

6 Key Components of Conversational User Interfaces

Natural Language Processing (NLP)

Understands human language and interprets input

Machine learning (ML)

Enables learning and improvement over time

Dialogue management

Manages conversation flow and context

Speech recognition

Converts spoken words to text

Text-to-speech and speech-to-text

Convert text into spoken words and vice versa

User interface design

Creates intuitive interfaces for easy interaction

Spoken Dialogue Technology Towards The Conversational User Interface

Michael F. McTear

Spoken Dialogue Technology Towards The Conversational User Interface:

Spoken Dialogue Technology Michael F. McTear, 2004-09-09 Spoken Dialogue Technology provides extensive coverage of spoken dialogue systems ranging from the theoretical underpinnings of the study of dialogue through to a detailed look at a number of well established methods and tools for developing spoken dialogue systems The book enables students and practitioners to design and test dialogue systems using several available development environments and languages including the CSLU toolkit VoiceXML SALT and XHTML voice This practical orientation is usually available otherwise only in reference manuals supplied with software development kits The latest research in spoken dialogue systems is presented along with extensive coverage of the most relevant theoretical issues and a critical evaluation of current research prototypes A dedicated web site containing supplementary materials code links to resources will enable readers to develop and test their own systems Previously such materials have been difficult to track down available only on a range of disparate web sites and this web site provides a unique and useful reference source which will prove invaluable

Conversational AI Michael McTear, 2022-05-31 This book provides a comprehensive introduction to Conversational AI While the idea of interacting with a computer using voice or text goes back a long way it is only in recent years that this idea has become a reality with the emergence of digital personal assistants smart speakers and chatbots Advances in AI particularly in deep learning along with the availability of massive computing power and vast amounts of data have led to a new generation of dialogue systems and conversational interfaces Current research in Conversational AI focuses mainly on the application of machine learning and statistical data driven approaches to the development of dialogue systems However it is important to be aware of previous achievements in dialogue technology and to consider to what extent they might be relevant to current research and development Three main approaches to the development of dialogue systems are reviewed rule based systems that are handcrafted using best practice guidelines statistical data driven systems based on machine learning and neural dialogue systems based on end to end

learning Evaluating the performance and usability of dialogue systems has become an important topic in its own right and a variety of evaluation metrics and frameworks are described Finally a number of challenges for future research are considered including multimodality in dialogue systems visual dialogue data efficient dialogue model learning using knowledge graphs discourse and dialogue phenomena hybrid approaches to dialogue systems development dialogue with social robots and in the Internet of Things and social and ethical issues

The Conversational Interface Michael McTear,Zoraida Callejas,David Griol,2016-05-19 This book provides a comprehensive introduction to the conversational interface which is becoming the main mode of interaction with virtual personal assistants smart devices various types of wearable and social robots The book consists of four parts Part I presents the background to conversational interfaces examining past and present work on spoken language interaction with computers Part II covers the various technologies that are required to build a conversational interface along with practical chapters and exercises using open source tools Part III looks at interactions with smart devices wearables and robots and discusses the role of emotion and personality in the conversational interface Part IV examines methods for evaluating conversational interfaces and discusses future directions

Spoken, Multilingual and Multimodal Dialogue Systems Ramon Lopez Cozar Delgado,Masahiro Araki,2007-01-11 Dialogue systems are a very appealing technology with an extraordinary future Spoken Multilingual and Multimodal Dialogues Systems Development and Assessment addresses the great demand for information about the development of advanced dialogue systems combining speech with other modalities under a multilingual framework It aims to give a systematic overview of dialogue systems and recent advances in the practical application of spoken dialogue systems Spoken Dialogue Systems are computer based systems developed to provide information and carry out simple tasks using speech as the interaction mode Examples include travel information and reservation weather forecast information directory information and product order Multimodal Dialogue Systems aim to overcome the limitations of spoken dialogue systems which use speech as the only communication means while Multilingual Systems allow interaction with users that speak different languages Presents a clear snapshot of the structure of a standard dialogue system by addressing its key components in the context of multilingual and multimodal interaction and the assessment of spoken multilingual and multimodal systems In addition to the fundamentals of the technologies employed the development and evaluation of these systems are described Highlights recent advances in the practical application of spoken dialogue systems This comprehensive overview is a must for graduate students and academics in the fields of speech recognition speech synthesis speech processing language and human computer interaction technology It will also prove to be a valuable resource to system developers working in these areas

Conversational Agents and Natural Language Interaction: Techniques and Effective Practices Perez-Marin, Diana,Pascual-Nieto, Ismael,2011-06-30 This book is a reference guide for researchers entering the promising field of conversational agents providing an introduction to fundamental concepts in the field collecting experiences of researchers

working on conversational agents and reviewing techniques for the design and application of conversational agents

International Symposium on Distributed Computing and Artificial Intelligence Ajith Abraham, Juan Manuel Corchado Rodríguez, Sara Rodríguez González, Juan F. de Paz Santana, 2011-03-29 The International Symposium on Distributed Computing and Artificial Intelligence 2011 DCAI 2011 is a stimulating and productive forum where the scientific community can work towards future cooperation on Distributed Computing and Artificial Intelligence areas This conference is the forum in which to present application of innovative techniques to complex problems Artificial intelligence is changing our society Its application in distributed environments such as internet electronic commerce environment monitoring mobile communications wireless devices distributed computing to cite some is continuously increasing becoming an element of high added value with social and economic potential both industry life quality and research These technologies are changing constantly as a result of the large research and technical effort being undertaken in universities companies The exchange of ideas between scientists and technicians from both academic and industry is essential to facilitate the development of systems that meet the demands of today s society This edition of DCAI brings together past experience current work and promising future trends associated with distributed computing artificial intelligence and their application to provide efficient solutions to real problems This symposium is organized by the Bioinformatics Intelligent System and Educational Technology Research Group <http://bisite.usal.es> of the University of Salamanca The present edition has been held in Salamanca Spain from 6 to 8 April 2011

New Frontiers in Artificial Intelligence Takashi Washio, Akito Sakurai, Katsuto Nakajima, Hideaki Takeda, Satoshi Tojo, Makoto Yokoo, 2006-06-27 This book presents the joint post proceedings of five international workshops organized by the Japanese Society for Artificial Intelligence during the 19th Annual Conference JSAI 2005 The volume includes 5 award winning papers of the main conference along with 40 revised full workshop papers covering such topics as logic and engineering of natural language semantics learning with logics agent network dynamics and intelligence conversational informatics and risk management systems with intelligent data analysis

Advanced Technological Solutions for E-Health and Dementia Patient Monitoring Xhafa, Fatos, 2015-01-31 Mental health is a growing field but one still limited by a lack of prior research and challenged by increased demand for new solutions and treatments Mobile and web based technologies have the potential to fill some of the gaps Advanced Technological Solutions for E Health and Dementia Patient Monitoring provides comprehensive coverage of issues in patient health and support from the perspectives of doctors nurses patients and caregivers With its focus on challenges and opportunities as well as future research in the field this book is a vital reference for researchers scholars advanced students software developers managers and stakeholders working at the forefront of e health systems
