**National Foundation for Social Sciences** United States. Congress. Senate. Committee on Government Operations. Subcommittee on Government Research,1967 Considers S 836 to create a foundation to promote social science research and scholarship

[Policy Research in Educational Settings](#) Jenny Ozga,1999-11-16 This book argues for independent critical research on education policy in the context of attacks on the

quality and usefulness of educational research in general. It takes issue with the argument promoted by government departments and agencies that education policy research should be limited to work that assists policy makers. Against this position, the book advocates independent critical research that scrutinizes policy in relation to its consequences for equality and social justice. It argues that practitioners and academic researchers should form a research community that develops its own knowledge base from which so-called evidence-based policymaking in education may be assessed and challenged. The book offers guidance on the theoretical and methodological resources available to practitioners and others with an interest in doing research on policy and discusses some of the main issues and problems in doing policy research on education. It offers examples of research on policy at different system levels pursuing themes such as globalization, changing governance of education, selection, choice and exclusion, managerialism and the feminisation of educational management. It argues for attention to the history of policy in education as a resource for understanding the present and concludes with recommendations for future research in areas where contestation of official agendas is needed.

**Video in Social Science Research** Kaye Haw, Mark Hadfield, 2011-03-24. In this digital age, the use of video in social science research has become commonplace. As sophistication has increased along with usability, as spiralling staff costs push out direct observation, the researchers training today are grasping video as a means of coming to terms with the continued pressure to produce accessible research. However, the fit of technology with research is far from simple. Ideally placed to offer guidance to developing researchers, this new text draws together the theoretical, methodological and practical issues of effectively using video across the social sciences. This book concentrates on how researchers can benefit from the use of video in their own research, whether it is video as representation, video as an aid to reflection, video that generates participation, video voice and articulation or video that acts as a provocation. In turn, each of these five central functions is discussed in relation to different stages of the research process, consisting of research design, fieldwork and data collection, analysis of data and findings, dissemination. As a practical research tool, this book shows how, why and when video should be used, representing an invaluable guide for postgraduate and doctoral students conducting research in the social sciences as well as any researchers, academics or professionals interested in developing technologically informed research.
