Authorship Analysis in Chinese Social Media Texts Shaomin Zhang, 2024-03-27 This Element explores the sentiment and keyword features in both authorship profiling and authorship attribution in social media texts in the Chinese cultural context The key findings can be summarised as

follows firstly sentiment scores and keyword features are distinctive in delineating authors gender and age Specifically female and younger authors tend to be less optimistic and use more personal pronouns and graduations than male and older authors respectively Secondly these distinctive profiling features are also distinctive and significant in authorship attribution Thirdly our mindset shaped by our inherent hormonal influences and external social experiences plays a critical role in authorship Theoretically the findings expand authorship features into underexplored domains and substantiate the theory of mindset Practically the findings offer some broad quantitative benchmarks for authorship profiling cases in the Chinese cultural context and perhaps other contexts where authorship profiling analyses have been used This title is also available as Open Access on Cambridge Core
