Spheres Of Influence:

Spheres of Influence Douglas S. Massey, Stefanie Brodmann, 2014-07-03 The black white divide has long haunted the United States as a driving force behind social inequality Yet the civil rights movement the increase in immigration and the restructuring of the economy in favor of the rich over the last several decades have begun to alter the contours of inequality Spheres of Influence co authored by noted social scientists Douglas S Massey and Stefanie Brodmann presents a rigorous new study of the intersections of racial and class disparities today Massey and Brodmann argue that despite the persistence of potent racial inequality class effects are drastically transforming social stratification in America This data intensive volume examines the differences in access to material symbolic and emotional resources across major racial groups The authors find that the effects of racial inequality are exacerbated by the class differences within racial groups For example when measuring family incomes solely according to race Massey and Brodmann found that black families average income measured 28 400 compared to Hispanic families 35 200 But this gap was amplified significantly when class differences within each group were taken into account With class factored in inequality across blacks and Hispanics family incomes increased by a factor of almost four with lower class black families earning an average income of only 9 300 compared to 97 000 for upper class Hispanics Massey and Brodmann found similar interactions between class and racial effects on the distribution of symbolic resources such as occupational status and emotional resources such as the presence of a biological father across racial groups Although there are racial differences in each group s access to these resources like income these disparities are even more pronounced once class is factored in The complex interactions between race and class are apparent in other social spheres such as health and education In looking at health disparities across groups Massey and Brodmann observed no single class effect on the propensity to smoke cigarettes Among whites cigarette smoking declined with rising class standing whereas among Hispanics it increased as class rose Among Asians and blacks there was no class difference at all Similarly the authors found no single effect of race alone on health Health differences between whites Asians Hispanics and blacks were small and non significant in the upper class but among those in the lower class intergroup differences were pronounced As Massey and Brodmann show in the United States a growing kaleidoscope of race class interactions has replaced pure racial and class disadvantages By advancing an ecological model of human development that considers the dynamics of race and class across multiple social spheres Spheres of Influence sheds important light on the factors that are currently driving inequality today

Spheres of Influence in International Relations Susanna Hast, 2016-04-01 Current events happening around the world especially the humanitarian interventions by NATO and the West within the context of the so called Arab Spring make the understanding of the role of spheres of influence in international politics absolutely critical Hast explores the practical implications and applications of this theory challenging the concept by using historical examples such as suzerainty and colonialism as well as the emergence of a hierarchical international order This study further connects the

English School tradition post war international order the Cold War and images of Russia with the concept of the sphere of influence to initiate debate and provide a fresh outlook on a concept which has little recent attention **Spheres of Influence and the Third World** ,1973 *LAFCO Spheres of Influence* John Martin Eells,1977 **China** Eileen Tamura,1997-01-01 China Understanding Its Past aims to fill a conspicuous gap in conventional world history texts which are often Eurocentric and give scant attention to Asia Using role playing simulations debates primary documents first person accounts excerpts from literary works and cooperative learning activities this text will help students explore many key aspects of China s history and culture The teacher s manual includes a synopsis of each chapter and section learner outcomes definitions of key concepts directions for student activities and possible responses to questions posed in the student text The CD contains selections of Chinese music from different time periods and locales Liner notes include English translations of lyrics as well as historical information about each selection **Orbital Mechanics** Howard D. Curtis,2015-07-28 Orbital mechanics is a cornerstone subject for aerospace engineering students However with its basis in classical physics and mechanics it can be a difficult and weighty subject Howard Curtis Professor of Aerospace Engineering at Embry Riddle University the US s 1 rated undergraduate aerospace school focuses on what students at undergraduate and taught masters level really need to know in this hugely valuable text Fully supported by the analytical features and computer based tools required by today s students it brings a fresh modern accessible approach to teaching and learning orbital mechanics A truly essential new resource A complete stand alone text for this core aerospace engineering subject Richly detailed up to date curriculum coverage clearly and logically developed to meet the needs of students Highly illustrated and fully supported with downloadable MATLAB algorithms for project and practical work with fully worked examples throughout Q A material and extensive homework exercises *Foundations of Clinical Nurse Specialist Practice* Janet S. Paul,Markus Kornprobst,2025 This book argues that the world entered a new cold war when Russia invaded Ukraine in 2022 While the United States and its allies are in competition with China Russia and their allies this new cold war is far different from the old cold war The New Cold War and the Remaking of Regions shows how this new competition will be multipolar and multiplex not a world separated into rigid blocs Rather secondary powers small states and even non state actors will pragmatically pick and choose when their interests intersect with the great powers preserving their flexibility and influence The new cold war will play out in regional competitions that may lead to either peaceful change or conflict but it will also vary from region to region and across sectors such as the tech economy This volume contributes to the study of regionalism in international relations and is part of a new wave of scholarship that changes the focus of international relations from great powers alone to a recognition of the agency of others Contributors address the new cold war and regional ordering processes through different theoretical perspectives realist liberal constructivist and critical approaches
