The Hidden Dimension Edward T. Hall, 1969 **The Routledge Companion to the Sound of Space** Emma-Kate Matthews, Jane Burry, Mark Burry, 2024-11-11 This companion explores a range of conceptual and practical relationships between sound and space across various disciplines providing insights from technical creative cultural political philosophical psychological and physiological perspectives The content spans a wide range of spatial typologies from large reverberant buildings to modest and intimate ones from external public squares to domestic interiors and from naturally formed environments to highly engineered spaces These compiled insights and observations explore the vast diversity of ways in which sonic and spatial realms interact This publication therefore forms important bridges between the intricate and diverse topics of technology philosophy composition performance and spatial design to contemplate the potential of sound and space as tools for creative expression and communication as well as for technical innovation It is hoped that by sharing these insights this book will inspire practitioners scholars and enthusiasts to incorporate new perspectives and methodologies into their own work Through a rich blend of theory practice and critical reflection this volume serves as a valuable resource for anyone interested in exploring the intricacy of relationships between space and sound whether they are students professionals or simply curious Our companion provides a cross section through shared territories between sonic and spatial disciplines from architecture engineering sound design music composition and performance urban design product design and much more **The Hidden Dimension** Edward Twitchell Hall, 1969 An examination of various cultural concepts of space and how differences among them affect modern society Introducing the science of proxemics Hall demonstrates how man s use of space can affect personal business relations cross cultural exchanges architecture city planning and urban renewal

Dr. Calhoun's Mousery Lee Alan Dugatkin, 2024-10-03 A bizarre and compelling biography of a scientist and his work using rodent cities to question the potential catastrophes of human overpopulation It was the strangest of experiments What began as a utopian environment where mice had sumptuous accommodations had all the food and water they could want and were free from disease and predators turned into a mouse hell Science writer and animal behaviorist Lee Alan Dugatkin introduces readers to the peculiar work of rodent researcher John Bumpass Calhoun In this enthralling tale Dugatkin shows how an ecologist turned psychologist turned futurist became a science rock star embedded in the culture of the 1960s and 1970s As interest grew in his rodent cities Calhoun was courted by city planners and his work was reflected in everything from Tom Wolfe s hard hitting writing to the children s book Mrs Frisby and the Rats of NIMH He was invited to meetings with the Royal Society and the pope and taken seriously when he proposed a worldwide cybernetic brain a decade before others made the internet a reality Readers see how Calhoun s experiments rodent apartment complexes like Mouse Universe 25 led to his concept of behavioral sinks with real effects on public policy discussions Overpopulation in Calhoun s mouse and rat complexes led to the loss of sex drive the absence of maternal care and a class of automatons that included the beautiful

ones who spent their time grooming themselves while shunning socialization Calhoun and those who followed his work saw the collapse of this mouse population as a harbinger of the ill effects of an overpopulated human world Drawing on previously unpublished archival research and interviews with Calhoun's family and former colleagues Dugatkin offers a riveting account of an intriguing scientific figure Considering Dr Calhoun's experiments he explores the changing nature of scientific research and delves into what the study of animal behavior can teach us about ourselves **The Sociology of Space** Martina

Löw,2016-09-09 In this book the author develops a relational concept of space that encompasses social structure the material world of objects and bodies and the symbolic dimension of the social world L w s guiding principle is the assumption that space emerges in the interplay between objects structures and actions Based on a critical discussion of classic theories of space L w develops a new dynamic theory of space that accounts for the relational context in which space is constituted This innovative view on the interdependency of material social and symbolic dimensions of space also permits a new perspective on architecture and urban development Transforming Public Space through Play Gregor Mews,2022-04-21 This book

provides an empirical analysis of the concept of play as a form of spatial practice in urban public spaces The introduced City Play Framework CPF is a practical urban analysis tool that allows urban designers landscape architects and researchers to develop a shared awareness when opening up this window of possibility for adventure Two case studies substantiate and illustrate the development process and testing of the framework in Canberra Australia and Potsdam Germany The appropriation of public spaces that transcend boundaries can facilitate an intrinsic connection between people and their immediate environment towards a more joyful ontological state of human existence in which imagination co creation and a sense of agency are key elements of the design approach The framework presents an alternative understanding of public spaces and public life reflecting on theory and its implications for practice in a post pandemic world in dense urban centres A bridge between theory and practice this book explores possibilities on what future design ought to be when openness and ambiguity are consciously integrated parts of practice and process The book presents a valuable discussion on public space and play for academic audiences across a wide range of disciplines such as landscape architecture urban design planning architecture and urban sociology which is informative for future practice *People-Centered Architecture* Milton

Human Scale Revisited Kirkpatrick Sale,2017-04-15 Big government big business big everything Kirkpatrick Sale took giantism to task in his 1980 classic *Human Scale* and today takes a new look at how the

crises that imperil modern America are the inevitable result of bigness grown out of control and what can be done about it. The result is a keenly updated carefully argued case for bringing human endeavors back to scales we can comprehend and manage whether in our built environments our politics our business endeavors our energy plans or our mobility. Sale walks readers back through history to a time when buildings were scaled to the human figure as was the Parthenon democracies were scaled to the societies they served and enterprise was scaled to communities. Against that backdrop he dissects the bigger is better paradigm that has defined modern times and brought civilization to a crisis point. Says Sale retreating from our calamity will take rebalancing our relationship to the environment adopting more human scale technologies right sizing our buildings communities and cities and bringing our critical services from energy food and garbage collection to transportation health and education back to human scale as well. Like *Small is Beautiful* by E F Schumacher *Human Scale* has long been a classic of modern decentralist thought and communitarian values a key tool in the kit of those trying to localize create meaningful governance in bioregions or rethink our reverence of and dependence on growth financially and otherwise. Rewritten to interpret the past few decades *Human Scale* offers compelling new insights on how to turn away from the giantism that has caused escalating ecological distress and inequality dysfunctional governments and unending warfare and shines a light on many possible pathways that could allow us to scale down survive and thrive.

Ethics in Design and Communication Laura Scherling, Andrew DeRosa, 2020-02-20 This timely collection brings together critical analytic historical and practical studies to address what ethics means in the practice of design. Designers face the same challenges as everyone else in the complex conditions of contemporary cultural life choices about consumption waste exploitation ecological damage and political problems built into the supply chains on which the global systems of inequity currently balance precariously. But designers face the additional dilemma that their paid work is often entangled with promoting the same systems such critical approaches seek to redress how to reconcile this contradiction among others in seeking to chart an ethical course of action while still functioning effectively in the world. *Ethics in Design and Communication* acknowledges the complexity of this subject matter while also demonstrating that in the ongoing struggle towards an equitable and sustainable world the talents of design and critical thought are essential. Featured case studies include graphic design internships today the dark web and media coverage of the 2016 US presidential election. The fact that within this book such a wide array of practitioners scholars critics and professionals commit to addressing current injustices is already a positive sign. Nonetheless it is essential that we guard against confusing the coercive force of moral imperatives with ethical deliberation when conceiving a foundation for action.

Musical Intimacy Zack Stiegler, Todd Campbell, 2023-08-10 Discourse on popular music frequently describes artists recordings and performances as intimate. Yet that discourse often stops short of elucidating how a mass produced commodity such as popular music is able to elicit feelings of intimacy with and among its audience. Through detailed analysis of popular music's composition performance production and promotion *Musical Intimacy* examines how intimacy is constructed and

perceived in popular music via its affective and technological affordances From the recording studio to the concert stage from collective experience to individual listening and perception this book presents a working understanding of musical intimacy

Human-Computer Interaction Constantine Stephanidis, Gavriel Salvendy, 2024-09-28 The pervasive influence of technology continuously shapes our daily lives From smartphones to smart homes technology is revolutionizing the way we live work and interact with each other Human computer interaction HCI is a multidisciplinary

research field focusing on the study of people interacting with information technology and plays a critical role in the development of computing systems that work well for the people using them ensuring the seamless integration of interactive systems into our technologically driven lifestyles The book series contains six volumes providing extensive coverage of the field wherein each one addresses different theoretical and practical aspects of the HCI discipline Readers will discover a wealth of information encompassing the foundational elements state of the art review in established and emerging domains analysis of contemporary advancements brought about by the evolution of interactive technologies and artificial intelligence as well as the emergence of diverse societal needs and application domains These books Showcase the pivotal role of HCI in designing interactive applications across a diverse array of domains Explore the dynamic relationship between humans and intelligent environments with a specific emphasis on the role of Artificial Intelligence AI and the Internet of Things IoT Provide an extensive exploration of interaction design by examining a wide range of technologies interaction techniques styles and devices Discuss user experience methods and tools for the design of user friendly products and services Bridge the gap between software engineering and human computer interaction practices for usability inclusion and sustainability These volumes are an essential read for individuals interested in human computer interaction research and applications

Playing with Mental Models Henri de Jongste, 2020-06-03 In this book the author uses a mental model theory of communication to investigate the acclaimed British situation comedy The Office The approach taken is multi disciplinary and focuses on questions as What are mental models and what role do they play in communication in general and in creating and watching The Office in particular Whose mental models are involved in creating and watching The Office How do these mental models relate to each other How exactly do the creators of The Office and their audience engage in constructing exchanging and coordinating mental models How do mental models and their comic use relate to humour and humour theories and what is the nature of play in the deployment of mental models in comedy The book is aimed at humour scholars from various backgrounds and at people interested in communication in general

Interaction Techniques and Technologies in Human-Computer Interaction Constantine Stephanidis, Gavriel Salvendy, 2024-08-30 This book offers a thorough exploration of interaction design by examining various technologies interaction techniques styles and devices This book Assists readers in acquiring a deep understanding of diverse ways humans interact with computer technologies and in selecting the most suitable approach for various interactive scenarios Introduces cutting edge interaction techniques including multimodal and gesture based interaction wearables haptic speech and sound based interaction embodied interaction and more Advances beyond traditional interfaces to large and multiscreen interactions proxemics brain computer interfaces affective computing and Extended Reality This book will appeal to individuals interested in Human Computer Interaction research and applications

Understanding Social Signals: How Do We Recognize the Intentions of Others? Sebastian Loth, Jan P. De Ruiter, 2016-05-30 Powerful and economic sensors such as high definition cameras and corresponding recognition software

have become readily available e.g. for face and motion recognition. However, designing user interfaces for robots, phones and computers that facilitate a seamless, intuitive and apparently effortless communication as between humans is still highly challenging. This has shifted the focus from developing ever faster and higher resolution sensors to interpreting available sensor data for understanding social signals and recognising users' intentions. Psychologists, Ethnologists, Linguists and Sociologists have investigated social behaviour in human-human interaction. But their findings are rarely applied in the human-robot interaction domain. Instead, robot designers tend to rely on either proof of concept or machine learning based methods. In proving the concept, developers effectively demonstrate that users are able to adapt to robots deployed in the public space. Typically, an initial period of collecting human-robot interaction data is used for identifying frequently occurring problems. These are then addressed by adjusting the interaction policies on the basis of the collected data. However, the updated policies are strongly biased by the initial design of the robot and might not reflect natural, spontaneous user behaviour. In the machine learning approach, learning algorithms are used for finding a mapping between the sensor data space and a hypothesised or estimated set of intentions. However, this brute force approach ignores the possibility that some signals or modalities are superfluous or even disruptive in intention recognition. Furthermore, this method is very sensitive to peculiarities of the training data. In sum, both methods cannot reliably support natural interaction as they crucially depend on an accurate model of human intention recognition. Therefore, approaches to social robotics from engineers and computer scientists urgently have to be informed by studies of intention recognition in natural human-human communication. Combining the investigation of natural human behaviour and the design of computer and robot interfaces can significantly improve the usability of modern technology. For example, robots will be easier to use by a broad public if they can interpret the social signals that users spontaneously produce for conveying their intentions anyway. By correctly identifying and even anticipating the user's intention, the user will perceive that the system truly understands her/his needs. Vice versa, if a robot produces socially appropriate signals, it will be easier for its users to understand the robot's intentions. Furthermore, studying natural behaviour as a basis for controlling robots and other devices results in greater robustness, responsiveness and approachability. Thus, we welcome submissions that:

- a) investigate how relevant social signals can be identified in human behaviour
- b) investigate the meaning of social signals in a specific context or task
- c) identify the minimal set of intentions for describing a context or task
- d) demonstrate how insights from the analysis of social behaviour can improve a robot's capabilities
- e) demonstrate how a robot can make itself more understandable to the user by producing more human-like social signals

Landscape Architecture as Storytelling Bob Scarfo, 2022-11-30. This book introduces students, practitioners and laypeople to a comfortable approach to learning landscape architectural design, free of design jargon and derived from their existing knowledge. A step-by-step process has readers consider their knowledge of language as metaphorically related to basic design and landscape design. Through information delivery and questioning processes, readers

build on what they already know their tacit understanding of language as applied to problem solving and storytelling
Everyone is a storyteller Taken one step at a time through a three tiered analogy of language basic design and landscape design readers learn the makeup and role of such design features as points lines planes volumes and sequential volumetric spaces that make up their worlds With that in a sense new world view and numerous questions and examples readers begin to see that they in fact daily read the environments in which they live work play raise families and grow old Once they realize how they read their surroundings they are helped to recognize that they can build narratives into their surroundings At that point the existence of authored landscape narratives finds readers understanding a design process that relies on the designer as author landscape as text and participant user as reader That process has the reader write a first or second person narrative visually interpret the written narrative into a storyboard and turn the storyboard into a final design the physical makeup of which is read by those who participate in it

The Top Books of the Year The Hidden Dimension An Anthropologist Examines Mans Use Of Space In Public And Private The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous engrossing novels captivating the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the engaging narratives that have charmed audiences this year. The Hidden Dimension An Anthropologist Examines Mans Use Of Space In Public And Private : Colleen Hoover "It Ends with Us" This heartfelt tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and suspenseful novel that will keep you speculating until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
