Splintered Reflections Images Of The Body In Trauma:

Splintered Reflections Jean Goodwin,Reina Attias,1999-06-23 In overwhelming trauma when words fail it is the body that begins to speak How can clinicians listen to the body and understand its messages This book is both a detailed review of the body symptoms and body image distortions found after trauma and a textbook of psychotherapy techniques to repair broken metaphors about the body so that the body self and its functioning can be restored Multiple theoretical perspectives Freudian psychoanalytic theory attachment theory trauma theory are synthesized to shape an interlocking framework within which the therapist can listen and stay with the messages from the patient s body The reader is guided by detailed clinical examples drawn from an international group of trauma therapists that includes Barry Cohen Richard Kluft Bruce Perry Valerie Sinason and Onno van der Hart

The Posttraumatic Self John P. Wilson,2007-12-11 Filling a gap that exists in most traumatology literature The Posttraumatic Self provides an optimistic analysis of the aftermath of a traumatic event This work appreciates the potentially positive effects of trauma and links those effects to the discovery of one s identity character and purpose Wilson and his distinguished contributors explore the nature and dynamics of the posttraumatic self emphasising human resilience and prompting continued optimal functioning While taking into consideration pathological consequences such as posttraumatic stress disorder PTSD the authors study the impacts a traumatic event can have on one s inner self and they help the victims transform such an event into healthy self transcendent lifecycles The Posttraumatic Self will help victims and healers transform the way they deal with the complexities of trauma by making important connections that will allow for healing and growth

Trauma and the Body: A Sensorimotor Approach to Psychotherapy (Norton Series on Interpersonal Neurobiology) Kekuni Minton,Pat Ogden,Clare Pain,2006-10-17 The body for a host of reasons has been left out of the talking cure Psychotherapists who have been trained in models of psychodynamic psychoanalytic or cognitive therapeutic approaches are skilled at listening to the language and affect of the client They track the clients associations fantasies and signs of psychic conflict distress and defenses Yet while the majority of therapists are trained to notice the appearance and even the movements of the client s body thoughtful engagement with the client s embodied experience has remained peripheral to traditional therapeutic interventions Trauma and the Body is a detailed review of research in neuroscience trauma dissociation and attachment theory that points to the need for an integrative mind body approach to trauma The premise of this book is that by adding body oriented interventions to their repertoire traditionally trained therapists can increase the depth and efficacy of their clinical work Sensorimotor psychotherapy is an approach that builds on traditional psychotherapeutic understanding but includes the body as central in the therapeutic field of awareness using observational skills theories and interventions not usually practiced in psychodynamic psychotherapy By synthesizing bottom up and top down interventions the authors combine the best of both worlds to help chronically traumatized clients find resolution and meaning in their lives and develop a new somatically integrated sense of self Topics addressed include

Cognitive emotional and sensorimotor dimensions of information processing modulating arousal dyadic regulation and the body the orienting response defensive subsystems adaptation and action systems treatment principles skills for working with the body in present time developing somatic resources for stabilization processing

Trauma-Informed Practice in Montessori Classrooms Bernadette Phillips,Catriona O'Toole,Sinéad McGilloway,Stephen Phillips,2024-12-12 Trauma Informed Practice in Montessori Classrooms provides important historical and contemporary evidence of the potential for Montessori schools to act as healing environments for children and young people Drawing upon fascinating archival evidence and contemporary trauma theory it shows how authentic Montessori schools already have the infrastructure to promote and embed trauma informed practice TIP in their classrooms The book provides cutting edge interdisciplinary knowledge on trauma and highlights its potential to negatively impact the emotional social and cognitive functioning of children and young people It explains clearly and precisely the principles of TIP and how historically these were woven into the fabric of the early Montessori schools resulting in their reputation as Case della Salute or Health Homes The book shows how this almost forgotten healing element of Montessori schools can be revived harnessed and promoted in ways that would benefit the overall health and well being of children and young people This timely book is highly informative hugely practical and reader friendly It includes features such as boxed chapter objectives learner outcomes vignettes chapter summaries and questions for group discussion It provides an invaluable guide for Montessori teachers and students for home educators using the Montessori approach and for non Montessori educators and parents

Traumatic Dissociation Eric Vermetten,Martin J. Dorahy,David Spiegel,2007-05-03 Traumatic Dissociation Neurobiology and Treatment offers an advanced introduction to this symptom process and pattern of personality organization seen in several trauma related disorders including acute stress disorder posttraumatic stress disorder PTSD and the dissociative disorders Our understanding of traumatic dissociation has recently been advanced by neuroimaging technology empirically based investigation and an acknowledgment of its importance in psychopathology The authors of this volume tie these findings together tracking the condition from its earliest historical conceptualization to its most recent neurobiological understanding to provide even greater insight into traumatic dissociation and its treatment Bringing together for the first time theoretical cognitive and neurobiological perspectives on traumatic dissociation this volume is designed to provide both empirical and therapeutic insights by drawing on the work of many of the main contributors to the field Opening chapters examine historical conceptual and theoretical issues and how other fields such as cognitive psychology have been applied to the study of traumatic dissociation The following section focuses specifically on how neurobiological investigations have deepened our understanding of dissociation and concluding chapters explore issues pertinent to the assessment and treatment of traumatic dissociation The interacting effects of traumatic experience developmental history neurobiological function and specific vulnerabilities to dissociative processes that underlie the occurrence of traumatic dissociation are among some of the key issues covered The book s significant

contributions include A review of cognitive experimental findings on attention and memory functioning in dissociative identity disorder An appreciation of how the literature on hypnosis provides a greater understanding of perceptual processing and traumatic stress Ascertaining symptoms of dissociation in a military setting and in other situations of extreme stress An outline of key issues for planning assessment of traumatic dissociation including a critique of its primary empirically supported standardized measures An examination of the association between child abuse or neglect and the development of eating disorders suggesting ways to therapeutically deal with negative body experience to reduce events that trigger dissociation A description of neuroendocrine alterations associated with stress pointing toward a better understanding of the developmental effects of deprivation and trauma on PTSD and dissociation A review of the relation of attachment and dissociation A discussion of new research findings in the neuroimaging of dissociation and a link between cerebellar functioning and specific peritraumatic experiences Useful as a clinical reference or as ancillary textbook

Traumatic Dissociation reorganizes phenomenological observations that have been overlooked misunderstood or neglected in traditional training The research and clinical experience described here will provide the basis for further clinical and theoretical formulations of traumatic dissociation and will advance empirical examination and treatment of the phenomenon

Caregivers, Trauma and the Road to Resiliency Susan Cooney, 2003-08 The early 1970 s might have been the most appropriate time in America s history to set up a radio news network for and about Blacks in the United States more appropriate than any other time in the 20th century The riots of the 1960 s which had been installed as a legitimate dynamic of the Civil Rights Movement were for the most part a thing of the past The urban pockets of disfranchised citizens were no longer ablaze but the ashes were still smoldering And everybody from the President to the Pope and those in between knew this condition could not be trusted to remain status quo without progressive maintenance Answering this call to duty was two young and ambitious black men in New York City the headquarters location of all the major broadcast networks at that time Eugene Jackson an engineer with an MBA and Sydney Small a business major along with Del Raycee a consummate veteran from the grandfather of all radio networks Mutual Broadcasting formed the National Black Network under a parent company called Unity Broadcasting Inc Can t get HERE from THERE picks up the story from the initial broadcast July 1973 This is where the author joined the group and served as chief operator of the broadcast division through its demise nearly twenty years later Among the pertinent discussions undertaken in the book are The benign neglect posture maintained by major national advertisers and their ad agencies with regards to entering contracts with black owned media companies The struggles to have white owners of radio stations programmed for black audiences understand the need for news of a different approach Blacks owned scarcely more than ten radio stations when the network was formed Profiles of the network s starting line up of personnel and its creative approach to programming for the target audience The pros and cons of in house politics and their long range affect on the company and the ownership team And the scarcity of trained personnel as was needed for this project Special projects which included the participation of celebrities such as Ossie Davis Ruby Dee Bill Cosby and political luminaries like President Jimmy Carter Congressman Andy Young Rev Jesse Jackson Presidential Cabinet Member Arthur Fletcher et al The final chapter is devoted entirely to NBN s dealings with fight promoter Don King in the network s effort to bring back big time boxing to radio After three fights featuring Mike Tyson and his opponents were heard in many parts of the world the agreement began crumbling Many of the topics broached herein are treated to some degree as human interest episodes This should by no means raise any questions as to the veracity of the conditions and circumstances as noted

The Psychobiology of Trauma and Resilience Across the Lifespan Douglas L. Delahanty, 2008-09-05 Research has suggested that childhood experiences confer risk resilience for reactions to trauma in adulthood and predictors and correlates of posttraumatic stress disorder PTSD appear to differ developmentally Research in PTSD has typically been conducted by either child or adult researchers

with relatively little overlap or communication between the two camps Developmental models of PTSD are necessary to fully understand the complex constellation of responses to trauma across the lifespan Such models can inform study designs and lead to novel developmentally appropriate interventions To this end this book is organized in such a way as to present and integrate research into child adult and older adult trauma samples in an attempt to culminate in a testable model of PTSD risk and resilience across the lifespan Each author incorporates a developmental slant to their individual chapter and the chapters are organized to highlight potential differences in our understanding of risk and resiliency between children and adults Initial chapters concerning pre and peri traumatic risk factors for PTSD lead into chapters reviewing specific risk and resilience factors in adults and children Additional chapters focus on the impact of childhood trauma on adult functioning and the biology of PTSD in children adults and older adults As PTSD rarely occurs in a pure form specific chapters focus on the impact of comorbid disorders in our understanding of PTSD and the final chapters consider both psychosocial and pharmacological treatments for PTSD in children and adults

Treating Chronically Traumatized Children

Arianne Struik, 2014-04-16 Professionals working with traumatized children are often asked whether it would be better to let sleeping dogs lie because the child may not be ready to discuss their experiences and out of fear that they may become further distressed or disturbed In *Treating Chronically Traumatized Children* Arianne Struik presents the case for waking those sleeping dogs in a safe and structured environment in order to allow the healing process to begin and prevent trauma later in life Struik has developed a method for those cases labelled most difficult to treat involving deregulated traumatized children who refuse to talk about their memories or claim to have forgotten them completely It incorporates factors in the child's environment and network to ensure that they are safe and secure before beginning the process and stable throughout treatment Downloadable worksheets enhance the book's content and make each section straightforward to work through supporting the child through the stabilization processing and integration phases of treatment Illustrated throughout by case studies and comprehensive explanation of the theory and the treatment method *Treating Chronically Traumatized Children* is clear and accessible and is ideal for psychologists psychiatrists psychotherapists and counsellors as well as parents and anyone working with chronically traumatized children and adolescents

Serial Selves

Frederik Byrn Køhlert, 2019-03-15 Autobiography is one of the most dynamic and quickly growing genres in contemporary comics and graphic narratives In *Serial Selves* Frederik Byrn Køhlert examines the genre's potential for representing lives and perspectives that have been socially marginalized or excluded With a focus on the comics form's ability to produce alternative and challenging autobiographical narratives thematic chapters investigate the work of artists writing from perspectives of marginality including gender sexuality disability and race as well as trauma Interdisciplinary in scope and attuned to theories and methods from both literary and visual studies the book provides detailed formal analysis to show that the highly personal and hand drawn aesthetics of comics can help artists push against established narrative and visual conventions and in the

process invent new ways of seeing and being seen As the first comparative study of how comics artists from a wide range of backgrounds use the form to write and draw themselves into cultural visibility *Serial Selves* will be of interest to anyone interested in the current boom in autobiographical comics as well as issues of representation in comics and visual culture more broadly

Dissociation, Mindfulness, and Creative Meditations Christine C. Forner, 2017-02-10 *Dissociation Mindfulness and Creative Meditations* explores the potential of mindfulness and explains why this level of developmental human achievement is so precarious within traumatic stress especially traumatic dissociation Chapters discuss the connection and disconnection between mindfulness and dissociative disorders and highlight the importance of gently creating a mindfulness practice for traumatized individuals Readers will learn how to exercise the part of the brain that is responsible for mindfulness and how to regulate the part that is responsible for dissociation and they ll come away from the book with tips that will help even the most dissociative client to reap the benefits of mindfulness practices

child's life **Integrating Body Self & Psychological Self** David W. Krueger, 2013-10-17 David W. Krueger illustrates a novel synthesis of fundamental psychodynamic principles with evolving advances in developmental self neuropsychological and attachment theories. Focusing on action symptoms, self-object experiences, gender issues, embodiment, somatic symptoms, affect regulation, and ego states, the theoretical innovations are illustrated by vivid case material. He introduces treatment inroads enabling clinicians to hear and articulate arcane messages spoken in metaphor, actualized in symptoms and encrypted in the body. A fresh conceptualization from an original thinker, *Integrating Body Self and Psychological Self* broadens our understanding of the mind and body interplay in the clinical exchange.
