distinct from discrimination on the basis of race with which it is often conflated Preferential treatment of lighter skin tones over darker occurs within racial and ethnic groups as well as between them While America has made progress in issues of race over the past decades discrimination on the basis of color continues to be a constant and often unremarked part of life In *Color Matters* Kimberly Jade Norwood has collected the most up to date research on this insidious form of discrimination including perspectives from the disciplines of history law sociology and psychology Anchored with historical chapters that show how the influence and legacy of slavery have shaped the treatment of skin color in American society the contributors to this volume bring to light the ways in which colorism affects us all influencing what we wear who we see on television and even which child we might pick to adopt Sure to be an eye opening collection for anyone curious about how race and color continue to affect society *Color Matters* provides students of race in America with wide ranging overview of a crucial topic

biracial children are either downgraded or upgraded into a tri racial system of categories depending at least in part upon their heritage Drawing also on popular adoption literature and information in the public domain the book provides a critical interpretation of the discursive practices of private adoption and argues that despite the current discourse of equity in contemporary adoption African American children continue to be marginalized as bargain basement deals Color blind individualism extends beyond the U S to our new global reality where children are simply another commodity within the transnational marketplace of adoption

Hall,2012-09-14 In the aftermath of the 60s Black is Beautiful movement and publication of The Color Complex almost thirty years later the issue of skin color has mushroomed onto the world stage of social science Such visibility has inspired publication of the Melanin Millennium for insuring that the discourse on skin color meet the highest standards of accuracy and objective investigation This volume addresses the issue of skin color in a worldwide context A virtual visit to countries that have witnessed a huge rise in the use of skin whitening products and facial feature surgeries aiming for a more Caucasian like appearance will be taken into account The book also addresses the question of whether using the laws has helped to redress injustices of skin color discrimination or only further promoted recognition of its divisiveness among people of color and Whites The Melanin Millennium has to do with now and the future In the 20th century science including eugenics was given to and dominated by discussions of race category Heretofore there remain social scientists and other relative to the issue of skin color loyal to race discourse However in their interpretation and analysis of social phenomena the world has moved on Thus while race dominated the 20th century the 21st century will emerge as a global community dominated by skin color and making it the melanin millennium *Imagining Black America* Michael Wayne,2014-02-25
