**American Education** ,1921      Play, Tongues, and Liberation Power Shelby T. Boese,2021-05-13 The recent Pixar animated movie *Soul* illustrates what happens when we are caught up into something The movie uses the common language of being in the Zone Another word for this is being in the state of play Spiritual gifts like speaking in tongues are about normalizing a regular way to enter the zone or play of the Holy Spirit in a way that then empowers us for the rest of non play life Pentecostalism has exploded around the world in part because people have direct encounters in play that empower them to act in new ways This short work explores the nature of play and what happens in the Zone      *The Grace of Playing* Courtney T. Goto,2016-02-10 Believers and teachers of faith regularly know the in breaking of God s Spirit in their midst when revelatory experiencing unexpectedly shifts habits of thinking feeling and doing toward more life giving ways of being and becoming When the moment is right Spirit breathes new life into dry bones Though religious educators have much practical wisdom about facilitating learning that is creative and transformative sharper concepts cases and theory can help them do it more critically and assist learners to practice openness to wonder surprise and authenticity The Grace of Playing explains how we can create the conditions for revelatory experiencing by understanding it in light of playing The notion of playing as if can be powerfully reclaimed from ecclesial ambivalence casual speech and commercial interests that often lead playing to be associated with childishness frivolity or entertainment This book theorizes adults playing for the sake of faith drawing on D W Winnicott s psychoanalytic theory a revision of Jurgen Moltmann s theology of play biblical texts medieval devotional practices as well as art and aesthetics that help local faith communities engage in theological reflection Communal forms of playing in at God s new creation provide insights into pedagogies in which learners are creating and are created anew      *The Foundations of Character* Alexander Faulkner Shand,1914 A scientific treatment should not diminish but increase the general interest taken in character To bring together the various aspects of the subject which in literature are treated in isolation from one another to lead up to a general conception of it to study the methods by which the knowledge of it may be increased in accuracy and extent these are to make approaches to a scientific treatment of character While I have had chiefly to confine myself to a study of the tendencies of the emotions and sentiments this has been throughout my aim This book then is a study of method Yet I do not claim that this method is essentially new It is in the main the hypothetical method of the sciences it has had to be adapted to the treatment of character that is all A complete science of mind would include a science of character The best approach to such a science is through the study of the primary emotions and their connected instincts This study is to be directed to an analysis of tendencies PsycINFO Database Record c 2005 APA all rights reserved      **Sartre and Magic** Daniel O'Shiel,2019-06-27 Jean Paul Sartre s technical and multifaceted concept of magic is central for understanding crucial elements of his early philosophy 1936 1943 not least his conception of the ego emotion the imaginary and value Daniel O Shiel follows the thread of magic throughout Sartre s early philosophical

work Firstly Sartre s work on the ego 1936 shows a personal reflective form of consciousness that is magically hypostasized onto the pre reflective level Secondly emotion 1938 is inherently magical for Sartre because emotive qualities come to inhere in objects and thereby transform a world of pragmatism into one of captivation Thirdly analyses of The Imaginary 1940 reveal that anything we imagine is a spontaneous creation of consciousness that has the power to enchant and immerse us even to the point of images holding sway over us Culminating with Sartre s ontological system of Being and Nothingness 1943 O Shiel argues that Sartre does not do away with the concept but in fact provides ontological roots for it This is most evident in Sartre s analyses of value possession and language A second part shows how such Sartrean magic is highly relevant for a number of concrete case studies the arts advertising racism and stupidity and certain instances of psychopathology O Shiel shows that Sartre s magical being is important for any contemporary philosophical anthropology because it is essentially at work at the heart of many of our most significant experiences both creative and damaging
