Neoliberalism, Nordic Welfare States and Social Work Masoud Kamali,Jessica Jönsson,2018-04-17 How have three decades of neoliberalism affected the Nordic welfare states as well as the organisation education and practices of social work in those countries During recent decades the welfare states of Denmark Finland Norway and Sweden have gone through dramatic changes influenced by the political triumph of neoliberalism This has led to both the electoral success of extreme right and mainstream neoliberal parties and to the neoliberal ideological transformations of social democratic parties The neoliberal doctrine of making governance cheaper has thus been made the focus of governance and has led to increased marginalisation and social problems This is the first book to comparatively explore the role of neoliberal reforms on social work and social policy across the Nordic welfare states The richly theoretical and empirical chapters explore and illustrate the consequences of the

dominance of neoliberal policies and provide an analysis of the effects of globalisation glocalisation welfare nationalism symbolic violence and forced migration The book provides valuable insights into the shortcomings of retreating welfare states in a time of increasing glocal social problems Neoliberalism Nordic Welfare States and Social Work should be considered essential reading for critical social work education Students scholars educators and researchers of Nordic countries and beyond have much to learn from this book

Mackintosh, Joanna Chataway, Marc Wuyts, 2021-04-26 Development and the ending of mass poverty require a massive increase in productive capabilities and production in developing countries Some countries notably in Asia are achieving this Yet pro poor aid policies especially for the least developed countries operate largely without reference to policy thinking on the promotion of innovation for productivity growth Conversely policy makers and researchers on innovation and industrial policies tend to know little about the potential for social protection to support innovation and productivity improvement This book aims to focus attention on this gulf between research on innovation and on poverty reduction and to identify some of its policy consequences to set out some ways in which this gulf can be bridged analytically and empirically and to contribute to the creation of an agenda for further research and an understanding of the urgency of the implied rethinking The first two chapters provide sustained arguments for embedding social policy thinking in much more productivist frameworks of thought that focus on raising productivity and employment and for identifying growth theories that can incorporate satisfactory understandings of innovation and employment upgrading A set of chapters then tackle these broad themes in the context of health addressing the interlinked issues of innovation health inequity and associated impoverishment The final set of chapters examines the challenge of creating industrial policies that generate both innovation and employment using and going beyond concepts of systems of innovation
