Lam,2004-04-06 The Hindu Arabic numeral system 1 2 3 is one of mankind s greatest achievements and one of its most commonly used inventions How did it originate Those who have written about the numeral system have hypothesized that it originated in India however there is little evidence to support this claim This book provides considerable evidence to show that the Hindu Arabic numeral system despite its commonly accepted name has its origins in the Chinese rod numeral system This system was widely used in China from antiquity till the 16th century It was used by officials astronomers traders and others to perform addition subtraction multiplication division and other arithmetic operations and also used by mathematicians to develop arithmetic and algebra Based on this system numerous mathematical treatises were written Sun Zi suanjing The Mathematical Classic of Sun Zi written around 400 AD is the earliest existing work to have a description of the rod numerals and their operations With this treatise as a central reference the first part of the book discusses the development of arithmetic and the beginnings of algebra in ancient China and on the basis of this knowledge advances the thesis that the Hindu Arabic numeral system has its origins in the rod numeral system Part Two gives a complete translation of Sun Zi suanjing In this revised edition Lam Lay Yong has included an edited text of her plenary lecture entitled Ancient Chinese Mathematics and Its Influence on World Mathematics which was delivered at the International Congress of Mathematicians Beijing 2002 after she received the prestigious Kenneth O May Medal conferred by the International Commission on the History of Mathematics This should serve as a useful and easy to comprehend introduction to the book
