Birdsong, Speech, and Language Johan J. Bolhuis, Martin Everaert, 2013-03-22 Prominent scholars consider the cognitive and neural similarities between birdsong and human speech and language. Scholars have long been captivated by the parallels between birdsong and human speech and language. In this book, leading scholars draw on the latest research to explore what birdsong can tell us about the biology of human speech and language and the consequences for evolutionary biology. After outlining the basic issues involved in the study of both language and evolution, the contributors compare birdsong and language in terms of acquisition, recursion, and core structural properties, and then examine the neurobiology of song and speech, genomic factors, and the emergence and evolution of language. Younger-Generation Korean Experiences in the United States Thomas Chung, Pyong Gap Min, 2014-06-11 *Younger Generation Korean Experiences in the United States: Personal Narratives on Ethnic and Racial Identities* compares the formation of the ethnic identities of two distinct cohorts of Korean Americans. Through personal essays, the book explores four influential factors of ethnic identity: retention of ethnic culture, participation in ethnic social networks, links to the mother country, and its global power and influence, and experiences with racial prejudice and discrimination. The essays reflect certain major changes between the two cohorts: the first growing up in the 1960s and early 1970s, and the second growing up during the 1980s and early 1990s. It proves how an increase in the Korean population and in the number of ethnic organizations helped the second cohort of Korean Americans retain their cultural heritage in a more voluntary and therefore meaningful way. This book's combination of first-hand experiences and critical analysis makes it a valuable resource for studies of ethnicity, culture, identity formation, and the Asian American experience. *Korean Language for Beginners* Andrea De Benedittis, 2017-06-07 This book is a complete guide for people who want to learn the Korean language starting from the very beginning and learn the alphabet and the correct sounds of vowels, consonants, and diphthongs.
