a great deal to teach us and may offer insight into areas that we have overlooked for some time This text raises four key arenas for inspection morality respect friendship and ritual remembrance If we look to the animals and how they interact with some humans we may see the emergence of a more sophisticated ethical standard that appreciates all of life rather than one that exists from a point of species specific bias The text is designed to facilitate a spiritual journey between the reader and creation As one progresses through the pages the reader is challenged to respond to the belief that we have dominion over the animals The assertion that animals share much of life's concerns with us is articulated clearly As the Philosopher King from Ecclesiastes says I said in my heart that God is testing them to show that they are but animals For the fate of humans and the fate of animals is the same as one dies so dies

the other Ecclesiastes 3 18 19 By seeing animals as teachers and pilgrims on the same journey of life perhaps a new world can emerge one where unity is celebrated above the divisiveness of difference

Authoritative Communities Kathleen Kovner Kline, 2007-11-25 Authoritative Communities The Scientific Case for Nurturing the Whole Child introduces innovative solutions based firmly in the children's mental health and resilience literature and in the hypothesis that humans are hardwired to connect These authoritative communities consist of such individuals and institutions as parents teachers coaches elders and a variety of organizations that are committed to each other's well being over the long term and who instill children with prosocial values such as empathy and compassion Living within these communities enables children and youth to develop a consistent sense of purpose and meaning so that they in turn are able to grow up to be responsible productive and nurturing adults The comprehensive coverage in this volume brings new insights and evidence to the nature nurture debate from developmental attachment neurobiological spiritual and community perspectives including Nurturing as a protective factor against genetic predispositions Counteracting the adverse influence of the media on children Promoting a sense of community in disadvantaged youth Spiritual approaches from the Buddhist mind training children with mindfulness to traditional young men's rites of passage Adolescent development from psychobiology to the formation of conscience Dispatches from the civil society movement the School Development Program and the motherhood movement This volume is essential reading for researchers and practitioners as well as graduate level students in developmental clinical and social psychology as well as related fields such as sociology social work education and religious studies
