*Quest for Performance* Laurence K. Loftin, 1985. This provides access to a NASA History Office publication NASA SP 468 by Laurence K. Loftin Jr., NASA Scientific and Technical Information Branch, Washington, D.C., 1985. It traces the technical development of the airplane since World War I. It describes significant aircraft that incorporated important technical innovations and served to shape the future course of aeronautical development, as well as aircraft that represented the state of the art of aeronautical technology in a particular time frame or that were very popular and produced in great numbers. Primary emphasis has been placed on aircraft originating in the United States. The discussion is related primarily to aircraft configuration, evolution, and associated aerodynamic characteristics, and to a lesser extent to developments in aircraft construction and propulsion. The material is presented in a manner designed to appeal to the nontechnical reader who is interested in the evolution of the airplane, as well as to students of aeronautical engineering or others with an aeronautical background.

California Kevin Starr, 2007-12-18. A California classic. California it should be remembered was very much the wild west, having to wait until 1850 before it could force its way into statehood, so what tamed it? Mr. Starr's answer is a combination of great men, great ideas, and great projects. *The Economist*. From the age of exploration to the age of Arnold, the Golden State's premier historian distills the entire sweep of California's history into one splendid volume. Kevin Starr covers it all: Spain's conquest of the native peoples of California in the early sixteenth century and the chain of missions that helped that country exert control over the upper part of the territory; the discovery of gold in January 1848; the incredible wealth of the Big Four railroad tycoons; the devastating San Francisco earthquake of 1906; the emergence of Hollywood as the world's entertainment capital and of Silicon Valley as the center of high-tech research and development; the role of labor, both organized and migrant, in key industries from agriculture to aerospace. In a rapid-fire epic of discovery, innovation, catastrophe, and triumph, Starr gathers together everything that is most important, most fascinating, and most revealing about our greatest state. *Praise for California*. A fast-paced and wide-ranging history, Starr accomplishes the feat with skill, grace, and verve. *Los Angeles Times Book Review*. Kevin Starr is one of California's greatest historians, and *California* is an invaluable contribution to our state's record and lore. *Marla Shriver*, journalist and former First Lady of California. A breeze to read. *San Francisco*.
