## **The Harmony Of Illusions Inventing Post Traumatic Stress Disorder:**

The Harmony of Illusions Allan Young, 1997-10-27 As far back as we know there have been individuals incapacitated by memories that have filled them with sadness and remorse fright and horror or a sense of irreparable loss Only recently however have people tormented with such recollections been diagnosed as suffering from post traumatic stress disorder Here Allan Young traces this malady particularly as it is suffered by Vietnam veterans to its beginnings in the emergence of ideas about the unconscious mind and to earlier manifestations of traumatic memory like shell shock or traumatic hysteria In Young s view PTSD is not a timeless or universal phenomenon newly discovered Rather it is a harmony of illusions a cultural product gradually put together by the practices technologies and narratives with which it is diagnosed studied and treated and by the various interests institutions and moral arguments mobilizing these efforts This book is part history and part ethnography and it includes a detailed account of everyday life in the treatment of Vietnam veterans with PTSD To illustrate his points Young presents a number of fascinating transcripts of the group therapy and diagnostic sessions that he observed firsthand over a period of two years Through his comments and the transcripts themselves the reader becomes familiar with the individual hospital personnel and clients and their struggle to make sense of life after a tragic war One observes that everyone on the unit is heavily invested in the PTSD diagnosis boundaries between therapist and patient are as unclear as were the distinctions between victim and victimizer in the jungles of Southeast Asia

investigates the history of the concept of trauma She explores the emergence of multiple personality disorder Freud's approaches to trauma medical responses to shellshock and combat fatigue Sándor Ferenczi's revisions of psychoanalysis and the mutually reinforcing often problematic work of certain contemporary neurobiological and postmodernist theorists Leys argues that the concept of trauma has always been fundamentally unstable oscillating uncontrollably between two competing models each of which tends at its limit to collapse into the other A powerfully argued work of intellectual history Trauma will rewrite the terms of future discussion of its subject

power as well as new forms of dialogue      **Intrepid Warriors** Bernd Horn, 2007-11-15 Issued also in French under title Les guerriers intrepides      **Identifying, Treating, and Preventing Childhood Trauma in Rural Communities** Baker, Marion, Ford, Jacqueline, Canfield, Brittany, Grabb, Traci, 2016-06-09 While there have been great strides made in the treatment options available to trauma victims there is a noticeable gap in the availability of medical social and psychological options in rural communities As these hurdles gain more recognition especially in regards to traumatized children research efforts have been intensified in an effort to increase the overall awareness of and find solutions to the improper treatment being provided Identifying Treating and Preventing Childhood Trauma in Rural Communities depicts the issues and challenges rural areas face when treating victims of trauma especially children and adolescents Featuring information on language and cultural barriers as well as the lack of resources available within these rustic environments this publication serves as a critical reference for researchers clinicians educators social workers and medical providers      *PTSD* Allan V. Horwitz, 2018-09-03 A comprehensive history of PTSD Post traumatic stress disorder and its predecessor diagnoses including soldier's heart railroad spine and shell shock was recognized as a psychiatric disorder in the latter part of the nineteenth century The psychic impacts of train crashes wars and sexual shocks among children first drew psychiatric attention Later enormous numbers of soldiers suffering from battlefield traumas returned from the world wars It was not until the 1980s that PTSD became a formal diagnosis in part to recognize the intense psychic suffering of Vietnam War veterans and women with trauma related personality disorders PTSD now occupies a dominant place in not only the mental health professions but also major social institutions and mainstream culture making it the signature mental disorder of the early twenty first century In PTSD Allan V Horwitz traces the fluctuations in definitions of and responses to traumatic psychic conditions Arguing that PTSD perhaps more than any other diagnostic category is a lens for showing major historical changes in conceptions of mental illness he surveys the conditions most likely to produce traumas the results of those traumas and how to evaluate the claims of trauma victims Illuminating a number of central issues about psychic disturbances more generally including the relative importance of external stressors and internal vulnerabilities in causing mental illness the benefits and costs of mental illness labels and the influence of gender on expressions of mental disturbance PTSD is a compact yet comprehensive survey The book will appeal to diverse audiences including the educated public students across the psychological and social sciences and trauma victims who are interested in socio historical approaches to their condition Praise for Allan V Horwitz's *Anxiety A Short History* The definitive overview of the history of anxiety *Bulletin of the History of Medicine* A lucid erudite and brisk intellectual history driven by a clear and persuasive central argument *Social History of Medicine* An enlightening tour of anxiety set at a sensible pace with an exceptional scholar and writer leading the way *Library Journal*      *One Nation Under Stress* Dana Becker, 2013-02-21 Stress Everyone is talking about it suffering from it trying desperately to manage it now more than ever From 1970 to 1980 2 326 academic articles appeared with the word stress in the title In the decade

between 2000 and 2010 that number jumped to 21 750 Has life become ten times more stressful or is it the stress concept itself that has grown exponentially over the past 40 years In One Nation Under Stress Dana Becker argues that our national infatuation with the therapeutic culture has created a middle class moral imperative to manage the tensions of daily life by turning inward ignoring the social and political realities that underlie those tensions Becker shows that although stress is often associated with conditions over which people have little control workplace policies unfavorable to family life increasing economic inequality war in the age of terrorism the stress concept focuses most of our attention on how individuals react to stress A proliferation of self help books and dire medical warnings about the negative effects of stress on our physical and emotional health all place the responsibility for alleviating stress though yoga deep breathing better diet etc squarely on the individual The stress concept has come of age in a period of tectonic social and political shifts Nevertheless we persist in the all American belief that we can meet these changes by re engineering ourselves rather than tackling the root causes of stress Examining both research and popular representations of stress in cultural terms Becker traces the evolution of the social uses of the stress concept as it has been transformed into an all purpose vehicle for defining expressing and containing middle class anxieties about upheavals in American society      **Australian Mothering** Carla Pascoe Leahy, Petra Bueskens, 2020-01-28 This collection defines the field of maternal studies in Australia for the first time Leading motherhood researchers explore how mothering has evolved across Australian history as well as the joys and challenges of being a mother today The contributors cover pregnancy birth relationships childcare domestic violence time use work welfare policy and psychology from a diverse range of maternal perspectives Utilising a matricentric feminist framework Australian Mothering foregrounds the experiences emotions and perspectives of mothers to better understand how Australian motherhood has developed historically and contemporaneously Drawing upon their combined sociological and historical expertise Bueskens and Pascoe Leahy have carefully curated a collection that presents compelling research on past and present perspectives on maternity in Australia which will be relevant to researchers advocates and policy makers interested in the changing role of mothers in Australian society      Nature and Nurture in Mental Disorders Joel Paris, 2020-10-06 Over the last two decades spurred particularly by the decoding of the genome neuroscience has advanced to become the primary basis of clinical psychiatry even as environmental risk factors for mental disorders have been deemphasized In this thoroughly revised second edition of Nature and Nurture in Mental Disorders the author argues that an overreliance on biology at the expense of environment has been detrimental to the field that in fact the nature versus nurture dichotomy is unnecessary Instead he posits a biopsychosocial model that acknowledges the role an individual s predisposing genetic factors interacting with environmental stressors play in the etiology of many mental disorders The first several chapters of the book provide an overview of the theories that affect the study of genes the environment and their interaction examining what the empirical evidence has revealed about each of these issues Subsequent chapters apply the integrated model to a

variety of disorders reviewing the evidence on how genes and environment interact to shape disorders including Depressive disorders PTSD Neurodevelopmental disorders Eating disorders Personality disorders By rejecting both biological and psychosocial reductionism in favor of an interactive model Nature and Nurture in Mental Disorders offers practicing clinicians a path toward a more flexible effective treatment model And where controversy or debate still exist an extensive reference list provided at the end of the book updated for this edition to reflect the most current literature encourages further study and exploration

**Male Suicide and Masculinity in 19th-century Britain** Lyndsay Galpin, 2022-04-07 This book shows how interpretations of suicidal motives were guided by gendered expectations of behaviour and that these expectations were constructed to create meaning and understanding for family friends and witnesses Providing an insight into how people of this era understood suicidal behaviour and motives it challenges the assertion that suicide was seen as a distinctly feminine act and that men who took their own lives were feminized as a result Instead it shows that masculinity was understood in a more nuanced way than gender binaries allow and that a man's masculinity was measured against other men Focusing on four common narrative types the love suicide the unemployed suicide the suicide of the fraudster or speculator and the suicide of the dishonoured soldier it provides historical context to modern discussions about the crisis of masculinity and rising male suicide rates It reveals that narratives around male suicides are not so different today as they were then and that our modern model of masculinity can be traced back to the 19th century
