A. Davis, 1998-03-17 Sir Nevill Mott was Britain's last Winner of the Nobel Prize for Physics This is a tribute to the life and work of Nobel Laureate Nevill Mott a hugely admired and appreciated man and one of this country's greatest ever scientists It includes contributions from over 80 of his friends family and colleagues full of anecdotes and appreciations for this colossus of modern physics Formation And Evolution Of Black Holes In The Galaxy: Selected Papers With Commentary Hans A Bethe, Gerald E Brown, Chang-hwan Lee, 2003-03-04 In published papers H A Bethe and G E Brown worked out the collapse of large stars and supernova explosions They went on to evolve binaries of compact stars finding that in the standard scenario the first formed neutron star always went into a black hole in common envelope evolution C H Lee joined them in the study of black hole binaries and gamma ray bursts They found the black holes to be the fossils of the gamma ray bursts From their properties they could reconstruct features of the burst and of the accompanying hypernova explosions This invaluable book contains 23 papers on astrophysics chiefly on compact objects written over 23

years The papers are accompanied by illuminating commentary In addition there is an appendix on kaon condensation which the editors believe to be relevant to the equation of state in neutron stars and to explain why black holes are formed at relatively low masses
