Society State And Nation In Twentieth Century Europe:

Society, State, and Nation in Twentieth-century Europe Roderick Phillips, 2006 *A Social History of Twentieth-Century Europe* Béla Tomka, 2013 *A Social History of Twentieth Century Europe* offers a systematic overview on major aspects of social life including population family and households social inequalities and mobility the welfare state work consumption and leisure social cleavages in politics urbanization as well as education religion and culture It also addresses major debates and diverging interpretations of historical and social research regarding the history of European societies in the past one hundred years Organized in ten thematic chapters this book takes an interdisciplinary approach making use of the methods and results of not only history but also sociology demography economics and political science B la Tomka presents both the diversity and the commonalities of European societies looking not just to Western European countries but Eastern Central and Southern European countries as well A perfect introduction for all students of European history

Europe in the Long Twentieth Century Christoph Cornelissen, 2024-10-08 Thanks to their economic and military strength the European empires had achieved global supremacy by 1900 with large parts of the world under their dominance in the wake of colonial expansion This situation fuelled ideas of Europe s permanent almost natural global superiority especially among the middle classes However as early as the First World War such claims came under increasing pressure This volume explains the role played by modern nationalism and anti imperial movements the competition between different political orders changes in the economy and society and the great ideas and utopias Their interplay gave rise to enormously destructive forces in Europe From the Boer and Balkan wars before 1914 to the Yugoslav wars of the 1990s and the Ukraine war since 2022 they have produced a continuum of violence At the same time the great promise of political participation and social security is one of the constants of Europe s history in the long twentieth century Against this backdrop modern societies emerged whose values had moved far away from the older models Perceptions of the role of the sexes families and generations changed fundamentally In addition the major internal European migrations together with the global immigration that became increasingly significant after 1945 ensured that the ethnic profile of European societies changed considerably Europe in the Long Twentieth Century shows how on the one hand these different factors led to a Europeanisation of living and working conditions and at the same time how the political and economic integration of the countries of Europe progressed On the other hand it demonstrates how Europe s role in the global context changed fundamentally As much as the geopolitical provincialisation of Europe continued unabated Europeans were constantly searching for new ways to assert themselves throughout the long twentieth century The search continues *A Social and Economic History of Twentieth-century Europe* Gerold Ambrosius, William H. Hubbard, 1989 This comprehensive single volume source of information on the social and economic transformations in Europe over the past hundred years fills a critical gap in our knowledge It examines population trends social structures and economic structures and offers an integrative overview of

changes in both the organization of the economy and the role of the state in economic management **The Cambridge History of Modern European Thought: Volume 2, The Twentieth Century** Peter E. Gordon, Warren

Breckman, 2019-08-29 The Cambridge History of Modern European Thought is an authoritative and comprehensive exploration of the themes thinkers and movements that shaped our intellectual world in the late eighteenth and nineteenth century Representing both individual figures and the contexts within which they developed their ideas each essay is written in a clear accessible style by leading scholars in the field and offers both originality and interpretive insight This second volume surveys twentieth century European intellectual history conceived as a crisis in modernity Comprised of twenty one chapters it focuses on figures such as Freud Heidegger Adorno and Arendt surveys major schools of thought including Phenomenology Existentialism and Conservatism and discusses critical movements such as Postcolonialism Structuralism and Post structuralism Renouncing a single master narrative of European thought across the period Peter E Gordon and Warren Breckman establish a formidable new multi faceted vision of European intellectual history for the global modern age

Social Justice in Twentieth-Century Europe Martin Conway, Camilo Erlichman, 2024-03-07 Social justice has returned to the heart of political debate in present day Europe But what does it mean in different national histories and political regimes and how has this changed over time This book provides the first historical account of the evolution of notions of social justice across Europe since the late nineteenth century Written by an international team of leading historians the book analyses the often divergent ways in which political movements state institutions intellectual groups and social organisations have understood and sought to achieve social justice Conceived as an emphatically European analysis covering both the eastern and western halves of the continent Social Justice in Twentieth Century Europe demonstrates that no political movement ever held exclusive ownership of the meaning of social justice Conversely its definition has always been strongly contested between those who would define it in terms of equality of conditions or of opportunity the security provided by state authority or the freedom of personal initiative the individual rights of a liberal order or the social solidarities of class nation confession or Volk **Societies, Corporations and the Nation State** Erwin K. Scheuch, David Sciulli, 2000 These papers

from the 1997 Cologne conference of the International Institute of Sociology are written by major contemporary sociologists A number of issues are discussed including freedom of societies the privatisation of belief ethnicity and globalisation East West relations and institutional rehabilitation Screening Twentieth Century Europe Ib Bondebjerg, 2020-11-24 This book offers a comparative study of historical television genres in Europe with a special focus on Germany and Great Britain and their way of narrating twentieth century European history The book analyses our common European past and memory through central historical television narratives Each chapter looks at how historical TV genres fictional and documentary have dealt with the most salient and defining periods events and changes in the twentieth century an age of extremes Bondebjerg offers unique theoretical and analytical insight into the role of television in mediating and shaping the past The

book explores television's creation of transnational cultural encounters across Europe in relation to our common and national past. The book addresses how television has influenced our understanding of history, collective memory, and public debate over the twentieth century. It is fundamentally a book about the importance of the past in present-day Europe and the centrality of media for transnational understanding.

The Cambridge History of Modern European Thought: Volume 2, The Twentieth Century Warren Breckman, Peter E. Gordon, 2019-08-29. An authoritative and comprehensive survey of the major themes, thinkers, and movements in modern European intellectual history.

World Criminal Justice Systems Richard J. Terrill, 2023-10-24. The revised tenth edition of this core textbook provides an understanding of major world criminal justice systems by discussing and comparing the systems of six of the world's countries, each representative of a different type of legal system: England, France, Japan, South Africa, Russia, and China. All are covered in detail, and an additional chapter on Islamic law uses three example nations to illustrate the range of practice within Sharia. Political, historical, organizational, procedural, and critical issues confronting the justice systems are explained and analyzed. Neatly organized with a parallel structure throughout the text, each chapter contains material on government, police, judiciary, law, corrections, juvenile justice, and other critical issues. A new feature of this text focuses on the nature of the political world order and the significant clash between some democratic and authoritarian governments. Of particular concern are those authoritarian governments that have seen the rise of what has been popularly referred to as the strongman leader. The countries covered in this text have seen the emergence of four such strongmen. While the rise of each occurred in different contexts, they were each facilitated in significant ways by the manner in which they asserted their control over the country's criminal justice system. This book is suitable for undergraduate and graduate students in criminal justice, prelaw, and similar programs. A comprehensive test bank is available online.
