James A. Throgmorton,1996-07 *Planning as Persuasive Storytelling* is a revealing look at the world of political conflict surrounding the Commonwealth Edison Company's ambitious nuclear power plant construction program in northern Illinois during the 1980s Examining the clash between the utility consumer groups community based groups the Illinois Commerce Commission and the City of Chicago Throgmorton argues that planning can best be thought of as a form of persuasive storytelling A planner's task is to write future oriented texts that employ language and figures of speech designed to construct constituencies that the planner's vision is both desirable and feasible Though seeking to persuade the planner must also remain open to transformation through honest engagement with contending stories Juxtaposing stories about efforts to construct Chicago's electric future *Planning as Persuasive Storytelling* suggests a shift in how we think about planning In order to account for the fragmented and conflicted nature of contemporary American life and politics that shift would be away from science and the experts and toward persuasive storytelling by diverse authors P 4 of cover **The Merchant of Power**

Planning Ethics Sue Hendler, 2018-04-17 Over the past fifty years professional understanding of planning has changed markedly In the past planning was primarily described as a technical activity involving data collection analysis and synthesis of physical plans and supporting policies Now planning is seen as a much broader set of human activities encompassing the physical world and also the realm of public and social services Not surprisingly planners discussions of ethics have evolved Professional ethics is regarded by many planners to be limited to a set of rules of behavior regarding interactions with the public sources of data government officials and one another This shift is symbolized by the evolution of the labels by which ethics is known from a circumscribed view of professional ethics to a broader concept of ethics in planning both of which are discussed in this book Sue Hendler argues that planners recognize that every act of planning pursues certain human values and is a series of statements about what we take to be right or wrong and what we take to represent the highest priorities of the society Planning Ethics explores planning within alternative moral theories including liberalism communitarianism environmentalism and feminism The contributors illustrate the application of these ethical principles in specific planning contexts encompassing community development land conversion waste management electric power planning and education planning This is the next generation of thinking on ethics and planning It will be a centerpiece of every planning curriculum
