An Obsession With Butterflies Sharman Apt Russell,2009-04-24 Sharman Apt Russell again blends her lush voice and keen scientific eye in this marvelous book about butterflies From Hindu mythology to Aztec sacrifices butterflies have served as a metaphor for resurrection and transformation Even during World War II children in a Polish death camp scratched hundreds of butterflies onto the walls of their barracks But as Russell points out in this rich and lyrical meditation butterflies are above all objects of obsession From the beastly horned caterpillar whose blood helps it count time to the peacock butterfly with wings that hiss like a snake Russell traces the butterflies through their life cycles exploring the creatures own obsessions with eating mating and migrating In this way she reveals the logic behind our endless fascination with butterflies as well as the driving passion of such legendary collectors as the tragic Eleanor Glanville whose children declared her mad because of her compulsive butterfly collecting and the brilliant Henry Walter Bates whose collections from the Amazon in 1858 helped develop his theory of mimicry in nature Russell also takes us inside some of the world s most prestigious natural history museums where scientists painstakingly catalogue and categorize new species of Lepidoptera hoping to shed light on insect genetics and evolution A luminous journey through an exotic world of obsession and strange beauty this is a book to be treasured by anyone who s ever watched a butterfly mid flight and thought as Russell has I ve entered another dimension

violence against animals cast the Anthropocene as an era of criminality and loss driven by boundless human exceptionalism forcing a reckoning with and an urgent reimagining of human animal relations Without the sleights of hand that would lump humanity into a singular Anthropos of the Anthropocene the authors recognize the differential nature of human impacts on animal life and the biosphere as a whole while affirming the complexity of animal worlds and their profound imbrications in human cultures societies and industries Confronting the reality of the Sixth Mass Extinction and mass animal death requires forms of narrativity that draw on traditional genres and disciplines while signaling a radical break with modern temporalities and norms Chapters in this volume reflect this challenge while embodying the interdisciplinary nature of inquiry into non human animality at the edge of the abyss historiography cultural anthropology post colonial studies literary criticism critical animal studies ethics religious studies Anthropocene studies and extinction studies entwine to illuminate what is arguably the greatest crisis for all creatures in the past 65 million years
