DuBois, Dan Ringgaard, 2017-12-15 *Nordic Literature A comparative history* is a multi volume comparative analysis of the literature of the Nordic region Bringing together the literature of Finland continental Scandinavia Sweden Norway Denmark and S pm and the insular region Iceland Greenland and the Faroe Islands each volume of this three volume project adopts a new frame through which one can recognize and analyze significant clusters of literary practice This first volume *Spatial nodes* devotes its attention to the changing literary figurations of space by Nordic writers from medieval to contemporary times Organized around the depiction of various scapes and spatial practices at home and abroad this approach to Nordic literature stretches existing notions of temporally linear nationally centered literary history and allows questions of internal regional similarities and differences to emerge more strongly The productive historical contingency of the North as a literary space becomes clear in this close analysis of its literary texts and practices *Bibliography of Social Science Periodicals and Monograph Series* United States. perspectives on the evidence new interpretative avenues have opened it situates the history of the Bronze Age in both a local and a global setting **The Scandinavians from the Vendel Period to the Tenth Century** Judith Jesch, 2012

Scandinavia in the Age of Revolution Michael Bregnsbo, Patrik Winton, 2016-12-05 The Age of Revolution is a term seldom used in Scandinavian historiography despite the fact that Scandinavia was far from untouched by the late eighteenth century revolutions in Europe and America Scandinavia did experience its outbursts of radical thought its assassinations and radical reforms but these occurred within reasonably stable political structures practices and ways of thinking As recent research on the political cultures of the Nordic countries clearly demonstrates the Danish Finnish Icelandic Norwegian and Swedish experiences of the late eighteenth and early nineteenth centuries offer a more differentiated look at what constitutes revolutionary change in this period compared with other regions in Europe They provide an alternative story of an incipient transition towards modernity a Nordic model in which radical change takes place within an apparent continuity of the established order The long term products of the processes of change that began in the Age of Revolution were some of the most progressive and stable political systems in the modern world At the same time the Scandinavian countries provide a number of instances which are directly relevant to comparisons particularly within the northwest European cultural area Presenting the latest research on political culture in Scandinavia this volume with twenty seven contributions focuses on four key aspects the crisis of monarchy the transformation in political debate the emerging influence of commercial interest in politics and the shifting boundaries of political participation Each section is preceded by an introduction that draws out the main themes of the chapters and how they contribute to the broader themes of the volume and to overall European history Generously illustrated throughout this book will introduce non Scandinavian readers to developments in the Nordic countries during the late eighteenth and early nineteenth centuries and both complement and challenge research into the political cultures of Europe and America

Nordic Orientalism Elisabeth Oxfeldt, 2005 Nordic Orientalism explores the appropriation of Oriental imagery within Danish and Norwegian nineteenth century nation building The project queries Edward Said's binary notion of Orientalism and posits a more complex model describing how European countries on the periphery Denmark and Norway imported Oriental imagery from France to position themselves not against their colonial Other but in relation to central European nations Examining Nordic Orientalism across a century in the context of modernization urbanization and democratization the study furthermore shows how the Romanticists naive treatment of the Orient was challenged by increased contact with the real Orient
