**Technological Development, Society And State: Western And Chinese Civilizations In Comparison - Proceedings Of The Joint Conference** Welf Heinrich

Schnell,Wolfgang Radtke,Hans Poser,W Konig,1991-10-16 This is a collection of essays focused on problems concerning the philosophy of technology the concept of nature the relationships between policy and economic development on the one hand and technological development on the other hand with respect to philosophical principles historical and cultural background both in Western and Chinese Civilization

**Technology, Values, and Society** Mitra Das,Shirley Kolack,2008 Technology is not value free nor does it exist in a vacuum It needs a social basis technology is affected by society and influences it Technology Values and Society illustrates this using an examination of cross cultural case studies representing simple intermediate and complex societies Certain forms of technology exist when conducive values and structures sustain them However this relationship is not one way Technological changes do precipitate social and value changes It is impossible to sustain egalitarian values in a society involving technology based on hierarchical relationships Understanding this connection is vital if we are to keep some control over the way in which technology affects us This revised edition brings the topic to life for both faculty and students

**Dynamics of Technological Change** Girifalco,2012-12-06 Technology is not an end in itself but a way of satisfying human wants It shows us how to solve the age old economic problem of surviving and prospering in a

hard world But to optimize the benefits of technological advance requires an understanding of how it happens The purpose of this book is to provide some of that understanding The subject is so enormous and so intertwined with every human activity that a small selection of it and that from a special viewpoint is inevitable The selection of subject matter has been of course conditioned by what interests me and is somewhat heterogeneous However it is connected by two major themes The first is that it emphasizes the dynamic nature of technology in the sense that it must be approached as a process evolving in time that can often be described in quantitative terms The second is that I have chosen topics that I believe are essential for a strategic sense of how to plan for execute and respond to technological change These two themes complement each other because the strategic sense requires an appreciation of the dynamics and the dynamics naturally lead to a consideration of how to deal with technology so that it can be used to achieve human objectives The unifying thought behind the book is that technological change has a systemic as well as an idiosyncratic aspect

### *Retooling* Rosalind

Williams,2003-08-11 A humanistic account of the changing role of technology in society by a historian and a former Dean of Students and Undergraduate Education at MIT When Warren Kendall Lewis left Spring Garden Farm in Delaware in 1901 to enter MIT he had no idea that he was becoming part of a profession that would bring untold good to his country but would also contribute to the death of his family s farm In this book written a century later Professor Lewis s granddaughter a cultural historian who has served in the administration of MIT uses her grandfather s and her own experience to make sense of the rapidly changing role of technology in contemporary life Rosalind Williams served as Dean of Students and Undergraduate Education at MIT from 1995 through 2000 From this vantage point she watched a wave of changes some planned and some unexpected transform many aspects of social and working life from how students are taught to how research and accounting are done at this major site of technological innovation In Retooling she uses this local knowledge to draw more general insights into contemporary society s obsession with technology Today technology driven change defines human desires anxieties memories imagination and experiences of time and space in unprecedented ways But technology and specifically information technology does not simply influence culture and society it is itself inherently cultural and social If

there is to be any reconciliation between technological change and community Williams argues it will come from connecting technological and social innovation a connection demonstrated in the history that unfolds in this absorbing book

**Technological Change and the Environment** Arnulf Grübler, 2010-09-30 Much is written in the popular literature about the current pace of technological change But do we have enough scientific knowledge about the sources and management of innovation to properly inform policymaking in technology dependent domains such as energy and the environment While it is agreed that technological change does not fall from heaven like autumn leaves the theory data and models are deficient The specific mechanisms that govern the rate and direction of inventive activity the drivers and scope for incremental improvements that occur during technology diffusion and the spillover effects that cross fertilize technological innovations remain poorly understood In a work that will interest serious readers of history policy and economics the editors and their distinguished contributors offer a unique single volume overview of the theoretical and empirical work on technological change Beginning with a survey of existing research they provide analysis and case studies in contexts such as medicine agriculture and power generation paying particular attention to what technological change means for efficiency productivity and reduced environmental impacts The book includes a historical analysis of technological change an examination of the overall direction of technological change and general theories about the sources of change The contributors empirically test hypotheses of induced innovation and theories of institutional innovation They propose ways to model induced technological change and evaluate its impact and they consider issues such as uncertainty in technology returns technology crossover effects and clustering A copublication of Resources for the Future RFF and the International Institute for Applied Systems Analysis IIASA
