Social Science Beyond Constructivism And Realism:

Social Science Gerard Delanty, 1997 It is argued that the conception of social science emerging today is one that involves a synthesis of radical constructivism and critical realism The crucial challenge facing social science is a question of its public role growing reflexivity in society has implications for the social production of knowledge and is bringing into question the separation of expert systems from other forms of knowledge

Social Science Delanty, Gerard, 2005-06-01 What is social science Does social scientific knowledge differ from other kinds of knowledge such as the natural sciences and common sense What is the relation between method and knowledge This concise and accessible book provides a critical discussion and comprehensive overview of the major philosophical debates on the methodological foundations of the social sciences From its origins in the sixteenth century when a new system of knowledge was created around the idea of modernity the author shows how the philosophy of social science developed as a reflection on some of the central questions in modernity Visions of modernity have been reflected in the self understanding of the social sciences From the positivist dispute on explanation vs understanding to controversies about standpoint to debates about constructivism and realism Delanty outlines the major shifts in the philosophy of social science He argues that social science is an intellectual framework for the transformation of the social world The new edition is updated and expanded throughout with the latest developments in the field including a new chapter on feminist standpoint epistemology and additional material on neo positivism pragmatism and reflexivity This is one of the most ambitious and wide ranging texts in recent years on debates on method and the contemporary situation of social science It is of interest to undergraduate students and postgraduates as well as to professional researchers with an interest in the philosophy of the social sciences and social theory

Handbook of Citizenship Studies Engin F Isin, Bryan S Turner, 2002 The contributions of Woodiwiss Lister and Sassen are outstanding but not unrepresentative of the many merits of this excellent collection The British Journal of Sociology From women s rights civil rights and sexual rights for gays and lesbians to disability rights and language rights we have experienced in the past few decades a major trend in Western nation states towards new claims for inclusion This trend has echoed around the world from the Zapatistas to Chechen and Kurdish nationalists social and political movements are framing their struggles in the languages of rights and recognition and hence of citizenship Citizenship has thus become an increasingly important axis in the social sciences Social scientists have been rethinking the role of political agent or subject Not only are the rights and obligations of citizens being redefined but also what it means to be a citizen has become an issue of central concern As the process of globalization produces multiple diasporas we can expect increasingly complex relationships between homeland and host societies that will make the traditional idea of national citizenship problematic As societies are forced to manage cultural difference and associated tensions and conflict there will be changes in the processes by which states allocate citizenship and a differentiation of the category of citizen This book constitutes the most authoritative and comprehensive

guide to the terrain Drawing on a wealth of interdisciplinary knowledge and including some of the leading commentators of the day it is an essential guide to understanding modern citizenship About the editors Engin F Isin is Associate Professor of Social Science at York University His recent works include *Being Political* Genealogies of Citizenship Minnesota 2002 and with P K Wood *Citizenship and Identity* Sage 1999 He is the Managing Editor of *Citizenship Studies* Bryan S Turner is Professor of Sociology at the University of Cambridge He has written widely on the sociology of citizenship in *Citizenship and Capitalism* Unwin Hyman 1986 and *Citizenship and Social Theory* Sage 1993 He is also the author of *The Body and Society* Sage 1996 and *Classical Sociology* Sage 1999 and has been editor of *Citizenship Studies* since 1997
