The Soybean Through World History Matilda Baraibar Norberg, Lisa Deutsch, 2023-06-30 This book examines the changing roles and functions of the soybean throughout world history and discusses how this reflects the complex processes of agrofood globalization The book uses a historical lens to analyze the processes and features that brought us to the current global configuration of the soybean commodity chain From its origins as a peasant food in ancient China today the protein rich soybean is by far the most cultivated biotech crop on Earth used to make a huge variety of food and industrial products including animal feed tofu cooking oil soy sauce biodiesel and soap While there is a burgeoning amount of literature on how the contemporary global soy web affects large tracts of our planet s social ecological systems little attention has been given to the questions of how we got here and what alternative roles the soybean has played in the past This book fills this gap and demonstrates that it is impossible to properly comprehend the contemporary global soybean chain or the wider agrofood system of which it is a part without looking at both their long and short historical development However a history of the soybean and its changing roles within equally changing agrofood systems is inexorably a history about globalization Not only does this book map out where soybeans are produced but also who governs wields power and accumulates capital in the entire commodity chain from inputs in production to consumption as well as identifying the institutional context the global commodity chain operates within The book concludes with a discussion of the main challenges and contradictions of the current soy regime that could trigger its rupture and end This book is essential reading for students practitioners and scholars interested in agriculture and food systems global commodity chains globalization environmental history economic history and social ecological systems

rvindar friska Fresh Spring Breezes started its public life in 1828 between the covers of a book as a poem written to a traditional melody Since then it has been reprinted translated performed and used in the most surprising contexts in different corners of the world This particular case may be rather exceptional but Gunilla Hermansson argues that the underlying dynamics are not and yet they have been underexposed in studies of literary history This exploration of V rvindar friska reveals the rich and intricate network of one text and uncovers new facets of how people have engaged with word art in their everyday lives in the modern era This network includes untraditional yet widespread uses of poetry and lyrics in lonely hearts columns and railway work and seemingly strange bedfellows such as a constellation of Nordic folk songs and American plantation songs The afterlives of this song evoke questions concerning class gender race citizenship technology and modernity from new angles as well as theoretical and methodological questions of circulation textual instability canonization paradigmatic turns uses and misuses Song Lyrics and Literary History demonstrates how poetry is transformed when shared across time borders media and social and ideological divides Being attentive to poetry meant to be sung Hermansson argues opens to a fuller and more representative picture of the cultural history of literature Times of History, Times of Nature Anders Ekström, Staffan Bergwik, 2022-02-11 As climate change becomes an increasingly important part of public discourse the relationship between time in nature and history is changing Nature can no longer be considered a slow and immobile background to human history and the future can no longer be viewed as open and detached from the past Times of History Times of Nature engages with this historical shift in temporal sensibilities through a combination of detailed case studies and synthesizing efforts Focusing on the history of knowledge media theory and environmental humanities this volume explores the rich and nuanced notions of time and temporality that have emerged in response to climate change

Rome and The Guidebook Tradition Anna Blennow,Stefano Fogelberg Rota,2019-04-01 To this day no comprehensive academic study of the development of guidebooks to Rome over time has been performed This book treats the history of guidebooks to Rome from the Middle Ages up to the early twentieth century It is based on the results of the interdisciplinary research project Topos and Topography led by Anna Blennow and Stefano Fogelberg Rota From the case studies performed within the project it becomes evident that the guidebook as a phenomenon was formed in Rome during the later Middle Ages and early Renaissance The elements and rhetorical strategies of guidebooks over time have shown to be surprisingly uniform with three important points of development a turn towards a more user friendly structure from the seventeenth century and onward the so called Baedeker effect in the mid nineteenth century and the introduction of a personalized guiding voice in the first half of the twentieth century Thus the guidebook tradition is an unusually consistent literary oeuvre which also forms a warranty for the authority of every new guidebook In this respect the guidebook tradition is intimately associated with the city of Rome with which it shares a constantly renovating yet eternally fixed nature **Ladies in the Laboratory**
