Combining Individual and Structural Perspective* Anna Mikulina, 2020-09-22 Seminar paper from the year 2020 in the subject Sociology Individual Groups Society grade 1 7 University of Frankfurt Main language English abstract Understanding factors mechanisms and processes of upward and downward mobility in different countries remains an important scientific task of sociology around the world The dominant approach to social inequality analysis is the structural approach which places mobility in the context of social structures ability to reproduce or overcome unequal opportunities Yet despite prejudice to social mobility in scientific discourse the reality of modern society emphasizes the role of personal decisions and individual turning points The theory of individualization which addresses individual and structural factors together while not contradicting them has received a great resonance According to this theory the importance of structural factors and universal stratification characteristics that determine human life is increasingly weakening in the individual s biography Stable economic growth the advancement of the education and social security system instability in labor markets and increased flows of transnational migration have weakened class boundaries and increased the diversity of life opportunities and transitions as well as the role of individual in the creation of own biography and the importance of personal choices forcing a reconsideration of approaches and methods in studies of social mobility The integration of the individual into social mobility research is an important methodological task which solution is closely linked to the development of a life

course approach to mobility This approach can be broadly defined as consolidating research on biographies and life stories of individuals families and generations using both quantitative and qualitative methods In the biographical approach a person s life is understood as a result of the reciprocal effects of structural forces and individual actions and can be defined as a series of milestones in life events defined by the social order at each one of which an individual chooses certain social roles and statuses Biographical choices depend also on individual habitus stable patterns of thinking perception and evaluation embedded in the body However the ideologically ambiguous concept of individualization suggests the disintegration of previously existing social forms and the increasing fragility of traditionally important parameters of industrial society such as class culture and self consciousness race and ethnicity gender roles and family

Situating Children of Migrants across Borders and Origins Claudio Bolzman,Laura Bernardi,Jean-Marie Le Goff,2017-10-25 This open access wide ranging collation of papers examines a host of issues in studying second generation immigrants their life courses and their relations with older generations Tightly focused on methodological aspects both quantitative and qualitative the volume features the work of authors from numerous countries from differing disciplines and approaches A key addition in a corpus of literature which has until now been restricted to studying the childhood adolescence and youth of the children of immigrants the material includes analysis of longitudinal and transnational efforts to address challenges such as defining the population to be studied and the difficulties of follow up research that spans both time and geographic space In addition to perceptive reviews of extant literature chapters also detail work in surveying the children of immigrants in Europe the USA and elsewhere Authors address key questions such as the complexities of surveying each generation in families where parents have migrated and left children in their country of origin and the epistemological advances in methodology which now challenge assumptions based on the Westphalian nation state paradigm The book is in part an outgrowth of temporal factors immigrants children are now

reaching adulthood in more significant numbers but also reflects the added sophistication and sensitivity of social science surveys In linking theoretical and methodological factors it shows just how much the study of these second generations and their families can be enriched by evolving methodologies This book is open access under a CC BY license *Home* Efa E.
