Spirituality Of The Middle Ages:

Culture and Spirituality in Medieval Europe Giles Constable, 1996 A collection of articles concentrating on culture and spirituality in the 11th and 12th centuries The cultural articles are concerned with perceptions of time and the past and entry to religious life The articles on spirituality deal with themes of suffering and attitudes towards the self **A History of Christian Spirituality: The spirituality of the Middle Ages**, 1968 **Jesus as Mother** Caroline Walker Bynum, 1984-06-13 From the Introduction by Caroline Walker Bynum The opportunity to rethink and republish several of my early articles in combination with a new essay on the thirteenth century has led me to consider the continuity both of argument and of approach that underlies them In one sense their interrelationship is obvious The first two address a question that was more in the forefront of scholarship a dozen years ago than it is today the question of differences among religious orders These two essays set out a method of reading texts for imagery and borrowings as well as for spiritual teaching in order to determine whether individuals who live in different institutional settings hold differing assumptions about the significance of their lives The essays apply the method to the broader question of differences between regular canons and monks and the narrower question of differences between one kind of monk the Cistercians and other religious groups monastic and nonmonastic of the twelfth century The third essay draws on some of the themes of the first two particularly the discussion of canonical and Cistercian conceptions of the individual brother as example to suggest an interpretation of twelfth century religious life as concerned with the nature of groups as well as with affective expression The fourth essay again on Cistercian monks elaborates themes of the first three Its subsidiary goals are to provide further evidence on distinctively Cistercian attitudes and to elaborate the Cistercian ambivalence about vocation that I delineate in the essay on conceptions of community It also raises questions that have now become popular in nonacademic as well as academic circles what significance should we give to the increase of feminine imagery in twelfth century religious writing by males Can we learn anything about distinctively male or female spiritualities from this feminization of language The fifth essay differs from the others in turning to the thirteenth century rather than the twelfth to women rather than men to detailed analysis of many themes in a few thinkers rather than one theme in many writers it is nonetheless based on the conclusions of the earlier studies The sense of monastic vocation and of the priesthood of the authority of God and self and of the significance of gender that I find in the three great mystics of late thirteenth century Helfta can be understood only against the background of the growing twelfth and thirteenth century concern for evangelism and for an approachable God which are the basic themes of the first four essays Such connections between the essays will be clear to anyone who reads them There are however deeper methodological and interpretive continuities among them that I wish to underline here For these studies constitute a plea for an approach to medieval spirituality that is not now and perhaps has never been dominant in medieval scholarship They also provide an interpretation of the religious life of the high Middle Ages that runs against the grain of

recent emphases on the emergence of lay spirituality I therefore propose to give as introduction both a discussion of recent approaches to medieval piety and a short sketch of the religious history of the twelfth and thirteenth centuries emphasizing those themes that are the context for my specific investigations I do not want to be misunderstood In providing here a discussion of approaches to and trends in medieval religion I am not claiming that the studies that follow constitute a general history nor that my method should replace that of social institutional and intellectual historians A handful of Cistercians does not typify the twelfth century nor three nuns the thirteenth Religious imagery on which I concentrate does not tell us how people lived But because these essays approach texts in a way others have not done focus on imagery others have not found important and insist as others have not insisted on comparing groups to other groups e g comparing what is peculiarly male to what is female as well as vice versa I want to call attention to my approach to and my interpretation of the high Middle Ages in the hope of encouraging others to ask similar questions

Women and Mystical Experience in the Middle Ages Frances Beer, 1992 Original and thought provoking study of three medieval women mystics based on writings and biographical material A wholly feminine voice within Catholicism they express the inexpressible better than any amount of rational thinking about God THE TIMES The three women who are the subject of this fascinating study left a rich legacy of medieval spirituality Frances Beer explores their writings and draws on available historical evidence to bring the experience of all three women closer to a 20th century audience She sees Hildegard's perception of her Creator as informed by the heroic ideal while Mechthild's erotic experience seems to show the influence of the minnesingers Julian's experience of tender intimacy with her Lord demonstrates an egalitarian confidence in the ability of the individual soul to progress towards oneness with the divine Their individual natures are also further revealed through the author's examination of their resolution of a number of theological problems In contrast the works of two medieval men writing for women are also explored

the Middle Ages David Keck, 1998-07-23 Recently angels have made a remarkable comeback in the popular imagination their real heyday however was the Middle Ages From the great shrines dedicated to Michael the Archangel at Mont St Michel and Monte Garano to the elaborate metaphysical speculations of the great thirteenth century scholastics angels dominated the physical temporal and intellectual landscape of the medieval West This book offers a full scale study of angels and angelology in the Middle Ages Seeking to discover how and why angels became so important in medieval society David Keck considers a wide range of fascinating questions such as Why do angels appear on baptismal fonts How and why did angels become normative for certain members of the church How did they become a required course of study Did popular

beliefs about angels diverge from the angelologies of the theologians Why did some heretics claim to derive their authority from heavenly spirits Keck spreads his net wide in the attempt to catch traces of angels and angelic beliefs in as many portions of the medieval world as possible Metaphysics and mystery plays prayers and pilgrimages Cathars and cathedrals all these and many more disparate sources taken together reveal a society deeply engaged with angels on all its levels and in some unlikely ways

Mental Health, Spirituality, and Religion in the Middle Ages and Early Modern Age Albrecht Classen, 2014-07-28 This volume continues the critical exploration of fundamental issues in the medieval and early modern world here concerning mental health spirituality melancholy mystical visions medicine and well being The contributors who originally had presented their research at a symposium at The University of Arizona in May 2013 explore a wide range of approaches and materials pertinent to these issues taking us from the early Middle Ages to the eighteenth century capping the volume with some reflections on the relevance of religion today Lapidary sciences matter here as much as medical psychological research combined with literary and art historical approaches The premodern understanding of mental health is not taken as a miraculous panacea for modern problems but the contributors suggest that medieval and early modern writers scientists and artists commanded a considerable amount of arcane sometimes curious and speculative knowledge that promises to be of value and relevance even for us today once again Modern palliative medicine finds for instance intriguing parallels in medieval word magic and the mystical perspectives encapsulated highly productive alternative perceptions of the macrocosm and microcosm that promise to be insightful and important also for the post modern world
