Spinoffs And Equity Carveouts:

Equity Carve-outs Jörg Endres, 2002-04-08 Inhaltsangabe Abstract As especially in the 1990s corporations today still reconsider their organisational and ownership structures to become more competitive and profitable Corporate restructuring however is not a value creating mechanism per se but it can enhance corporate flexibility and focus the company on its main line of business During a restructuring process the parent firm has several options and choosing the right one in order to be successful is probably one of the most challenging tasks for the management Options can be utilised to reduce ownership through a Carve out or eliminate involvement in a Spin off or Asset Sell off A rather unknown form the Tracking Stock will also be mentioned and explained They all added a new dimension to the corporate landscape Typically the corporation's aims of restructuring are to create shareholder value In the last two decades the tendency was to strengthen the focus on its core businesses and becoming more and more a pure player in its extreme form The potential of divestiture activities during the next years will still be very high if one imagines that only in Germany the 30 DAX companies own around 4 500 subsidiaries One particularly interesting alteration of firm boundaries involves a parent firm partially divesting its ownership stake in a subsidiary via an Equity Carve out Equity Carve outs have become widely known tools for corporations that shed divisions which are no longer part of their core business Especially during the last years high growth segments with tremendous potential could be unlocked through this form of divestiture One of the main advantages for the parent is that it can still benefit from the growth of its subsidiary by selling only a portion of the new entity in an IPO Furthermore the subsidiary can gain new resources through a capital increase and operate independently Chapter two will first give an insight about the effect of diversification on firm value and then discuss various forms of restructuring such as Spin offs Equity Carve outs and Tracking stocks The aforementioned Equity Carve out is then taken into closer consideration in chapter three which discusses why and under which circumstances and motives companies may utilise this form Thereafter chapter four shows the reader how to implement an Equity Carve out Emphasis will lie on the IPO process the legal tax and accounting issues for various countries as well as on the *Spin-offs and Equity Carve-outs* James A.
