Organizational Action Xin-An Lu, 2003-05 There seem to be two realms in our waking time work and life However work is often juxtaposed against life which is found in anything but work Organizational work has become nothing more than the necessary evil the means for a livelihood Work has ubiquitously become the enemy of life What culprit has dichotomized work and life Public secrets Empirically based this book explores and testifies why the phenomenon of public secrets may have transformed our organizational life into a big lie to which we are all forced to subscribe against private consciousness Public secrets represent the communication phenomenon where public knowledge though tacitly acknowledged and widely espoused is never incorporated into organizational actions and daily routines As a consequence employees are not living their

organizational life with their heads and hearts but with our heels Employment with heels is the biggest un economics against time it costs wastes and debilitates it makes work the arch enemy of life Seeking the Promised Land David E.

actions in education business and government are no longer guided by conscious ideals but by entrenched practices that are products of expediency indolence and even tyranny Inveterate and ubiquitous problems abound Students hate school Employees dislike their jobs Professors become disinclined toward teaching Boredom and procrastination are everywhere There are promotion requirements such as scholarly publications by college professors that promote nothing and benefit none except to move the person into the next nominal category along the spectrum of the organizational ladder We are plagued with senseless competitive patterns and numerical evaluations that make life a mere matter of rat race the winning of which does not uplift us into the sublimity of humanity but trammel us in the degradation of being rats Essays in this book reflect on and search for answers to widespread and inveterate problems that degenerate modern life into mere livelihood Products in sober solitude rather than in the societal cacophony most essays in the book were written during the author s doctoral studies **Corporate Spirit** Amanda Porterfield, 2018 In this groundbreaking work Amanda Porterfield explores the long intertwining of religion and commerce in the history of incorporation in the United States Beginning with the antecedents of that history in western Europe she focuses on organizations to show how corporate strategies in religion and

commerce developed symbiotically and how religion has influenced the corporate structuring and commercial orientation of American society Porterfield begins her story in ancient Rome She traces the development of corporate organization through medieval Europe and Elizabethan England and then to colonial North America where organizational practices derived from religion infiltrated commerce and commerce led to political independence Left more to their own devices than under British law religious groups in the United States experienced unprecedented autonomy that facilitated new forms of communal governance and new means of broadcasting their messages As commercial enterprise expanded religious organizations grew apace helping many Americans absorb the shocks of economic turbulence and promoting new conceptions of faith spirit and will power that contributed to business Porterfield highlights the role that American religious institutions played a society increasingly dominated by commercial incorporation and free market ideologies She also shows how charitable impulses long nurtured by religion continued to stimulate reform and demand for accountability Glen Samuel Richardson,2011-08-02
